

6 Abbreviations

A33RC	cytoplasmic domain of A33R
A33RL	luminal domain of A33R
ADF	actin depolymerizing factor
AMCA	7-amino-4-methylcoumarin-3-acetic acid
ARC	Arp2/3 complex
Arp	actin-related protein
ATP	adenosine 5'-triphosphate
bp	base pair
BSA	bovine serum albumine
cAMP	cyclic 3', 5'-adenosine monophosphate
CB	cytoskeletal buffer
CEV	cell-associated enveloped virus
DABCO	diazabicyclo[2.2.2]octane
DTT	dithiothreitol
EDTA	ethylenediaminetetraacetate
EGTA	ethyleneglycol-bis[b-aminoethyl ether]-N,N,N',N'-tetra-acetate
EEV	extracellular enveloped virus
ER	endoplasmic reticulum
FCS	fetal calf serum
FITC	fluorescein isothiocyanate
GST	glutathione-S-transferase
hpi	hours post infection
IEV	intracellular enveloped virus
IHD	International Health Department
IMCBH	N1-isonicotinoyl-N2,3-methyl-4-chlorobenzoylhydrazine
IMV	intracellular mature virus
IPTG	isopropyl-b-D-thiogalactopyranoside
IV	immature virion
kD	kilodalton
LAT	little actin tail
MEM	minimal essential medium
Mes	2-[N-morpholino]ethanesulfonic acid
moi	multiplicity of infection
ORF	open reading frame
PBS	phosphate buffered saline
PFA	paraformaldehyde
TGN	<i>trans</i> -Golgi network
Tris	tris[hydroxymethyl]aminomethane
VASP	vasodilator-stimulated phosphoprotein
WHO	World Health Organization
WR	Western Reserve
x g	times gravity
