

Medizinische Fakultät Charité – Universitätsmedizin Berlin

Campus Benjamin Franklin

aus der Abteilung für Psychosomatik und Psychotherapie

Geschäftsführender Direktor: Prof. Dr. H.-C. Deter

**Auswirkungen von kurzzeitigem psychischem Laborstress auf die  
Verteilung von T-Zell-Subpopulationen und Effektormechanismen  
des peripher zirkulierenden T-Zell-Pools**

Inaugural-Dissertation  
zur Erlangung der medizinischen Doktorwürde  
Charité – Universitätsmedizin Berlin  
Campus Benjamin Franklin

vorgelegt von  
**Benjamin Schnee**  
aus Berlin

Referent: Prof. Dr. med. H.-Chr. Deter

Korreferent: Prof. Dr. C. Scheibenbogen

Gedruckt mit Genehmigung der Charité – Universitätsmedizin Berlin  
Campus Benjamin Franklin

Promoviert am: 19.09.2008

Meiner Mutter und meinem Bruder gewidmet

## Inhaltsverzeichnis

1 EINLEITUNG .....	9
2 FORSCHUNGSGEGENSTAND.....	11
2.1 Psychoneuroimmunologie.....	11
2.2 Psychophysiologische Stresskonzepte .....	12
2.3 Kommunikation zwischen ZNS und Immunsystem.....	13
2.4 Teil der adaptiven Immunität: T-Lymphozyten .....	15
2.4.1 Vier Subpopulationen von CD4 <sup>+</sup> und CD8 <sup>+</sup> T-Lymphozyten.....	16
2.4.1.1 T <sub>naive</sub> und T <sub>CM</sub> .....	18
2.4.1.2 T <sub>EM</sub> und T <sub>EMRA</sub> .....	18
2.4.2 Effektormechanismen der T-Lymphozyten .....	19
2.4.2.1 Perforin.....	20
2.4.2.2 Granzyme .....	20
2.5 Auswirkungen von psychischem Stress auf Funktionen des Immunsystems .....	21
3 ZIEL DER ARBEIT .....	25
4 PROBANDEN UND METHODEN .....	27
4.1 Probandenkollektiv.....	27
4.2 Untersuchungsplan .....	29
4.2.1 Untersuchungsablauf .....	29
4.2.2 Psychophysiologischer Belastungstest .....	30
4.2.3 Psychodiagnostik .....	31
4.2.4 Physiologische Parameter.....	32
4.3 Immunologische Parameter.....	33
4.3.1 Differentialblutbild .....	34
4.3.2 Isolierung von mononukleären Zellen aus heparinisiertem Vollblut .....	34
4.3.3 Kryopreservation und Auftauen von Zellen .....	35
4.3.4 Durchflusszytometrie/ FACS.....	35
4.3.5 Färbung der Zellen.....	37
5 ERGEBNISSE.....	39
5.1 Probanden.....	39
5.2 Psychologische Reagibilität .....	40
5.3 Physiologische Reagibilität.....	41

5.4	Immunologische Parameter.....	43
5.4.1	Differentialblutbild .....	43
5.4.2	CD4 <sup>+</sup> und CD8 <sup>+</sup> T-Lymphozyten, NK-T- und NK-Zellen.....	44
5.4.3	Umverteilung peripherer T-Zell-Subpopulationen unter akutem psychischem Stress: Ergebnisse zu Hypothese 1 .....	47
5.4.4	Expression von Granzym B und Perforin in peripheren CD4 <sup>+</sup> /CD8 <sup>+</sup> T-Lymphozyten: Ergebnisse zu Hypothese 2 .....	51
5.4.5	Expression der intrazellulären Effektmoleküle Granzym B und Perforin in CCR7-negativen T-Lymphozyten .....	54
6	DISKUSSION .....	57
6.1	Auswirkungen von akutem psychischem Stress auf die Zusammensetzung und die funktionelle Effektkapazität des peripher zirkulierenden T-Zell-Pools .....	57
6.1.1	Psychologische Reagibilität.....	57
6.1.2	Physiologische Reagibilität .....	58
6.1.3	Immunologische Variablen .....	58
6.1.3.1	Differentialblutbild.....	59
6.1.3.2	CD4 <sup>+</sup> und CD8 <sup>+</sup> T-Lymphozyten, NK- und NK-T-Zellen .....	59
6.1.3.3	Umverteilung peripher zirkulierender T-Zell-Subpopulationen unter akutem psychischem Stress: Zu Hypothese 1 .....	60
6.1.3.4	Auswirkungen akuter mentaler Belastung auf die zytolytische Effektkapazität des peripheren T-Zellpools: Zu Hypothese 2 .....	62
6.1.3.5	CCR7 – ein potentieller Marker der stressinduzierten Umverteilung.....	63
6.2	Implikationen für die adaptive Immunität .....	63
6.3	Akuter psychischer Stress und Immunfunktionen: Konzepte im Wandel .....	66
6.4	Implikationen für Gesundheit und Krankheit .....	67
6.4.1	Akuter Stress als endogenes Adjuvans bei der primären Immunisierung.....	67
6.4.2	Akuter psychischer Stress und Autoimmunerkrankungen .....	69
6.4.2.1	Chronisch entzündliche Gelenkerkrankungen .....	70
6.6	Diskussion zur Versuchsdurchführung .....	72
7	ZUSAMMENFASSUNG .....	75
<b>Anhang</b>		
LITERATURVERZEICHNIS .....		77
ABKÜRZUNGSVERZEICHNIS .....		92

EIGENE PUBLIKATIONEN .....	93
LEBENSLAUF .....	94
DANKSAGUNG.....	95
ERKLÄRUNG .....	96

## Abkürzungsverzeichnis

A	Ausgangswert (Messung am Ende der Ruhephase 1)
ACTH	Adrenocorticotropes Hormon
AK	Antikörper
APC	Antigenpräsentierende Zellen
B	Stresswert (Messung während der Belastungsphase)
BE	Blutentnahme
C	Erholungswert (Messung am Ende der Erholungsphase)
CBF	Campus Benjamin Franklin
CRH	Corticotropin Releasing Hormone
CTL	Cytotoxische T-Zellen
DC	Dendritische Zellen
DMSO	Dimethylsulfoxid
EDTA	Ethyldiamintertraessigsäure
FACS	Fluorescence activated cell sorting
FB	Fragebogen
FCS	Fötales Kälberserum (fetal calf serum)
FITC	Fluoresceinisothiocyanat
HPA-Achse	Hypothalamic-pituitary-adrenal-Achse (Hypothalamus-Hypophysen-Nebennieren-Achsen)
JIA	Juvenile idiopathische Arthritis
MW	Mittelwert
n	Stichprobenumfang
n.s.	nicht signifikant
NK-Zellen	Natürliche Killerzellen
NKCA	Natürliche Killerzellaktivität
PBMC	peripherie mononukleäre Zellen
PBS	Phosphate buffered saline
PE	Phycoerythrin
PerCP	Peridiniumchlorophyll-Protein
PI	Propidiumjodid
prä	unter Ruhebedingungen (vor dem Belastungstest)
post	unter Ruhebedingungen (nach der Erholungsphase)
RA	Rheumatoide Arthritis
SD	Standardabweichung
SEM	Standardfehler der Mittelwerte („standard error of means“)
Sig	statistische Signifikanz
SNS	Sympathisches Nervensystem
STAXI	State Trait Anger Expression Inventory (State-Trait-Ärgerausdruckinventar)
Stress	unter Stressbedingungen (direkt nach dem Belastungstest)
T <sub>CM</sub>	central memory T-cells (zentrale Gedächtnis-T-Zellen)
T <sub>EM</sub>	effector memory T-cells (Effektor-Gedächtnis-T-Zellen)
T <sub>EMRA</sub>	terminally differentiated effector T-cells (terminal differenzierte Effektor-T-Zellen)
T <sub>naive</sub>	naïve T-cells (naive T-Zellen)

## Eigene Publikationen

**Lebenslauf**

Mein Lebenslauf wird aus Datenschutzgründen in der elektronischen Version meiner Arbeit nicht mit veröffentlicht.

## Danksagung

Zuerst und vor allem danke ich meinem Doktorvater Herrn Prof. Hans-Christian Deter für die freundliche Überlassung des Themas und die Freiheit bei der Gestaltung dieser Arbeit.

Den Mitarbeitern der Abteilung für Psychosomatik des Campus Benjamin Franklin, insbesondere Miriam Rudat und Dr. Cora Weber, möchte ich für ihre ausdauernde konstruktive Kritik, stete Ermutigung und moralische Unterstützung danken.

Ganz besonders danke ich Herrn Dr. Djordje Atanackovic sowie den Mitgliedern seiner Arbeitsgruppe für den intensiven und anregenden Gedankenaustausch.

Des Weiteren möchte ich Frau PD Dr. Monika Brunner-Weinzierl und den Mitgliedern ihrer Arbeitsgruppe im DRFZ für die kollegiale Aufnahme, die gute Einarbeitung und die freundliche Hilfsbereitschaft bei der Durchführung des immunologischen Teils der vorliegenden Studie danken - insbesondere Karin Knieke, die immer ein offenes Ohr nicht nur bei wissenschaftlichen Fragestellungen hatte.

Für die freundliche Unterstützung bei der Bewältigung statistischer Fragestellungen danke ich Herrn PD Dr. Dr. Werner Hopfenmüller aus der Abteilung für Biometrie und Medizinische Epidemiologie des CBF.

Sehr herzlich danke ich meiner Mutter für ihre oftmals stillschweigende, jedoch immer zuversichtliche Unterstützung in jeglicher Hinsicht, ohne die meine Ausbildung und die Erstellung dieser Dissertationsschrift nicht möglich gewesen wären.

Meinem Bruder danke ich für seine Anwesenheit, nicht zuletzt in und vor der Bibliothek mit ablenkenden, ermutigenden und den Horizont erweiternden fachübergreifenden Gesprächen. Amit danke ich für seine unendliche Geduld, Friede für die vielen Milchkaffees und meinen Freunden für ihr Verständnis in den Zeiten meiner rezidivierenden geistigen und körperlichen Abwesenheit.

**Erklärung**

„Ich, Benjamin Schnee, erkläre, dass ich die vorgelegte Dissertationsschrift mit dem Thema: „Auswirkungen von kurzzeitigem psychischem Laborstress auf die Verteilung von T-Zell-Subpopulationen und Effektormechanismen des peripher zirkulierenden T-Zell-Pools“ selbst verfasst habe und keine anderen als die angegebenen Quellen und Hilfsmittel benutzt, ohne die (unzulässige) Hilfe Dritter verfasst und auch in Teilen keine Kopie anderer Arbeiten dargestellt habe.“
