

Prohibitin proteins: mitochondrial chaperones and regulators of adhesion

Dissertation zur Erlangung des akademischen Grades des
Doktors der Naturwissenschaften (Dr. rer. nat.)
eingereicht im Fachbereich Biologie, Chemie, Pharmazie
der Freien Universität Berlin

vorgelegt von
Claudia Sievers
aus Berlin

August 2007

1. Gutachter: Priv. Doz. Dr. Thomas Rudel

2. Gutachter: Prof. Dr. Petra Knaus

Disputation am 19.11.2007

This work was prepared at the Max Planck Institute for Infection Biology in the Department of Molecular Biology in Berlin

Part of this work was published or will be published under the following titles:

Rajalingam K, Wunder C, Brinkmann V, Churin Y, Hekman M, Sievers C, Rapp UR, Rudel T. Prohibitin is required for Ras-induced Raf-MEK-ERK activation and epithelial cell migration. *Nat Cell Biol.* 2005 Aug;7 (8):837-43.

Sievers C, Billig G, Sharma M, Rudel T

Prohibitin is required for cellular proliferation and carcinogenesis

(In preparation)

Sievers C, Gottschalk K, Rudel T

Prohibitin prevents OPA1 fragmentation in cancer cells by regulating m-AAA protease activity

(In preparation)

Table of contents

Table of contents	IV
1.1 Abstract	7
1.2 Zusammenfassung	8
2 Introduction	9
2.1 Proliferation and cell cycle control	9
2.2 Apoptosis and Carcinogenesis	10
2.3 Prohibitin proteins	12
2.4 Prohibitin 1 as a tumor suppressor	14
2.5 Prohibitins in apoptosis	15
2.6 Prohibitins in Senescence	15
2.7 Prohibitins function as mitochondrial chaperones	16
2.7.1 m-AAA protease	17
2.7.2 OPA1 and PARL	18
2.8 Cell Migration	20
3 Objectives	25
4 Results	26
4.1 shRNA induced prohibitin knockdown	26
4.2 Prohibitin knockdown in cancer cells	27
4.3 Proliferation in prohibitin knockdown cells	30
4.4 Ras-Raf-MEK signaling in prohibitin knockdown cells	32
4.5 Loss of prohibitin stops anchorage independent growth	34
4.6 Doxycycline inducible prohibitin knockdown	35
4.7 Double knockdown: prohibitin 1/prohibitin 2	36
4.8 Mitochondrial function of prohibitins	38
4.9 OPA 1 fragmentation in prohibitin knockdown cells	40
4.10 Mitochondrial networks	41
4.11 Membrane potential	43
4.12 EGFR overexpression	45
4.13 Cell-matrix /Cell-cell-contacts	46
5 Discussion	49

5.1	Prohibitin stability	49
5.2	Proliferation defect.....	50
5.3	Adhesion/migration.....	51
5.4	Prohibitin 3'UTR	54
5.5	Mitochondrial chaperone.....	55
6	Materials	58
6.1	Bacterial strains.....	58
6.2	Plasmids.....	58
6.3	Cell lines.....	59
6.4	Enzymes	59
6.5	Oligonucleotides	59
6.6	Antibodies	61
6.7	Chemical reagents.....	62
6.8	Kits.....	63
6.9	Buffers	64
6.10	Media and supplements.....	67
6.11	Appliances and consumable materials	68
6.12	Software	68
7	Methods.....	69
7.1	Cell culture methods	69
7.1.1	Cell line culture	69
7.1.2	shRNA mediated RNA interference	69
7.1.3	Lentivirus production.....	70
7.1.4	Infection and Titration	72
7.1.5	Cell Proliferation assays	73
7.1.6	Indirect immunofluorescence	74
7.1.7	Receptor surface staining	75
7.1.8	Soft agar assay	75
7.1.9	Proliferation in suspension.....	76
7.1.10	Adhesion assay	76
7.1.11	Mitochondria isolation	76
7.1.12	Cytosolic protein preparation	77
7.1.13	Membrane potential	77
7.1.14	ATP measurement.....	78
7.2	Protein methods	78

7.2.1	SDS-Page and Western Blot	78
7.2.2	Coomassie staining	79
7.2.3	In vitro translation	79
7.2.4	Protein expression in E.coli	79
7.2.5	GST-tagged protein purification from E.coli	80
7.2.6	Protein refolding.....	80
7.2.7	GST-tagged protein purification from SF9 cells	81
7.2.8	Binding assay	81
7.2.9	Immunoprecipitation	81
7.3	Nucleic acid methods.....	82
7.3.1	Nucleic acid purification	82
7.3.2	Generation of cDNA.....	82
7.3.3	Design of shRNAs	82
7.3.4	Annealing of shRNA oligos	83
7.3.5	Cloning of shRNA oligos into lentiviral vectors	83
7.3.6	Cloning of PCR fragments with the Di-/TriSec method.....	85
7.3.7	Vector amplification	87
7.3.8	Colony screen.....	88
7.3.9	Reverse Transcription and PCR (qRT-PCR)	88
7.4	Miscellaneous methods	89
7.4.1	Preparation of competent E.colis	89
7.4.2	Transformation of E.coli.....	89
7.4.3	Quantification of mitochondria fragmentation with ImageJ	89
7.4.4	Quantification of protein expression levels with AIDA image analyzer	90
8	Reference list	91
9	Index	99
9.1	Figure index	99
9.2	Abbreviations.....	100
9.3	List of constructs	103
9.4	Curriculum Vitae.....	104
9.5	Acknowledgments.....	106
