Amaechi, B. T., Higham, S. M., Edgar, W. M.

Factors influencing the development of dental erosion in vitro: enamel type, temperature and exposure time.

J Oral Rehabil 26: 624-630 (1999)

Arends, J., Jongebloed, W. L.

Crystallites dimensions of enamel.

J Biol Buccale 6: 161-171 (1978)

Arends, J., Jongebloed, W. L.

Ultrastructural studies of synthetic apatite crystals.

J Dent Res 58: 837-843 (1979)

Arends, J., Lodding, A., Petersson, L. G.

Fluoride uptake in enamel. In vitro comparison of topical agents.

Caries Res 14: 403-413 (1980)

Arends, J., Ten Cate, J. M.

Tooth enamel remineralisation.

J Crystal Growth 53: 135-147 (1981)

Arends, J., Jongebloed, W. L., Schuthof, J.

Crystallite diameters of enamel near the anatomical surface. An investigation of mature, deciduous and non-erupted human enamel.

Caries Res 17: 97-105 (1983)

Arends, J., Ten Bosch, J. J.

Demineralization and remineralization evaluation techniques.

J Dent Res 71: 924-928 (1992)

Backer-Dirks, O.

Posteruptive changes in dental enamel.

J Dent Res 45: 503-511 (1966)

Bille, J., Thylstrup, A.

Radiographic diagnosis and clinical tissue changes in relation to treatment of approximal carious lesions.

Caries Res 16: 1-6 (1982)

Bille, J., Carstens, K.

Approximal caries progression in 13- to 15-year-old Danish children.

Acta Odontol Scand 47: 347-354 (1989)

Brannstrom, M., Gola, G., Nordenvall, K. J., Torstenson, B.

Invasion of microorganisms and some structural changes in incipient enamel caries. A scanning electron microscopic investigation.

Caries Res 14: 276-284 (1980)

Brannstrom, M.

Infection beneath composite resin restorations: can it be avoided?

Oper Dent 12: 158-163 (1987)

Buonocore, M. G.: A simple method of increasing the adhesion of acrylic filling materials to enamel surfaces.

J Dent Res 34: 849-853 (1955)

Buskes, J. A., Christoffersen, J., Arends, J.

Lesion formation and lesion remineralization in enamel under constant composition conditions. A new technique with applications.

Caries Res 19: 490-496 (1985)

Davidson, C. L., Boom, G., Arends, J.

Calcium distribution in human and bovine surface enamel.

Caries Res 7: 349-359 (1973)

Davila, J. M., Buonocore, M. G., Greeley, C. B., Provenza, D. V.

Adhesive penetration in human artificial and natural white spots.

J Dent Res 54: 999-1008 (1975)

De Araujo, F. B., Rosito, D. B., Toigo, E., Dos Santos, C. K.

Diagnosis of approximal caries: radiographic versus clinical examination using tooth separation.

Am J Dent 5: 245-248 (1992)

Dibdin, G. H.

The stability of water in human dental enamel studied by proton nuclear magnetic resonance.

Arch Oral Biol 17: 433-437 (1972)

Duschner, H., Ernst, C. P., Goetz, H., Rauscher, M.

Advanced techniques of micro-analysis and confocal microscopy: perspectives for studying chemical and structural changes at the interface between restorative materials and the cavity wall.

Adv Dent Res 9: 355-362 (1995)

Eick, J. D., Robinson, S. J., Byerley, T. J., Chappell, R. P., Spencer, P., Chappelow, C. C.

Scanning transmission electron microscopy/energy-dispersive spectroscopy analysis of the dentin adhesive interface using a labeled 2-hydroxyethylmethacrylate analogue.

J Dent Res 74: 1246-1252 (1995)

Ekstrand, K. R., Martignon, S.

Managing Approximal Carious Lesions: A New Non-Operative Approach.

Caries Res 38: 357-412 (2004)

Esser, M., Tinschert, J., Marx, R.

Materialkennwert der Zahnhartsubstanz des Rindes im Vergleich zur humanen Zahnhartsubstanz.

Dtsch Zahnärztl Z 53: 713-717 (1998)

Fan, P. L., Seluk, L. W., O'brien, W. J.:

Penetrativity of sealants: I.

J Dent Res 54: 262-264 (1975)

Featherstone, J. D., Mellberg, J. R.

Relative rates of progress of artificial carious lesions in bovine, ovine and human enamel.

Caries Res 15: 109-114 (1981)

Featherstone, J. D., Behrman, J. M., Bell, J. E.

Effect of whole saliva components on enamel demineralization in vitro.

Crit Rev Oral Biol Med 4: 357-362 (1993)

Flim, G. J., Arends, J.

Diffusion of ^{45}Ca in bovine enamel.

Calcif Tissue Res 24: 59-64 (1977)

Fontana, M., Li, Y., Dunipace, A. J., Noblitt, T. W., Fischer, G., Katz, B. P., Stookey, G. K.

Measurement of enamel demineralization using microradiography and confocal microscopy.

A correlation study.

Caries Res 30: 317-325 (1996)

Foster, L. V.

Three year in vivo investigation to determine the progression of approximal primary carious lesions extending into dentine.

Br Dent J 185: 353-357 (1998)

Garcia-Godoy, F., Summitt, J. B., Donly, K. J.

Caries progression of white spot lesions sealed with an unfilled resin.

J Clin Pediatr Dent 21: 141-143 (1997)

Gente, M., Sondermann, U., Lehmann, K. M.

[Linear coefficient of thermal expansion for bovine enamel and dentin].

Dtsch Zahnärztl Z 40: 488-490 (1985)

Goepferd, S. J., Olberding, P.

The effect of sealing white spot lesions on lesion progression in vitro.

Pediatr Dent 11: 14-16 (1989)

Going, R. E., Loesche, W. J., Grainger, D. A., Syed, S. A.

The viability of microorganisms in carious lesions five years after covering with a fissure sealant.

J Am Dent Assoc 97: 455-462 (1978)

Gonzalez-Cabezas, C., Fontana, M., Dunipace, A. J., Li, Y., Fischer, G. M., Proskin, H. M., Stookey, G. K.

Measurement of enamel remineralization using microradiography and confocal microscopy. A correlational study.

Caries Res 32: 385-392 (1998)

Gray, G. B.

An evaluation of sealant restorations after 2 years.

Br Dent J 186: 569-575 (1999)

Gray, G. B., Shellis, P.

Infiltration of resin into white spot caries-like lesions of enamel: an in vitro study.

Eur J Prosthodont Restor Dent 10: 27-32 (2002)

Haller, B., Hofmann, N., Klaiber, B., Bloching, U.

Effect of storage media on microleakage of five dentin bonding agents.

Dent Mater 9: 191-197 (1993)

Handelman, S. L., Washburn, F., Wopperer, P.

Two-year report of sealant effect on bacteria in dental caries.

J Am Dent Assoc 93: 967-970 (1976)

Handelman, S. L., Leverett, D. H., Espeland, M. A., Curzon, J. A.

Clinical radiographic evaluation of sealed carious and sound tooth surfaces.

J Am Dent Assoc 113: 751-754 (1985)
