

**Fachbereich Erziehungswissenschaft und Psychologie
der Freien Universität Berlin**

**Longing ("Sehnsucht") as a New Lifespan Concept:
A Developmental Conceptualization and Its Measurement in Adulthood**

Dissertation

zur Erlangung des akademischen Grades Doktorin der Philosophie (Dr. phil.)

Vorgelegt von

Dipl.-Psych. Susanne Scheibe

Gutachter:

Prof. Dr. Paul B. Baltes, Max-Planck-Institut für Bildungsforschung, Berlin

Prof. Dr. Ralf Schwarzer, Freie Universität Berlin

Betreuer:

Prof. Dr. Paul B. Baltes, Max-Planck-Institut für Bildungsforschung, Berlin

Prof. Dr. Alexandra M. Freund, Universität Zürich

Disputation: Berlin, 18.04.2005

Table of Contents

Acknowledgements	V
Abstract	VI
Zusammenfassung	VIII
1 Introduction	1
2 Theoretical Considerations	4
2.1 Propositions of Lifespan Psychology and Their Implications for the Concept of Longing.....	4
2.2 A Developmental Conceptualization of Longing.....	8
2.2.1 Definition of Longing	8
2.2.2 Six Structural Characteristics of Longing.....	10
2.2.3 Contents of Longing: What Are We Longing for?.....	17
2.2.4 The Importance of Control Over Longing	19
2.2.5 The Self-Regulation Function of Longing.....	23
2.3 Distinguishing Longing From Related Concepts	26
2.3.1 Longing and Goals	26
2.3.2 Longing and Possible Selves	31
2.3.3 Longing and the Ideal Self.....	31
2.3.4 Longing and Wishes	33
2.3.5 Longing and Regret	33
2.3.6 Longing and Hope.....	34
2.3.7 Longing and Daydreams.....	34
2.3.8 Longing and Free Future Fantasies.....	35
2.4 Longing in the Context of Lifespan Development	36
2.4.1 Developmental Antecedents and Consequences of Longing.....	36
2.4.2 Age-Related Influences on and Changes in Longing.....	41
2.5 Central Research Questions and Hypotheses	45
2.5.1 Can Longing Be Measured Empirically?	46
2.5.2 Do the Empirical Data Support the Proposed General Characteristics of Longing?	46
2.5.3 Are There Age-Related Differences in Longing Across Adulthood, and in Which Aspects?	47
2.5.4 Does Longing Have a Regulatory Function in Adult Development?	48
2.5.5 Are There Subgroups With Distinct Longing Profiles, and Does Subgroup Membership Moderate Age Associations and the Regulatory Function of Longing in Adult Development?.....	49

3	Method	50
3.1	Participants	50
3.1.1	Sample Size and Composition	50
3.1.2	Socio-Demographic Characteristics	51
3.1.3	Self-Rated Health and Intellectual Performance.....	52
3.2	Procedure.....	54
3.3	Measures	55
3.3.1	Measurement of Longing.....	55
3.3.2	Measurement of Subjective Well-Being	64
3.3.3	Additional Measures	67
3.4	Statistical Analyses.....	69
3.4.1	Data Preparation.....	69
3.4.2	Optimization of the Longing Questionnaire With Confirmatory Factor Analysis	70
3.4.3	Derivation of Longing Subgroups With Cluster Analysis.....	73
3.4.4	Adjustment of the Level of Significance.....	74
4	Results.....	76
4.1	Development of a Self-Report Measure for the Assessment of Longing.....	76
4.1.1	Item Selection and Factor Structure of the Longing Subscales in Longing 1	76
4.1.2	Consistency of the Factor Structure Across the Three Longings of a Person.....	82
4.1.3	Final Measurement Models of the Longing Subscales.....	87
4.1.4	Consistency of the Factor Structure Across Three Age Groups	90
4.1.5	Retest Stability of the Longing Subscales.....	93
4.1.6	Additional Subscales and Items of the Longing Questionnaire	95
4.1.7	Summary of Scale Development Results	96
4.2	General Characteristics of Longing	97
4.2.1	The Nature of Longing Contents.....	98
4.2.2	Higher-Order Factor Structure of the Structural Characteristics of Longing.....	104
4.2.3	Intercorrelations Between Longing Characteristics Other Than Content.....	106
4.2.4	Associations of Longing Characteristics Other Than Content With Socio-Demographic Background Characteristics and Control Variables	109
4.2.5	Summary of Findings on General Characteristics of Longing.....	110
4.3	Age-Related Differences in Longing	112
4.3.1	Age-Related Differences in the Contents of Longing	112
4.3.2	Age-Related Differences in Longing Characteristics Other Than Content.....	114
4.3.3	Summary of Findings on Age-Related Differences in Longing	116
4.4	The Regulatory Function of Longing in Adult Development.....	117
4.4.1	Predicting the Function of Longing.....	117

4.4.2	Predicting Subjective Well-Being	121
4.4.3	Summary of Findings on the Regulatory Function of Longing in Adult Development	129
4.5	Exploring Subgroups of Individuals With Different Longing Profiles	131
4.5.1	Cluster Analysis of the Six Structural Characteristics of Longing.....	132
4.5.2	Subgroup Differences in Socio-Demographic Variables, Longing Characteristics, and Subjective Well-Being.....	134
4.5.3	Subgroup Differences in Associations of Longing Characteristics With Age and Subjective Well-Being.....	137
4.5.4	Summary of Findings on Subgroups With Different Longing Profiles	138
4.6	Summary of Major Hypotheses and Main Findings.....	140
5	Discussion.....	143
5.1	Psychometric Quality of the Longing Questionnaire.....	143
5.1.1	Comments on the Strategy of Scale Optimization	144
5.1.2	Factor Structure.....	145
5.1.3	Applicability to Different Samples and Measurement Occasions.....	146
5.1.4	Reliability	148
5.2	The General Nature of Longing.....	149
5.2.1	The Structure of Longing Can Be Described in Terms of Six Characteristics and Their Organization into Two Higher-Order Factors: Intensity/Scope and Utopia/Ambivalence.....	149
5.2.2	Contents of Longing: Predominance of Physical Well-Being, Social, and Identity Themes	152
5.2.3	Subgroups With Mild, Melancholic-Utopian, and Visionary Longing Profiles: Differences in Level/ Quantity/ Quality?	154
5.3	The Nature of Longing Across Adulthood.....	157
5.3.1	The Structural Elaboration and Salience of Longing Are Largely Stable Across Adulthood	157
5.3.2	Differences in Longing Contents Across Adulthood: From Self and Work to Health, Family, and Political Themes	159
5.3.3	Multidirectionality of Longing Control Across Adulthood	162
5.3.4	Differences in Functions of Longing Across Adulthood: Partly Specific to Longing Subgroups.....	163
5.4	The Regulatory Function of Longing in Adult Development: An Unresolved Paradox	164
5.4.1	Longing Gives Direction for Development and Helps Manage Nonrealizability.....	165
5.4.2	Longing Is Negatively Associated With Subjective Well-Being.....	167

5.5	Limitations.....	176
5.6	Directions for Future Research.....	177
5.7	Conclusion.....	181
6	References.....	183
7	Appendix.....	195
7.1	Appendix A: Overview of Prior Theoretical Writings and Empirical Studies on Longing.....	195
7.1.1	Theoretical Writings.....	195
7.1.2	Empirical Studies.....	196
7.2	Appendix B: Description of Pilot Studies.....	198
7.2.1	Pilot Study 1.....	198
7.2.2	Pilot Study 2.....	200
7.2.3	Pilot Study 3.....	202
7.3	Appendix C: Instructions Used in the Longing Generation Phase.....	204
7.3.1	Definition of Longing Given to Study Participants.....	204
7.3.2	Guided Mental Journey Through Life.....	205
7.4	Appendix D: Item Characteristics of the Longing Questionnaire.....	210
7.5	Appendix E: Intercorrelations Between Items of the Longing Questionnaire.....	214
7.6	Appendix F: Descriptive Statistics and Intercorrelations of Central Variables in the Study.....	218
7.7	Appendix G: Items of Newly Developed Scale for General Emotion Regulation.....	223
7.8	Appendix H: Control Analyses for the Prediction of the Two Functions of Longing and Subjective Well-Being.....	224
7.9	Appendix I: Detailed Results Regarding the Three Subgroups With Different Longing Profiles.....	226
	List of Figures.....	228
	List of Tables.....	229
	List of Tables in Appendix.....	231

Acknowledgements

This dissertation was conducted at the Center for Lifespan Psychology at the Max Planck Institute for Human Development. It was embedded in the Graduate Program “Neuropsychiatry and Psychology of Aging” funded by the Deutsche Forschungsgemeinschaft, which also financed me through a pre-doctoral stipend. Both provided excellent institutional frameworks.

I would like to express special gratitude to both of my mentors, Prof. Paul B. Baltes and Prof. Alexandra M. Freund, for their continuous engagement and highly professional advice. Paul B. Baltes has stimulated me to engage in the challenge of exploring a new, complex psychological concept, and he has supported me in this endeavor throughout. I have profited a lot from his broad knowledge and insight into psychological phenomena. Alexandra M. Freund provided skillful advice and support in every phase of this dissertation. She was always encouraging, reliable, and generous with her time to discuss ideas and results of the study. I am also grateful to Prof. Ralf Schwarzer, Prof. Bettina Hannover, and Dr. Nina Knoll for their willingness to participate in the dissertation committee.

This dissertation was much improved through discussions with colleagues and visiting scholars, especially Dr. Michaela Riediger, Prof. Jacqui Smith, Prof. Ute Kunzmann, Dr. Florian Schmiedek, and Prof. Fredda Blanchard-Fields. Invaluable support also came from my fellow graduate students, particularly Natalie C. Ebner, Denis Gerstorf, Sabine Schäfer, Antje Stange, Christina Röcke, and Yvonne Brehmer. We shared the good and bad times of the long dissertation process and many of them have become friends.

Dulce Erdt, Sabine Mayser, Antje Rauers, Poldi Kuhl, Ulrike Altmann, Cosima Dorsemagen, Marscha Cassel, and Dorota Uzdawinis assisted in the study preparation, participant recruitment, and data collection and entry. They were a wonderful team. Dipl.-Psych. Jaap Denissen and Dipl.-Psych. Sarah Teige devoted much of their time for reviewing this dissertation and gave valuable comments and suggestions. Amy Michèle helped with questions of English style and grammar.

I would also like to thank my family and friends outside of the institute, particularly Simone, for providing steady emotional support and precious distraction whenever I needed it. And Boris who made me experience firsthand the subject of my study – the (bitter)sweet feeling of longing.
