
Table of Contents

Introduction.....	4
Eukaryotic replicators	5
Eukaryotic initiators	8
DNA binding by ORC.....	8
Mechanism of origin specification.....	11
The pre-Replicative complex assembly	13
Cdc6/Cdc18.....	16
Cdt1 and Geminin	17
Minichromosome maintenance (MCM) protein.....	18
Role of ORC in DNA replication: Existing Models.....	20
Single Chain Tetracycline Transregulators.....	20
Aim of the study.....	23
Material	24
Cell lines.....	24
Bacterial strains.....	24
Cell culture reagents.....	24
Other Lab reagents	25
Radiochemical.....	25
Enzymes.....	25
Antibodies.....	25
Kits*	26
Plasmids.....	26
Oligos	28
Media and Buffers	29
Material for in vitro DNA Binding assay	32
Methods	34
Cell Culture.....	34
Human cell line transfection method	34
Generating stable cell lines	35
Flow cytometry	36
Transfection of Sf9 cells with bacmid for baculoviruses preparation	37
Recombinant DNA techniques	38
Conventional DNA preparation protocols	38
Elution of DNA from agarose gel pieces.....	38
Biochemical methods of protein purification	39
Cell lysis and nuclear salt extraction method.....	39
SDS-gel electrophoresis and Immunoblotting	39
Polyacrylamide Gel Electrophoresis (PAGE).....	39

Transfer of proteins to PVDF membranes	40
Immunoblotting	40
Chemiluminescence	41
Immunoprecipitation (IP)	41
HA-affinity purification of recombinant protein complex.....	42
TCA precipitation of protein	42
In vivo DNA binding assay.....	43
Electrophoretic mobility shift Assay	43
Short term plasmid Replication assay	44
Southern Hybridization	44
Biotin-streptavidin coupling.....	45
Biotin DNA- Protein interaction.....	45
Purification of recombinant ORC using Talon beads.....	45
Results.....	47
Part I: Engineering a sequence specific Origin recognition complex	47
Cloning and Expression of Orc fusions for mammalian cells.....	48
Constitutively expressing Orc fusions.....	48
Inducible expression of Orc1 fusions.....	51
Sequence specific DNA binding by Orc fusions	53
Stable cell lines expressing Orc fusion.....	58
ORC targeted plasmid replication.....	63
Part II: DNA binding analysis of purified engineered ORC	69
Baculovirus mediated expression of Orc fusion.....	69
In vitro complex formation by Orc fusions.....	70
In vitro DNA binding analysis of Orc fusions.....	71
Discussion.....	75
Part I – Engineering a sequence specific DNA binding human ORC	76
Expression of Orc fusions in mammalian cells	77
Sequence specific DNA binding by Orc fusions	78
Stable expression of Orc fusions by Sorting-subcloning.....	80
Target DNA dependent replication of the plasmid	82
Part II DNA binding analysis of purified Engineered ORC.....	86
<i>In vitro</i> complex formation	86
Purified ORC binding with tetO.....	86
Future perspectives.....	89
Summary	91
Zusammenfassung	92
References	93
Acknowledgements	104

Appendix	106
Curriculum Vitae	111
Eidesstattliche Erklärung.....	113
