# Contents

<b>1</b>	<b>INTRODUCTION.....</b>	<b>1</b>
1.1	Skeleton of vertebrates.....	1
1.2	Endochondral ossification.....	2
1.3	Structure of developing cartilage.....	4
1.4	Different signaling pathways regulating bone development.....	5
1.4.1	Human skeletal diseases .....	5
1.4.2	Ihh/Pthlh pathway directs endochondral ossification.....	7
1.4.3	BMP family.....	8
1.4.4	BMPs and Ihh may interact to regulate chondrocyte maturation.....	9
1.4.5	FGF signaling controls bone development.....	10
1.5	The aim of the study.....	11
<b>2</b>	<b>MATERIALS AND METHODS.....</b>	<b>13</b>
2.1	Materials.....	13
2.1.1	Bacterial media .....	15
2.1.2	Limb-culture media .....	15
2.1.3	Reagents and buffers for <i>in situ</i> hybridization .....	16
2.1.4	Buffer for mice genotyping .....	17
2.1.5	Reagents and buffers for protein purification.....	17
2.1.6	Kits.....	19
2.1.7	Proteins .....	19
2.1.8	Table 1. Protein names and their synonyms .....	20
2.1.9	Table 2. Chicken and mouse DNA probes for <i>in situ</i> transcription.....	21
2.1.10	Cell lines .....	22
2.1.11	Chicken and mouse lines.....	22
2.1.12	Bacterial strain.....	22
2.2	Methods.....	23

2.2.1	Genomic DNA preparation from mouse tail .....	23
2.2.2	Genotyping of mice.....	23
2.2.3	Limb culture .....	24
2.2.4	Harvesting and dehydration of limb tissue.....	25
2.2.5	BrdU labeling of limb explants .....	25
2.2.6	Silanization of slides .....	25
2.2.7	Preparation of DNA template for <i>in vitro</i> transcription.....	25
2.2.8	Labeling of antisense riboprobes .....	26
2.2.9	<i>In situ</i> hybridization .....	26
2.2.10	Washing of slides and dipping in photoemulsion.....	27
2.2.11	Production and purification of Noggin protein .....	27
2.2.12	Dot-blot hybridization for Noggin protein.....	28
<b>3</b>	<b>RESULTS .....</b>	<b>29</b>
<b>3.1</b>	<b>Limb culture system.....</b>	<b>29</b>
3.1.1	Concentration- and time-courses in the limb culture system .....	29
<b>3.2</b>	<b>Ihh/Pthlh pathway.....</b>	<b>32</b>
3.2.1	Ihh overexpression results in delayed chondrocyte differentiation.....	32
3.2.2	Modulation of Ihh signaling by Pthlh or cyclopamine in a limb culture .....	33
<b>3.3</b>	<b>Interaction of BMP signaling and the Ihh/Pthlh pathway.....</b>	<b>34</b>
3.3.1	BMP signaling regulates chondrocyte differentiation and proliferation.....	34
3.3.2	<i>Bmp</i> expression is upregulated in <i>Ihh</i> -overexpressing mice.....	36
3.3.3	BMPs are not mediators of Ihh signaling in regulating hypertrophic differentiation.....	36
3.3.4	<i>Pthlh</i> expression is not regulated by BMP signaling.....	38
3.3.5	BMPs and Ihh interact similarly in chick and in mouse .....	39
3.3.6	BMPs induces chondrocyte proliferation independent of Ihh.....	40
3.3.7	BMP signaling negatively regulates terminal hypertrophic differentiation.....	41
<b>3.4</b>	<b>Interaction of FGF signaling with the Ihh/Pthlh pathway.....</b>	<b>43</b>
3.4.1	FGF signaling regulates the chondrocyte differentiation and proliferation .....	43
3.4.2	FGFs advance hypertrophic differentiation by downregulating <i>Ihh</i> expression.....	45
3.4.3	FGF signaling regulates terminal hypertrophic differentiation independent of the Ihh/Pthlh system.....	47
3.4.4	FGF signaling reduces chondrocyte proliferation independent of Ihh/Pthlh.....	48

---

<b>3.5</b>	<b>Interaction of FGF and BMP signaling.....</b>	<b>49</b>
3.5.1	FGF signaling antagonizes BMP signal .....	49
3.5.2	BMPs rescue FGF-induced defects in achondroplasia mice.....	51
3.5.3	BMP and FGF signaling reciprocally regulate their expression.....	52
<b>4</b>	<b>DISCUSSION .....</b>	<b>54</b>
<b>4.1</b>	<b>Analyzing of signaling systems using the limb culture system.....</b>	<b>54</b>
<b>4.2</b>	<b>Interaction of BMP signaling and the Ihh/Pthlh pathway.....</b>	<b>55</b>
4.2.1	BMPs do not act as secondary signals of Ihh in regulating the onset of hypertrophic differentiation .....	55
4.2.2	BMP signaling regulates several aspects of chondrocyte development.....	57
4.2.3	The <i>Bmp</i> gene family .....	58
4.2.4	Interaction of BMP signaling with the Ihh/Pthlh pathway.....	59
<b>4.3</b>	<b>Interaction of FGF and Ihh/Pthlh signaling.....</b>	<b>61</b>
4.3.1	FGF signaling regulates bone development.....	61
4.3.2	FGF signaling accelerates hypertrophic differentiation.....	62
4.3.3	FGF and BMP signaling act as antagonists during cartilage development.....	64
4.3.4	BMP signaling rescues defects in achondroplasia mice.....	65
<b>4.4</b>	<b>Conclusions .....</b>	<b>65</b>
<b>5</b>	<b>REFERENCES .....</b>	<b>67</b>
