1	Introduction	1
1.1	The Integer Quantum Hall Effect	1
1.2	The Fractional Quantum Hall Effect	2
1.3	High Landau Levels	9
1.4	This Thesis	11
2	Microwave-Induced Zero Resistance States	15
2.1	Zero Resistance States and Microwave-Induced Resistance Oscillations	15
2.2	Theoretical Explanation of ZRS	17
2.2.1	Instability of the Zero-Current State	18
2.2.2	Microscopic Mechanisms leading to Absolute Negative Conductivity	20
	Displacement Mechanism (DP)	21
	Distribution Function Mechanism (DF)	23
3	Classical Model for a Microwave-Irradiated 2DEG in the Presence of Bichromatic Irradiation	27
3.1	Monochromatic Irradiation	28
3.2	Bichromatic Irradiation	31
3.2.1	Weak Detuning	33
	Calculation of the Diagonal Conductivity	33
	Numerical Results: Multistability	35
	Stability of Different Branches	39
3.2.2	Strong Detuning	40
	Parametric Instability at $(\omega_1 + \omega_2) \simeq 2\omega_c$	41
	Parametric Instability at $ \omega_1 - \omega_2 \simeq 2\omega_c$	42
	Saturation of Parametric Resonance	43
	Implications for dc Transport	44
3.3	Bichromatic Irradiation and Absolute Negative Conductivity	45
3.4	Discussion	46
4	Microwave Photoconductivity due to Intra-Landau-Level Transitions	49
4.1	Experiment	50
4.2	Model	51
4.2.1	Two-Dimensional Electron Gas in a Modulation Potential	52
4.2.2	Electrons in High Landau Levels	53
4.2.3	Electronic States in the Absence of a Modulation Potential	54

4.2.4	Spectrum and Matrix Elements in the Presence of the Modulation Potential	55
4.2.5	Density of States in the Modulation Potential	57
4.2.6	Regimes	59
4.3	Mechanisms	60
4.3.1	General Expression for the Current	60
4.3.2	Kinetic Equation	61
4.3.3	T -Matrix	62
4.3.4	Intra-LL-Transition Matrix Elements	63
4.3.5	Transport and Single-Particle Time	65
4.4	Dark Current	66
4.4.1	Longitudinal Dark Current	66
4.4.2	Transverse Dark Current	67
4.5	Photocurrent	68
4.5.1	Longitudinal Photocurrent	70
	Distribution Function Mechanism	70
	Displacement Mechanism	74
4.5.2	Transverse Photocurrent	76
	Distribution Function Mechanism	76
	Displacement Mechanism	77
4.6	Comparison with Experiment	77
4.7	Polarization Dependence	79
4.8	Discussion	80
5	In-Plane Magnetic Field	83
5.1	Theory	84
5.1.1	Without Spin Splitting	86
5.1.2	With Spin Splitting	88
5.2	Results	92
5.2.1	Oscillatory Photoconductivity	92
5.2.2	Limiting Cases	94
5.3	Discussion	94
6	Drag in Double-Layer Systems	97
6.1	Conventions	98
6.2	Coulomb Drag	100
6.3	Phonon Drag	102
6.4	Linear Response Theory of Drag	104
6.4.1	Drag Conductivity	104
6.4.2	Triangle Vertex	104
6.4.3	Triangle Vertex in the Low Temperature Limit	105
7	Phonon Drag in High Landau Levels	109
7.1	Linear Response Theory of Phonon Drag: Triangle Vertex and Polarization Function	109
7.1.1	Relevant Momentum Range and Regime of Interest	109
7.1.2	Triangle Vertex: Dominant Contribution $\Gamma^{(q/k_F)}$	110

7.1.3	The Polarization Function in the Ballistic Regime	112
	Real Part of the Polarization Function	113
	Imaginary Part of the Polarization Function	114
	Connection between Triangle Vertex and Polarization Function	114
7.1.4	Triangle Vertex: Additional Contributions	115
	The Contribution $\Gamma^{(1/qR_c)}$	115
	The Contribution $\Gamma^{(\Delta/\omega_c)}$	116
7.2	Interaction of 2D Electrons with Bulk Phonons in the Bilayer System	117
7.2.1	Model	117
7.2.2	Phonon-Mediated Electron-Electron Interaction	120
7.2.3	Anisotropy Factors	121
7.2.4	Phonon-Mediated Interlayer Interaction	123
7.3	Analytical Results	124
7.3.1	Unscreened Interlayer Interaction	125
7.3.2	Screened Interlayer Interaction	125
7.3.3	Phonon Drag Conductivity	128
7.4	Numerical Results	131
7.4.1	Finite Phonon Mean Free Path	133
7.4.2	Temperature Dependence	134
7.4.3	Dependence on Landau Level Broadening	136
7.4.4	Dependence on Interlayer Separation	137
7.4.5	Filling Factor Dependence: Equal Filling Factors	138
7.4.6	Filling Factor Dependence: Different Filling Factors	139
7.5	Discussion	139
8	Conclusions	141
Appendix		145
A	Drag Conductivity	145
B	Analytical Continuation of the Drag Conductivity	149
C	Analytical Continuation of the Triangle Vertex	151
D	Impurity Diagram Technique in High Landau Levels: SCBA	155
E	The Electron-Phonon Interaction in Bulk GaAs	159
E.1	Phonon Modes	160
E.2	Deformation Potential Interaction	160
	Displacement Field	160
	Solution of the Equation of Motion	162
	Creation and Annihilation Operators	162
	Deformation Potential Approximation	162
	DP Interaction Matrix Elements	163
E.3	Piezoelectric Interaction	164
	Piezoelectricity	164
	The PE Tensor of Gallium Arsenide	165
	Piezoelectric Coupling	167
	PE Interaction Matrix Elements	168
