

**Fachbereich Erziehungswissenschaften und Psychologie
der Freien Universität Berlin**

**Development and Functionality of Life Longings:
The Case of Involuntary Childlessness**

Dissertation
zur Erlangung des akademischen Grades
Doktorin der Philosophie
(Dr. phil.)

vorgelegt von
Diplom-Psychologin
Dana Kotter-Grühn

Gutachter:

Prof. Dr. Ulman Lindenberger & Prof. Dr. Fredda Blanchard-Fields
Prof. Dr. Herbert Scheithauer

Betreuer:

Prof. Dr. Paul B. Baltes, Max-Planck-Institut für Bildungsforschung, Berlin (bis 11/2006)
Prof. Dr. Ulman Lindenberger, Max-Planck-Institut für Bildungsforschung, Berlin (ab 11/2006)
Prof. Dr. Fredda Blanchard-Fields, Georgia Institute of Technology, Atlanta (ab 11/2006)

DISPUTATION: Berlin, 24. Januar 2008

TABLE OF CONTENTS

TABLE OF CONTENTS	I
LIST OF TABLES	V
LIST OF FIGURES	VII
ACKNOWLEDGEMENT	VIII
ABSTRACT	IX
ZUSAMMENFASSUNG	XI
1 INTRODUCTION	1
2 CONCEPTUAL BACKGROUND	4
2.1 Non-Psychological Approaches to Life Longings	4
2.2 Psychological Conceptualizations of Life Longings	5
2.2.1 <i>Initial Attempts to a Psychological Definition of Life Longings</i>	5
2.2.2 <i>A Developmental Psychology of Life Longings</i>	7
Definition of Life Longings	7
Contents of Life Longings	11
Salience and Controllability of Life Longings	13
Functionality of Life Longings	15
2.3 Development of Life Longings	17
2.3.1 <i>Emergence and Developmental Trajectory of Life Longings</i>	17
2.3.2 <i>Functionality of Transforming Unattainable Goals Into Life Longings in the Context of Developmental Regulation and Successful Development</i>	20
2.4 Differentiation of Life Longings From Goals	24
2.5 Sociological and Psychological Perspectives on the Wish for Children	28
2.5.1 <i>Demographical Trends for Parenthood in Germany</i>	28
2.5.2 <i>The Wish for Children</i>	29
2.5.3 <i>Voluntary and Involuntary Childlessness</i>	30
2.5.4 <i>Psychological Consequences of Involuntary Childlessness</i>	32
2.5.5 <i>Is the Wish for Children an Appropriate Subject for Studying the Transformation of Unattainable Goals Into Life Longings?</i>	36
2.5.6 <i>Summary</i>	37
2.6 The Present Study	38
2.6.1 <i>Aims and Research Questions</i>	38
2.6.2 <i>Working Models</i>	39
2.6.3 <i>Do Life Longings Develop out of Unattainable Goals?</i>	41

2.6.4	<i>Is it Beneficial for Subjective Well-Being to Continue Pursuing an Unattainable Goal at an Imaginary Level as a Life Longing?</i>	43
3	METHOD	47
3.1	Participants	47
3.1.1	<i>Sample Size and Recruitment</i>	47
3.1.2	<i>Sample Characteristics</i>	48
3.2	Procedure	53
3.3	Measures	54
3.3.1	<i>Spontaneous Listing of the Life Longing to Have Children</i>	54
3.3.2	<i>Expression of the Life Longing to Have Children</i>	55
3.3.3	<i>Expression of the Goal to Have Children</i>	57
3.3.4	<i>Variables Related to the Wish for Children</i>	58
3.3.5	<i>Well-Being</i>	60
3.3.6	<i>Self-Regulation Strategies</i>	62
3.4	Data Preparation and Analyses	63
3.4.1	<i>Data Preparation</i>	63
3.4.2	<i>Treatment of Missing Values</i>	63
3.4.3	<i>Variable Distributions and Treatment of Outliers</i>	64
3.4.4	<i>Alpha Level Adjustment and Testing of Homogeneity of Variance-Covariance Matrices</i>	64
4	RESULTS	66
4.1	Transformation of the Unattainable Goal to Have Children Into the Life Longing to Have Children	66
4.1.1	<i>Validation Check: The Wish for Children as Goal and/or Life Longing</i>	66
	Spontaneous Listing of the Life Longing to Have Children	66
	Spontaneous Listing of the Given-up Goal to Have Children	67
	Rating of the Wish for Children as a Life Longing	68
	Rating of the Wish for Children as a Goal	70
	Summary of the Validation Check	71
4.1.2	<i>Prediction of Goal and Life Longing to Have Children</i>	71
	The Predictive Effect of Intensity, Duration, and Attainability of the Wish for Children	72
	The Predictive Effect of Past, Current, and Future Intensity of the Wish for Children	74
	Prediction of the Six Structural Characteristics of Life Longings	77

4.1.3	<i>Transition From Goal to Life Longing</i>	79
4.2	The Functional Significance of Transforming the Unattainable Goal to Have Children Into a Life Longing	84
4.2.1	<i>Relationship Between Well-Being and Expression of the Goal to Have Children</i>	85
4.2.2	<i>Relationship Between Well-Being and Expression of the Life Longing to Have Children</i>	87
	The Moderating Effect of Control Over Life Longing Experience	89
	The Moderating Effect of Flexible Goal Adjustment	90
	The Moderating Effect of Disengagement From the Goal to Have Children	92
	The Moderating Effect of Reengagement in Alternative Goals	93
4.2.3	<i>Well-Being as a Function of Transition From Goal to Life Longing</i>	96
4.3	Summary of Findings in Relation to Hypotheses	97
5	DISCUSSION	100
5.1	The Wish for Children is Well-Suited for the Investigation of the Development and Functionality of Life Longings	100
5.2	Life Longings Can Develop Out of Unattainable Goals	102
5.2.1	<i>Different Variables Predict Goal- and Life Longing Expression</i>	102
	The Predictive Effect of Duration and Intensity of the Wish for Children	102
	The Predictive Effect of Attainability of the Wish for Children	103
	Prediction of the Structural Characteristics of Life Longings	105
5.2.2	<i>Stages of the Transformation Process From Goal to Life Longing</i>	106
	Representation of Stages of the Transformation Process by Transition Groups	106
	Characterization of the Transition Groups and Conclusions for the Transformation Process	107
	Open Questions Concerning the Developmental Trajectory of Life Longings	110
5.3	Conditions Under Which the Transformation of Unattainable Goals Into Life Longings is Beneficial	113
5.3.1	<i>Goal Expression is Negatively Related to Well-Being if the Goal is Unattainable</i>	113
5.3.2	<i>Life Longing Expression is Negatively Related to Well-Being</i>	115
5.3.3	<i>The Application of Self-Regulatory Strategies Moderates the Relationship Between Life Longings and Well-Being</i>	118

The Moderating Effect of Control Over the Experience of Life Longing	119
The Moderating Effects of Accommodative Coping, Goal Disengagement, and Goal Reengagement	121
5.4 General Implications of the Findings	123
5.5 Limitations of the Present Study	125
5.5.1 <i>Limitations Concerning the Stage Approach and Cross-Sectional Study Design</i>	125
5.5.2 <i>Limitations Concerning the Sample</i>	127
5.5.3 <i>Limitations Concerning the Assessment</i>	129
5.6 Directions for Future Research	130
5.6.1 <i>Process Analysis With Longitudinal Data</i>	131
5.6.2 <i>Examination of Couples and Specific Groups of Persons</i>	131
5.6.3 <i>The Role of Potential Covariates</i>	132
5.6.4 <i>Investigations Beyond the Specific Life Longing to Have Children</i>	133
5.7 Conclusion	134
6 REFERENCES	136
7 APPENDICES	151
7.1 Appendix A: Method	151
7.2 Appendix B: Results	183
CURRICULUM VITAE	187
ERKLÄRUNG	188

LIST OF TABLES

Table 1	Proportion of Involuntarily Childless Persons in East and West Germany by Age and Gender	32
Table 2	Number of Persons Responding to Different Newspaper Advertisement Texts or Other Recruitment Strategies	48
Table 3	Sociodemographic Characteristics of the Total Sample and by Age Group	49
Table 4	Self-Rated Health, Cognitive Functioning, and Current Mood for the Total Sample and by Age Group	51
Table 5	Sample Items and Descriptives for Each Scale of the Life Longing Questionnaire	56
Table 6	Expression of Life Longing to Have Children by Child-Wish Status	69
Table 7	Correlations Between Expression of Life Longing to Have Children, Expression of Goal to Have Children, Child-Wish-Related Variables, and Age	72
Table 8	Change in Model Fit When Setting to Be Equal Paths of Intensity, Duration, Subjective Attainability, or Objective Attainability of the Wish for Children	74
Table 9	Change in Model Fit When Setting to Be Equal Paths of Past Intensity, Current Intensity, or Future Intensity of the Wish for Children	76
Table 10	Regression Analyses Predicting the Six Structural Characteristics of Life Longing With Current Intensity, Duration, Subjective, and Objective Attainability of the Wish for Children	78
Table 11	Regression Analyses Predicting the Six Structural Characteristics of Life Longing With Past, Current, and Future Intensity of the Wish for Children	78
Table 12	Number and Age of Participants as a Function of Goal- and Life Longing Expression	80
Table 13	Hierarchical Regression Analyses Predicting Well-Being With Goal Expression: Moderator Effect of Subjective Attainability of the Wish for Children	86
Table 14	Correlations Between Indicators of Well-Being and Life Longing	87
Table 15	Correlations Between Indicators of Well-Being and Self-Regulatory Strategies	88
Table 16	Hierarchical Regression Analyses Predicting Well-Being With Life Longing Expression: Moderator Effect of Control Over Experience of Life Longing to Have Children	89
Table 17	Hierarchical Regression Analyses Predicting Well-Being With Life Longing Expression: Moderator Effect of Flexible Goal Adjustment	91
Table 18	Hierarchical Regression Analyses Predicting Well-Being With Life Longing Expression: Moderator Effect of Disengagement From the Goal to Have Children	92

Table 19	Hierarchical Regression Analyses Predicting Well-Being With Life Longing Expression: Moderator Effect of Reengagement in Alternative Goals	94
Table 20	Summary of Findings	97

LIST OF FIGURES

Figure 1	The six structural criteria of <i>Sehnsucht</i> (life longings)	9
Figure 2	Potential reactions to the confrontation with blocked goals and their potential outcomes	22
Figure 3	First working model of the present study	40
Figure 4	Second working model of the present study	41
Figure 5	Distribution of women on groups according to their current child-wish status	52
Figure 6	Six-factorial structure of expression of life longing to have children	57
Figure 7	Path model for the prediction of goal and life longing expression by current intensity, duration, subjective attainability, and objective attainability of the wish for children	73
Figure 8	Path model for prediction of goal and life longing expression by current intensity, past intensity, and future intensity of the wish for children	75
Figure 9	Expression of current intensity, duration, subjective attainability, and objective attainability of the wish for children by transition group	83
Figure 10	The relationship between expression of the goal to have children and psychological well-being is moderated by subjective attainability of the wish for children	86
Figure 11	The relationship between expression of the life longing to have children and happiness is moderated by control over the experience of the life longing to have children	90
Figure 12	The relationship between expression of the life longing to have children and happiness is moderated by flexible goal adjustment	91
Figure 13	The relationship between expression of the life longing to have children and psychological well-being is moderated by disengagement from the goal to have children	93
Figure 14	The relationship between expression of the life longing to have children and psychological well-being is moderated by reengagement in alternative goals	95
Figure 15	Psychological well-being, depressivity, and happiness by transition group	97
