

List of Tables

1.1	Some selected physical data on gold and oxygen	5
2.1	Different electrodes of the second kind along with their cell reaction and cell potential for selected conditions.	11
3.1	Phase composition analysis using EXAFS.	55
3.2	Results of the full EXAFS analysis of Au ₂ O ₃	58
3.3	Theoretical fitting standards	59
3.4	Results of the full EXAFS analysis of electrochemically grown Au ₂ O ₃	62
3.5	Results of the phase composition analysis with FEFFIT	67
3.6	XPS peak parameters	81
3.7	Oxide film thicknesses evaluated from ARXPS	91
4.1	Summary of TPD data obtained in this thesis. All values listed here have been determined with the heating rate variation technique, except the value for the γ_1 peak.	98
4.2	Summary of TPD data provided in the literature.	99
4.3	Summary of XPS data provided in the literature.	101
