Contents

Introduction 4

1 Concepts of Linear Elasticity 7
- 1.1 Kinematics and Strain . . . 7
- 1.2 Stress and the Equilibrium Conditions . . . 9
- 1.3 Constitutive Equations . . . 12
- 1.4 The Equations of Linear Elasticity . . . 15
- 1.5 Hyperelastic Materials . . . 16

2 Signorini's Problem 20
- 2.1 Linearized Contact . . . 20
- 2.2 Strong Formulation . . . 22
- 2.3 Weak formulation . . . 24
- 2.4 Discretization and Error Estimates . . . 29

3 Monotone Multigrid Methods 31
- 3.1 Minimization of Energy . . . 33
- 3.2 Truncated Coarse Grid Functions . . . 40
- 3.3 Monotone Restrictions . . . 44
- 3.4 Algebraic Formulation . . . 47

4 Software Concept and Implementation 51
- 4.1 The Obstacle Problem Class . . . 53
- 4.2 Basic User Interface . . . 58
- 4.3 Abstract Nonlinear Gauß–Seidel . . . 60
- 4.4 Modified Restriction . . . 61
- 4.5 Fast Modification of the Coarse Grid Matrices . . . 61
- 4.6 An Application of the Concept: Algebraic Monotone Multigrid . . . 64

5 Numerical Results 67
- 5.1 Hertzian Contact Problem . . . 68
- 5.2 An Unphysical Example . . . 71
- 5.3 Elastic Cylinder and Two Rigid Rods . . . 73
- 5.4 Comparison with Standard Multigrid . . . 77
- 5.5 Influence of the Start Iterate . . . 79
- 5.6 Truncated Nodal Basis versus Standard Nodal Basis . . . 82
- 5.7 Performance of the Parallel Monotone Multigrid Method . . . 85

6 Frictional Contact Problems 88
- 6.1 Weak Formulation . . . 89
- 6.2 Fixed Point Iteration . . . 91
- 6.3 Numerical Results . . . 100

7 Elastic Contact **105**
7.1 Nonlinear Dirichlet–Neumann Algorithm 109
7.2 Numerical results 110
7.3 Elastic Contact with Coulomb friction 113
7.4 Numerical Results with Coulomb friction 115

List of Figures **118**

List of Tables **119**
