## Table of Content

1	Introduction	1
2	Literature Review	4
2.1	Qualitative Evaluation of Ileal Digesta	4
2.1.1	Chemical parameters	4
2.1.1.1	Lactic acid (LA)	4
2.1.1.2	Volatile Fatty Acids	8
2.1.1.3	Ammonia (NH <sub>3</sub> )	13
2.1.1.4	Intestinal amines	14
2.1.1.5	D-Alanine as Bacterial Marker	16
2.1.2	Ileal Microflora	18
2.1.2.1	Classical Microbiological Approaches	18
2.1.2.2	Molecular Microbiological Approaches	23
2.1.2.2.1	DGGE and Sequence Analysis	23
2.1.2.2.2	Fluorescence in situ Hybridisation (FISH)	28
2.2	Quantitative Evaluation of Ileal Digesta	31
2.2.1	Nitrogen at Ileal Level	31
2.2.2	Apparent Ileal Digestibility (AID)	31
2.2.3	Endogenous Nitrogen and True & Real Ileal Digestibility	33
2.2.4	Experimental Techniques for Evaluation of Ileal Nitrogen	38
3	Material and Methods	40
3.1	Slaughter trial	40
3.1.1	Animals and feeding	40
3.1.2	Experimental Design	44
3.1.3	Laboratory analysis	45
3.1.3.1	Chemical parameters	45
3.1.3.2	Classical Microbiology	46
3.1.3.3	Molecular Microbiology	46
3.1.3.3.1	Sample Preparation	46
3.1.3.3.2	DNA Isolation	47
3.1.3.3.3	Polymerase Chain Reaction (PCR)	47
3.1.3.3.4	Denaturing Gradient Gel Electrophoresis (DGGE)	48
3.1.3.3.5	Cloning	49
3.1.3.3.6	Sequence Analysis	50
3.1.3.3.7	Fluorescence in situ Hybridisation (FISH)	50
3.1.4	Statistical Analysis	51
3.2	Balance Trial Postweaning	53
3.2.1	Animals and Feeding	53
3.2.2	Preparation of <sup>15</sup> N-labelled Yeast	53
3.2.3	Experimental Design	54
3.2.4	Ileorectal Anastomosis (IRA)	55
3.2.4.1	Instrument preparation	55
3.2.4.2	Pre-operative Preparation	55
3.2.4.3	Surgery	56
3.2.4.4	Post-operative care	58
3.2.5	Laboratory Analysis	58
3.2.6	Statistical Analysis	59
3.3	Balance Trial Prewearing	59

3.3.1	Animals and feeding .....	59
3.3.2	Experimental Design.....	61
3.3.3	Cannulation Procedure .....	64
3.3.3.1	Cannulas & Instrument Preparation .....	64
3.3.3.2	Pre-operative preparation.....	64
3.3.3.3	Surgery.....	65
3.3.3.4	Post-operative care .....	65
3.3.4	Laboratory Analysis .....	66
3.3.5	Statistical Analysis .....	66
4	Results .....	67
4.1	Slaughter trial .....	67
4.1.1	Animal parameters.....	67
4.1.2	Chemical Parameters of Ileal Digesta .....	69
4.1.2.1	pH and DM .....	69
4.1.2.2	Ammonia .....	69
4.1.2.3	Volatile Fatty Acids (VFA).....	69
4.1.2.4	Lactic Acid (LA) .....	70
4.1.2.5	Bacterial Nitrogen .....	70
4.1.2.6	Amines.....	71
4.1.3	Classical Microbiology .....	72
4.1.4	Molecular Microbiology .....	74
4.1.4.1	Denaturing Gradient Gel Electrophoresis (DGGE).....	74
4.1.4.2	Sequence analysis .....	80
4.1.4.3	Fluorescence in situ Hybridisation (FISH) .....	80
4.2	Balance trial postweaning .....	84
4.3	Balance trial preweaning .....	90
4.4	Comparison of balance trials pre- and postweaning .....	91
5	Discussion .....	95
5.1	Slaughter Trial.....	95
5.1.1	Animal data.....	95
5.1.2	Chemical parameters.....	95
5.1.2.1	pH and DM .....	95
5.1.2.2	Ammonia .....	96
5.1.2.3	Amines.....	97
5.1.2.4	Volatile Fatty Acids (VFA).....	98
5.1.2.5	Lactic Acid (LA) .....	99
5.1.3	Classical Microbiology .....	99
5.1.3.1	<i>Lactobacillus spp.</i> .....	99
5.1.3.2	Enterobacteriaceae, Enterococcus spp. and yeast .....	100
5.1.4	Molecular Microbiology .....	101
5.1.4.1	Denaturing Gradient Gel Electrophoresis (DGGE).....	101
5.1.4.2	Sequence Analysis .....	102
5.1.4.3	Fluorescence in situ hybridisation (FISH).....	103
5.1.5	D-alanine as Bacterial Marker .....	104
5.1.6	Summary & Conclusion .....	105
5.2	Balance trial pre- and postweaning.....	107
5.2.1	Ileal flow of Dry Matter and Nitrogen .....	107
5.2.2	Apparent Ileal Digestibility of Nitrogen and Amino Acids.....	108
5.2.3	Endogenous Nitrogen .....	108
5.2.4	Real Ileal Digestibility of Nitrogen .....	109
5.2.5	Bacterial Nitrogen .....	110

5.2.6	Constitution of Total Ileal Nitrogen.....	111
5.2.7	Summary & Conclusion .....	112
6	Summary	113
7	Zusammenfassung	116
8	References	120
9	Appendix	135
9.1	Slaughter trial .....	135
