Index of Tables

Table 1. Lactic acid concentration in the small intestine of young pigs, differing in age and dietary treatment....6
Table 2. VFA in the small intestine of young pigs, differing in age and dietary treatment .11
Table 3. The culturable resident microflora in the small intestine of piglets (classical microbiology) 21
Table 4. The resident microflora in the small intestine of piglets as revealed by molecular microbiology 26
Table 5. Reviews on recent advances in microbiological techniques and applications....29
Table 6. Endogenous N and N digestibility at the terminal ileum of young pigs....36
Table 7. Physical composition of reference diets 41
Table 8. Physical composition of home-produced diets 42
Table 9. Chemical composition of starter diets....43
Table 10. Animals and dietary treatment....44
Table 11. List of oligonucleotide primers used in this study 48
Table 12. List of oligonucleotide probes used for FISH in this study....51
Table 13. Chemical composition of milk replacer PiggiMilk....60
Table 14. Individual short-chain fatty acids in ileal digesta of piglets pre- and postweaning 70
Table 15. Biogenic amines in ileal digesta pre-and postweaning (mg/kg ADM), over all days....72
Table 16. Microbial counts in ileal digesta pre-and postweaning (log cfu/g) 72
Table 17. Pearson Correlation Coefficient r, calculated between cultivated microorganisms of ileal digesta....73
Table 18. Pearson Correlation Coefficients r between amines (mg/kg ADM) and cultivated microorganisms (log cfu/g) 73
Table 19. Ileal flow of DM, total and endogenous nitrogen (g/d) in piglets fed four different diets....86
Table 20. Constitution of total ileal N (%) in weaning piglets fed four different starters....89
Table 21. Apparent ileal digestibility of amino acids in pigs pre- and postweaning....92
Table 22. Endogenous and bacterial nitrogen in ileal content of piglets pre- and postweaning 93
