

## Acknowledgments

This work was planned, performed and completed in the laboratory of Experimental Endocrinology of St. Hedwig Hospital in Berlin. I would like to express my sincere gratitude to the following people for their invaluable help:

... Prof. Dr. Karl-Michael Derwahl, ‘Doctorvater’ and supervisor of this research project. It is thanks to his drive, his ingenious ideas and his constant motivation that this work came to be. Without his encouragement and support I would never have managed to overcome all the difficulties of being a foreigner working and living in Germany and for this I am truly indebted to him.

... Diana, Tini and Theodore, for their excellent technical support, for showing me all the lab methods and protocols, for always being there for me and, most importantly, for the great time we had together!

... Dai and Kathrin, for their great support, kindness and friendly cooperation. I wish them every success with their own projects and all the best in life!

... Prof. Köhrle and Dr Schmutzler in Charité for their expert advice and discussions, and for the support with radioiodide uptake measurements.

... Katharina and Toralf in Charité for their helpful discussions and suggestions, and for the excellent technical support with flow cytometry and FACS analysis.

... Dr. Geipel of the Endocrine surgery department for his invaluable cooperation for providing suitable thyroid tissue samples.

... Prof. Dr Schaefer (Berlin) for the gift of the HeLa cell line.

... My father, my husband, and my families, for they are my life.

## **Erklärung**

„Ich, Ling Lan, erkläre, dass ich die vorgelegte Dissertationsschrift mit dem Thema: ‚Adult stem cells derived from human goiters form spheres in response to intense growth stimulation and differentiate TSH-dependently into thyroid cells‘ selbst verfasst und keine anderen als die angegebenen Quellen und Hilfsmittel benutzt, ohne die (unzulässige) Hilfe Dritter verfasst und auch in Teilen keine Kopien anderer Arbeiten dargestellt habe.“

Datum 18-Feb-2008
