

Functional Characterization of *Drosophila melanogaster*
Olfactory Receptor Neurons

Dissertation zur Erlangung des akademischen Grades des Doktors der
Naturwissenschaften (Dr. rer. nat.)

eingereicht im Fachbereich Biologie, Chemie, Pharmazie
der
Freien Universität Berlin

vorgelegt von

Daniela Pelz

aus Prüm

Oktober 2005

-
1. Gutachter: Prof. Dr. C. Giovanni Galizia
 2. Gutachter: Prof. Dr. R. Menzel

Tag der Disputation: 18.11.2005

People who contributed to this work:

Christina Roeske and Gabi Haberberger did the antennal measurements of ORNs expressing Or22a.

Christian Markl semi-automatically corrected the antennal data for movement artifacts.

Hajo Hach semi-automatically corrected about 25% of the antennal lobe measurements of ORNs expressing Or22a.

Beate Eisermann did the pharmacological measurements of ORNs expressing Or22a.

All other work was done by me.

Introduction	6
Materials and Methods	15
Flies	15
Calcium sensor	16
In Vivo preparation of flies	16
<i>Antennal lobe experiments</i>	16
<i>Antennal experiments</i>	17
Confocal pictures	18
Imaging set-up	19
<i>Antennal lobe experiments</i>	19
<i>Antennal experiments</i>	19
Odorant application	20
<i>General parameters</i>	20
<i>Or22a Experiments</i>	21
<i>Or47b Experiments</i>	21
Gaschromatography	21
Pharmacological experiments	23
Data analysis	23
<i>General</i>	23
<i>Or22a experiments</i>	24
<i>Or47b experiments</i>	24
Estimation of ppm	25
Superposition of 3D molecular structures of Or22a activating odors	26
Results 1	27
Activity in ORNs expressing Or22a can be imaged on the antenna and within the AL	27
The MRR is identical for the antenna and the AL	29
Dynamics of the Ca²⁺ responses show differences between antenna and AL	36
Influence of inhibitory AL network	39
Temporal response parameters depend on the chemistry of the odors	42
Which odor properties are responsible for activating Or22a?	44
Or22a odotopes	45
Results 2	51
A preliminary molecular receptive range of Or47b expressing ORNs	51
Discussion	55
Methodological aspects	55
<i>Intact animal approach</i>	55
<i>Automation of experiments</i>	56
<i>Calcium imaging – signal sources</i>	56
<i>Comparison to previously published studies</i>	57
ORNs expressing Or22a	58
<i>Comparison between antennal and AL measurements</i>	58

<i>Role of ORNs expressing Or22a in odor coding</i>	62
<i>Odotopes of odors activating Or22a</i>	63
ORNs expressing Or47b	66
<i>A preliminary molecular receptive range</i>	66
<i>'Negative responses'</i>	67
Different aspects of odor coding	69
<i>Excitatory and inhibitory input channels</i>	69
<i>Temporal coding aspects</i>	70
<i>Presynaptic inhibition of ORNs</i>	71
