

# Essays on Employment Protection

Inaugural-Dissertation zur Erlangung des akademischen Grades  
eines Doktors der Wirtschaftswissenschaft des Fachbereichs  
Wirtschaftswissenschaft der Freien Universität Berlin

vorgelegt von

Diplom-Volkswirt Sebastian Georg Kessing

aus

Bielefeld,

wohnhafte Köpenicker Straße 6a, 10997 Berlin

Berlin, den 9.12.2002

**Erstgutachter:**

**Prof. Dr. Kai A. Konrad**

**Zweitgutachter:**

**Prof. Giuseppe Bertola, Ph.D.**

**Tag der Disputation: 3. Februar 2003**

## Acknowledgements

This thesis was written during my time at the European University Institute, at the Institute of Public Finance and Social Policy of the Free University Berlin and while visiting the research Unit Market Processes and Governance at WZB. I thank Kai Konrad for his encouragement and advice and in particular for his initiative for redirecting the research focus of my work. I thank Giuseppe Bertola for his advice and for the continuing support. The present work has profited from comments of the members of the macro-labor working group at the European University Institute and of the microeconomics research workshop at the Free University Berlin. Furthermore, I benefited from many discussions with friends and colleagues, in particular, Holger Berg, Thomas Knaus, Winfried Koeniger, Daniel Krämer, Julian Messina, Beate Milbrandt, Johannes Münster, Robert Nuscheler, Chiara Strozzi and Jarkko Turunen. Helpful research assistance was carried out by Kinga Bloch and Annika Müller. Financial aid from the DAAD is gratefully acknowledged.

# Contents

<b>1</b>	<b>Introduction</b>	<b>5</b>
1.1	Overview . . . . .	5
1.2	The analysis of labor market institutions . . . . .	6
1.3	Employment protection . . . . .	7
1.4	Theoretical perspectives on employment protection . . . . .	10
1.5	Empirical evidence on employment protection . . . . .	14
1.6	Employment protection and factor shares . . . . .	15
1.7	Employment protection and product market competition . . . . .	18
1.8	Delay in joint projects . . . . .	23
<b>2</b>	<b>Factor shares and adjustment costs</b>	<b>29</b>
2.1	Introduction . . . . .	29
2.2	Non-unit elasticity of substitution . . . . .	34
2.3	Factor shares in a Markov chain model . . . . .	40
2.4	Wage fluctuations . . . . .	44
2.5	Joint fluctuations in business conditions and wages . . . . .	47
2.6	Inaction in labor demand . . . . .	49
2.7	Empirical evidence . . . . .	51
2.8	Conclusion . . . . .	58

<i>CONTENTS</i>	2
<b>3 Employment protection and product market competition</b>	<b>60</b>
3.1 Introduction . . . . .	60
3.2 The two period model . . . . .	64
3.3 The infinite horizon model . . . . .	70
3.4 Extensions . . . . .	76
3.5 Conclusion . . . . .	78
<b>4 Delay in joint projects</b>	<b>80</b>
4.1 Introduction . . . . .	80
4.2 The model . . . . .	84
4.3 The non-cooperative solution with commitment . . . . .	85
4.4 Sequential moves and asymmetry . . . . .	87
4.5 The Markov perfect equilibrium . . . . .	89
4.6 Conclusion . . . . .	92
4.7 Appendix . . . . .	94
<b>5 Zusammenfassung / Summary (in German)</b>	<b>99</b>

# List of Figures

2.1	<i>Labor Shares of the USA and the four major continental European countries</i> . . . . .	31
2.2	<i>Labor share and capital-labor ratio, USA</i> . . . . .	35
2.3	<i>Labor share and capital-labor ratio, Germany</i> . . . . .	36
2.4	<i>Labor share and capital-labor ratio, Italy</i> . . . . .	37
2.5	<i>Labor share and capital-labor ratio, France</i> . . . . .	38
2.6	<i>Labor share and capital-labor ratio, Spain</i> . . . . .	38
2.7	<i>Labor Share and Business climate, Germany</i> . . . . .	52
2.8	<i>EPL strength and activity induced labor share reactions (joint estimation)</i> . . . . .	54
2.9	<i>EPL strength and activity induced labor share reactions (single <math>x</math>-correlations)</i> . . . . .	55
2.10	<i>EPL strength and wage induced labor share reactions</i> . . . . .	57
3.1	<i>Two period contest model</i> . . . . .	66

# List of Tables

2.1	<i>EPL strength and individual country regression results . . . . .</i>	53
