The immunoglobulin superfamily-domains for cell surface recognition.
Ann. Rev. Immunol., 6 (1988), 381-405.
- Williams, J.C., A. Weijland, S. Gonfloni, A. Thompson, S.A. Courtneidge, G. Superti-Furga und R.K. Wierenga:**
The 2.35 Å crystal structure of the inactivated form of chicken Src: a dynamic molecule with multiple regulatory interactions.
J. Mol. Biol., 274 (1997), 757-775.
- Wright, J.H., P. Druce, J. Bartoe, Z. Zhao, S.H. Shen und E.G. Krebs:**
A role for the SHP-2 tyrosine phosphatase in nerve growth-induced PC12 cell differentiation.
Mol. Biol. Cell, 8 (1997), 1575-1585.
- Yaffe, M.B. und L.C. Cantley:**
Signal transduction. Grabbing phosphoproteins.
Nature, 402 (1999), 30-31.
- Yonemura, S., M. Hirao, Y. Doi, N. Takahashi, T. Kondo und S. Tsukita:**
Ezrin/radixin/moesin (ERM) proteins bind to a positively charged amino acid cluster in the juxta-membrane cytoplasmic domain of CD44, CD43, and ICAM-2.
J. Cell Biol., 140 (1998), 885-895.
- Zelus, B.D., D.R. Wessner, G.S. Dveksler und K.V. Holmes:**
Neutralization of MHV-A59 by soluble recombinant receptor glycoproteins.
Adv. Exp. Med. Biol., 440 (1998), 3-9.

Zhao, T. und P.J. Newman:

Integrin activation by regulated dimerization and oligomerization of platelet endothelial cell adhesion molecule (PECAM)-1 from within the cell.

J. Cell Biol., 152 (2001), 65-73.

Zhou, G.Q. und S. Hammarstrom:

Pregnancy-specific glycoprotein (PSG) in baboon (*Papio hamadryas*): family size, domain structure, and prediction of a functional region in primate PSGs.

Biol. Reprod., 64 (2001), 90-99.

Zhou, G.Q., Y. Zhang und S. Hammarstrom:

The carcinoembryonic antigen (CEA) gene family in non-human primates.

Gene, 264 (2001), 105-112.
