

Hiermit versichere ich, die vorliegende Arbeit selbständig angefertigt und keine anderen als die angeführten Quellen und Hilfsmittel benutzt zu haben.

Berlin, 2007

ACKNOWLEDGEMENTS

I wish to thank Prof. Dr. G. Neukum, Freie Universität Berlin, for accepting this thesis as a reviewer, for discussions, and for providing technical equipment not only at Freie Universität but also at the German Aerospace Center (DLR), where this work was initiated.

I furthermore appreciate discussions and support by Prof. Dr. R. Jaumann, German Aerospace Center and Freie Universität Berlin, and wish to thank him for accepting this thesis as a co-reviewer.

A big thank-you also goes out to colleagues at DLR, Dipl.-Geol. E. Hauber, Dipl.-Phys. M. Wählisch, Dipl.-Ing. F. Scholten, Dipl.-Geol. H. Hoffmann, Dr. T. Roatsch, and Dr. B. Giese for their indefatigable and competent support and advice regarding scientific as well as technical issues; especially to Dr. D. Reiß with whom I shared countless hours of discussions on "Life, the Universe, and Everything".

Furthermore, I would like to acknowledge the support I received from colleagues of the Planetology and Remote Sensing group at Freie Universität Berlin, especially Dr. G. Michael, Dipl.-Geol. J. Levenhagen, Dipl.-Geophys. B. Schreiner, Cand-Geol. D. Bueter, Cand-Geol. D. Rommel, and my former colleagues Dr. S. C. Werner (Geol. Surv. Norway, Trondheim) and particularly S. Preuschmann (now Max-Planck Institute for Meteorology, Hamburg).

I appreciate valuable comments and suggestions for improvements by Prof. Dr. C. Heubeck, Department of Geological Sciences, Freie Universität Berlin.

For a fruitful cooperation within the HRSC project and valuable conversations and motivating words I would like to thank Prof. Dr. P. Kronberg (Technical University of Clausthal) who initiated my work on Mars, Prof. Dr. J.-P. Muller (University College, London), Dr. S. Gupta (Imperial College, London), Prof. Dr. A. T. Baszilevsky (Vernadsky Institute, Moscow), Prof. Dr. B. A. Ivanov (Russian Institute of Dynamics of Geospheres, Moscow), Prof. Dr. J. B. Murray (Open University, London), Prof. Dr. J. W. Head (Brown University, Providence). In this context, the author also acknowledges once more the work and support by many experiment teams, support institutes, and agencies by making planetary data available to the public and supporting research. Primarily, the support of the HRSC Instrument and Experiment teams at DLR, FUB and ESA is acknowledged.

Thanks also to Dr. G. Grosse (now University of Alaska, Fairbanks), Dr. L. Schirrmeyer and cand.-geol. A. Morgenstern at the Alfred-Wegener Institute in Potsdam with whom I had the pleasure to work with and hopefully will have in the future.

Many thanks especially to B. van Aaken, M.A. (Hannover) and Dipl.-Ing. U.-P. Jagusch (Aachen) for their support as well as M. Verhey, B.A. (Bochum) and Dr. D. Bringemeier (Kuchin, Malaysia).
