Dissertationsthema

Noninvasive evaluation of right atrial function in patients with secundum type atrial septal defect and in patients with corrected tetralogy of Fallot using 2-D echocardiography and tissue Doppler imaging

Inaugural-Dissertation

Zur

Erlangung der medizinischen Doktorwürde

an der Charité-Universitätsmedizin Berlin

Vorgelegt von: Hui Wei

aus: Shanghai, V.R. China
Referent: PD. Dr. Hashim Abdul-Khaliq
Korreferent: Prof. Dr. K.-J. Bauknecht

Gedruckt mit Genehmigung der Charité – Universitätsmedizin Berlin
Campus Benjamin Franklin

Promoviert am: 17.12.2004
Contents

1 Abbreviations and Acronyms 5
2 Introduction 6
2.1 Studies of atrial function 6
2.2 Methods of evaluation of the three main atrial functions 7
2.3 Tissue Doppler imaging 8
3 Aims of the study 11
4 Patients 12
4.1 Right atrial and right ventricular function in patients before and after ASD closure (section 1) 12
4.2 Right atrial and right ventricular function in patients following corrective surgery of tetralogy of Fallot (section 2) 17
5 Methods 22
5.1 Two-dimensional echocardiography 22
5.2 Tissue Doppler imaging (TDI) 24
5.3 Magnetic resonance tomography (MRT) 26
5.4 Routine catheter examination and interventional closure of ASD with Amplatzer Septal Occluder 26
5.5 Surgical closure of ASD 27
5.6 Statistics 27
6 Results 29
6.1 ASD patients versus normal controls and comparison of the effects of catheter and surgical ASD closure on right atrial function (section 1) 29
6.1.1 Two-dimensional echocardiography
6.1.2 Tissue Doppler imaging

6.2 Right atrial pump function and its relation to right ventricular function in patients following corrective surgery of TOF (section 2)
6.2.1 Two-dimensional echocardiography
6.2.2 Tissue Doppler imaging

7 Discussion
7.1 Atrial strain rate curve derived from tissue Doppler imaging
7.2 Right atrial pump function in patients before ASD closure
7.3 Effects of surgical and catheter closure on global right atrial pump function
7.4 The value of tissue Doppler imaging on the evaluation of right atrial pump function in patients before and after surgical or catheter ASD closure
7.5 Global right atrial pump function in patients with corrected TOF
7.6 Regional right atrial performance in patients with corrected TOF
7.7 Relation between right atrial pump function and right ventricular systolic function in patients following corrective surgery of TOF

8 Conclusions
