

# Acknowledgments

It is worthy acknowledging that many interesting things are accomplished in this world with less recognition than writing a Ph.D. thesis. Though, I would like to acknowledge many people that have helped me to accomplish my educational aim. This work was entirely conducted at the Hahn- Meitner Institut of Berlin with the financial support of the German Academic Exchange Service (DAAD).

I would like to thank first and foremost Prof. Martha Lux- Steiner for the opportunity she gave me to work on the field, for accepting to supervise this work and for her inspiring foresight in this thesis, her constant help and contributive discussions and finally for the bid of a friendly and working environment.

I would also like to thank Prof William Brewer for his co- supervision and for his critical discussions during the seminars done within his group.

I am grateful to Priv.-Doz. Dr. Thomas Schedel- Niedrig for his growing interest in this thesis, for his helpful discussions and advice, and for the good atmosphere in the CCSVT group. My special thanks goes to Priv.-Doz. Dr. Sebastian Fiechter for his collaboration during the annealing of the films, Dr. Klaus Lips for his collaboration during the electron spin resonance measurements, and Dr. Marin Rusu for the constant availability throughout this work.

My appreciation goes to all the member of the CCSVT group and specially to Dr. Alex Meeder, Dr. David Fuertes Marrón, Sebastian Lehman, and Jasmin Hofstetter, to Priv.-Doz. Dr. Susanne Siebentritt for the fruitful discussions and to Dr. Niklas Papatthanasiou. Not forgotten is Dr. Kai Petter for his help during ESR measurements

I am thankful to the technical staff for their help in repairing, fixing and making equipment whenever needed. I would also like to thank all the members of the SE2 department.

Finally I am deeply indebted to my parents, brothers and sisters and Nissi Lena for their remote support, wishes and constant encouragement.

This work was supported by The German Academic Exchange Service (DAAD), while Hahn- Meitner Institut gave assistance for meeting travel costs to conferences. I am deeply indebted!!!.
