

## TABLE OF CONTENTS

<b>1. Summary</b> .....	<b>1</b>
<b>1. Zusammenfassung</b> .....	<b>3</b>
<b>2. Introduction</b> .....	<b>6</b>
<b>2.1. Life cycles and life stages</b> .....	<b>6</b>
<b>2.2. Heterochrony</b> .....	<b>7</b>
2.2.1. Examples of heterochrony .....	7
<b>2.3. The model organism <i>C. elegans</i></b> .....	<b>9</b>
<b>2.4. <i>C. elegans</i> life cycle</b> .....	<b>9</b>
2.4.1. Embryonic development .....	10
2.4.2. Post-embryonic development .....	10
<b>2.5. <i>C. elegans</i> stage-specific programs, an overview</b> .....	<b>11</b>
2.5.1. Seam cell programs .....	11
2.5.2. Gonad migration programs .....	13
<b>2.6. Chronological age versus developmental age</b> .....	<b>13</b>
2.6.1. Chronological age .....	13
2.6.2. Developmental age .....	14
<b>2.7. The heterochronic loci control developmental timing in <i>C. elegans</i></b> .....	<b>15</b>
2.7.1. The early timing circuit.....	16
2.7.1.1. <i>lin-14</i> specifies S1 to S3 programs .....	16
2.7.1.2. <i>lin-28</i> regulates the S2/S3 transition .....	18
2.7.1.3. <i>lin-4</i> translationally represses <i>lin-14</i> and <i>lin-28</i> .....	19
2.7.1.4. <i>lin-46</i> .....	20
2.7.1.5. The nuclear hormone receptor <i>daf-12</i> acts at the convergence of dauer and heterochronic pathways .....	21
2.7.2. The late timing circuit.....	23
2.7.2.1. <i>lin-42</i> , a circadian rhythm component acts at several stages in development...24	
2.7.2.2. <i>lin-41</i> specifies S4 fates by inhibiting LIN-29 and is regulated by <i>let-7</i> .....25	
2.7.2.3. <i>hbl-1</i> acts at multiple times during <i>C. elegans</i> development and is regulated by microRNAs .....	26
2.7.2.4. <i>let-7</i> regulates the transition from larval to adult stage .....	28
2.7.2.5. <i>lin-29</i> controls the switch from larval to adult development .....	30
2.7.2.6. Parallel functions in the late timer .....	31
2.7.3. The heterochronic epidermal pathway model .....	32
2.7.3.1. The early timer .....	33

---

2.7.3.2. Connection of the early to the late timer .....	34
2.7.3.3. The late timer .....	34
2.7.4. Conservation of heterochronic genes .....	34
<b>2.8. Cell autonomous versus cell non-autonomous regulation of developmental age .....</b>	<b>35</b>
<b>2.9. Regulatory mechanisms involved in the control of developmental timing</b> .....	<b>35</b>
2.9.1. Transcriptional control .....	36
2.9.2. Translational control .....	36
2.9.3. MicroRNAs and non-coding RNAs .....	36
<b>2.10. Thesis question .....</b>	<b>38</b>
<b>3. Material and Methods .....</b>	<b>40</b>
<b>3.1. Genetics .....</b>	<b>40</b>
3.1.1. Nematode Culture Conditions.....	40
3.1.2. Microscopy .....	40
3.1.3. Mutant Isolation – EMS mutagenesis .....	40
3.1.4. Outcrossing of isolated mutants .....	41
3.1.5. Allele specificity test.....	41
3.1.6. Strain constructions .....	41
3.1.6.1. Construction of <i>dre-1</i> and <i>dre-2</i> single mutants.....	41
3.1.6.2. Double mutants constructed for epistasis analysis .....	41
3.1.7. Staging of nematodes .....	45
3.1.8. Molting experiments.....	46
<b>3.2. Mapping <i>dre-1</i> and <i>dre-2</i> .....</b>	<b>46</b>
3.2.1. SNP mapping .....	46
3.2.2. Three factor mapping.....	48
3.2.3. Deletion mapping .....	48
3.2.4. SNP mapping with single recombinants.....	49
3.2.5. Microinjections .....	49
<b>3.3. Molecular biology.....</b>	<b>50</b>
3.3.1. Sequencing of candidate genes .....	50
3.3.2. Isolation of genomic DNA of <i>C. elegans</i> .....	50
3.3.3. Isolation of cosmid DNA .....	50
3.3.4. Primer.....	51
3.3.5. Cloning.....	51
3.3.6. <i>dre-1</i> cDNA clones.....	53

---

3.3.6.1. Phage stock preparation .....	53
3.3.6.2. Excision of Phagemids of Lambda Zap II-phages .....	54
3.3.7. <i>dre-1::gfp</i> constructs .....	54
3.3.8. Preparation of <i>C. elegans</i> mixed stage RNA and cDNA .....	55
3.3.9. Deletion of <i>dre-1</i> .....	55
<b>3.4. Database analyses .....</b>	<b>57</b>
<b>3.5. miRNA search.....</b>	<b>57</b>
<b>3.6. Search for <i>daf-12</i> binding sites .....</b>	<b>57</b>
<b>3.7. RNAi.....</b>	<b>57</b>
<b>3.8. Life span assays.....</b>	<b>58</b>
<b>4. Results .....</b>	<b>59</b>
<b>Part I- <i>dre-1</i> .....</b>	<b>59</b>
<b>4.1. Screen for <i>daf-12</i> redundant functions.....</b>	<b>59</b>
<b>4.2. <i>dre-1</i> influences gonadal heterochrony.....</b>	<b>60</b>
<b>4.3. <i>dre-1</i> is an allele non-specific Mig enhancer of <i>daf-12</i> .....</b>	<b>61</b>
<b>4.4. <i>dre-1</i> regulates the larval to adult switch in seam cells .....</b>	<b>61</b>
<b>4.5. Phenotypic classes .....</b>	<b>64</b>
<b>4.6. <i>dre-1</i> encodes an evolutionary conserved F-box protein.....</b>	<b>64</b>
4.6.1. Mapping <i>dre-1</i> .....	64
4.6.2. <i>dre-1</i> structure.....	65
4.6.3. <i>dre-1</i> encodes an evolutionary conserved F-box protein .....	65
4.6.4. DRE-1 orthologs .....	66
<b>4.7. <i>dre-1</i> molecular lesions .....</b>	<b>69</b>
<b>4.8. <i>dre-1</i> loss-of-function versus gain-of-function mutations .....</b>	<b>70</b>
<b>4.9. The <i>dre-1</i> 3'UTR lacks <i>let-7</i> and <i>lin-4</i> binding sites.....</b>	<b>71</b>
<b>4.10. The heterochronic gonadal circuit .....</b>	<b>71</b>
<b>4.11. Heterochronic seam cell circuit.....</b>	<b>75</b>
4.11.1. <i>dre-1</i> acts upstream of <i>lin-29</i> .....	75
4.11.2. <i>dre-1</i> acts in parallel to <i>lin-41</i> and <i>lin-42</i> .....	77
<b>4.12. <i>dre-1</i> affects molting .....</b>	<b>79</b>
<b>4.13. <i>dre-1</i> deletion results in embryonic lethality .....</b>	<b>81</b>
<b>4.14. Expression pattern.....</b>	<b>82</b>
<b>4.15. <i>dre-1::gfp</i> partially rescues the <i>dre-1</i> deletion.....</b>	<b>83</b>
<b>4.16. Aging experiments .....</b>	<b>83</b>

4.17. DRE-1 complex.....	84
<b>Part II – <i>dre-2</i> .....</b>	<b>88</b>
4.18. <i>dre-2</i> is delayed in gonad migration .....	88
4.19. Seam cell heterochrony - <i>dre-2</i> may be a delayed mutant .....	89
4.20. <i>dre-2</i> exhibits pleiotropic defects.....	90
4.21. Mapping <i>dre-2</i> .....	90
<b>5. Discussion.....</b>	<b>91</b>
<b>Part I - <i>dre-1</i> .....</b>	<b>91</b>
5.1. <i>dre-1</i> is a novel player in <i>C. elegans</i> developmental timing.....	91
5.2. F-box proteins function in the ubiquitin system .....	91
5.2.1. F-box proteins are involved in diverse biological processes .....	93
5.2.2. Regulation of F-box protein and DRE-1 .....	95
5.2.3. The role of F-box protein in other biochemical contexts .....	95
5.2.4. DRE-1 may be a component of a SCF complex .....	96
5.2.5. DRE-1 may interact with a BTB domain containing protein .....	96
5.2.6. Functional analysis of the <i>C. elegans</i> ubiquitin system.....	97
5.3. DRE-1 orthologs .....	97
5.4. <i>dre-1</i> functions in developmental timing in <i>C. elegans</i> .....	98
5.4.1. <i>dre-1</i> promotes S4 programs in the epidermis .....	98
5.4.2. <i>dre-1</i> acts upstream of <i>lin-29</i> .....	98
5.4.3. <i>dre-1</i> acts downstream of <i>let-7</i> .....	99
5.4.4. <i>dre-1</i> acts in parallel to <i>lin-41</i> and <i>lin-42</i> .....	100
5.4.5. <i>lin-4</i> may be epistatic to <i>dre-1</i> .....	101
5.4.6. Model of epidermal heterochronic pathway.....	102
5.4.7. <i>dre-1</i> promotes gonadal age.....	105
5.5. <i>dre-1</i> affects chronological age.....	107
5.6. DRE-1 may function in diverse pathways .....	108
5.7. Future prospects .....	109
<b>Part II - <i>dre-2</i> .....</b>	<b>111</b>
5.8. The <i>dre-2</i> locus.....	111
5.9. <i>dre-2</i> may be involved in <i>C. elegans</i> developmental timing.....	111
5.9.1. <i>dre-2</i> may promote gonadal age .....	111
5.9.2. <i>dre-2</i> may function in temporal epidermal development .....	112
5.10. DRE-2 may function in diverse pathways .....	112

---

<b>5.11. Future prospects</b> .....	<b>113</b>
<b>6. References</b> .....	<b>114</b>
<b>Appendices</b> .....	<b>133</b>
Table A1. Mutant strains isolated in this work.....	133
Table A2. Strains obtained by injection.....	133
Table A3. Strains made in this work by crosses .....	134
Table A4. Strains used in this work.....	136
Table A5. RNAi strains used of Ahringer library .....	137
Table A6. Primer for SNP chromosome mapping.....	138
Table A7. Primer for SNP fine mapping.....	139
Table A8. SNP primer (all).....	141
Table A9. Primer for sequencing .....	149
Table A10. Primer for cloning .....	156
Table A11. Plasmids, cosmids and YACs used.....	158
