

METADATA

COLUMN NAME	ALIAS
CAT_NR	"CATALOGUE NUMBER"; unique number assigned to the archaeological object in the final Catalogue of Finds
FIND_ID	"FIND ID NUMBER"; unique control number generated by the database, assigned to each archaeological object upon recording
INV_NR	"INVENTORY NUMBER"; unique identifier number assigned to the archaeological object upon its storage in the holding institution
EXC_NR	"EXCAVATION NUMBER"; unique identifier number assigned to the archaeological object upon its recovery during the excavation
EXC_TAG	"EXCAVATION TAG"; vital information containing details about the archaeological object's context (at excavation entrance)
NOTES	"ADDITIONAL INFORMATION NOTES"; additional remarks about the archaeological object given as an observation
INSTITUTION	"HOLDING INSTITUTION"; full name of an institution in which the archaeological object was stored upon recording
SITE	"ARCHAEOLOGICAL SITE"; full name of an archaeological site on which the archaeological object was recovered
CONTEXT	"CULTURE-HISTORICAL CONTEXT"; culture-historical context to which the archaeological object belongs to
T_SLICE	"TIME SLICE"; approximate time frame in which the archaeological object can be dated by quarter millennia
TYPE	"TYPE"; typological designation based on the overall form of an archaeological object (separate categories for spindle whorls () and loom weights ())
PRESERVATION	"PRESERVATION CONDITION"; state in which the object was documented and recorded ("complete", "half", "partial" and "small fragments missing")
DECO	"DECORATION"; presence of any kind of decorative design on the archaeological object
W_C	"WEIGHT IF COMPLETE"; "complete" archaeological object's measured weight in grams
W_I	"WEIGHT IF NOT COMPLETE"; incomplete archaeological object's measured weight in grams ("partial" objects, objects preserved in "half", objects that have "small fragments missing")
W_C_E	"ESTIMATED COMPLETE WEIGHT"; estimation of complete weight in grams for archaeological objects (spindle whorls) that have "small fragments missing" (equals "weight if not complete")
W_CAL	"CALCULATED COMPLETE WEIGHT"; calculation of complete weight in grams for archaeological objects (spindle whorls) that were preserved in "half" (equals "weight if not complete" doubled)
W_REC	"RECONSTRUCTED COMPLETE WEIGHT"; reconstruction of complete weight for "partial" archaeological objects (spindle whorls) in grams (equals "density" times "complete volume")
V_C	"COMPLETE VOLUME"; volume of the virtual three dimensional reconstruction of the archaeological object (spindle whorl)
V_F	"VOLUME OF THE FRAGMENT"; volume of the "partial" archaeological object (spindle whorl's fragment) generated from its virtual three dimensional model
DEN	"DENSITY"; archaeological object's (spindle whorl's) density calculated from its "volume of a fragment" and its "weight if not complete" (equals "weight if not complete" divided by "volume of the fragment")
H	"HEIGHT"; complete height of the archaeological object (spindle whorl or loom weight) measured in millimeters
D	"DIAMETER"; complete diameter of the archaeological object (spindle whorl) measured in millimeters
P	"PERFORATION DIAMETER"; diameter of the archaeological object's (spindle whorl's or loom weight's) perforation measured with a caliper on the inside of a tunnel in millimeters
T	"THICKNESS"; complete thickness of the archaeological object (loom weight) measured in millimeters
W	"WIDTH"; complete width of the archaeological object (loom weight) measured in millimeters
L	"LENGTH"; complete length of the archaeological object (spool) measured in millimeters
D_MAX	"MAXIMUM DIAMETER"; complete maximum diameter of the archaeological object (spool) measured in millimeters
D_MIN	"MINIMUM DIAMETER"; complete minimum diameter of the archaeological object (spool) measured in millimeters
MATERIAL	"OBJECT MATERIAL"; material out of which the archaeological object has been made from
LAT	"ARCHAEOLOGICAL SITE LATITUDE"; the archaeological site's geographical latitude coordinate
LON	"ARCHAEOLOGICAL SITE LONGITUDE"; the archaeological site's geographical longitude coordinate

SPINDLE WHORLS
