

Proteins mediating somatic hypermutation
and class switch recombination at the immunoglobulin locus

Dissertation zur Erlangung des akademischen Grades des
Doktors der Naturwissenschaften (Dr. rer. nat.)

eingereicht im Fachbereich Biologie, Chemie, Pharmazie
der Freien Universität Berlin

vorgelegt von

Freia Juliane Xenia Spillmann
aus Frankfurt am Main

Februar, 2006

1. Gutachter: Professor Dr. Matthias Wabl
2. Gutachter: Professor Dr. Volker Erdmann

Disputation am 23. Juni 2006

Table of contents

Table of contents	1
Zusammenfassung	4
Summary	5
Abbreviations	6
1. Introduction.....	8
Structure of Antibodies	8
Diversity of antibodies	9
Primary repertoire	9
Secondary repertoire.....	10
B cell development.....	11
B cell activation	11
Immunoglobulin Class Switch Recombination (CSR)	12
Somatic hypermutation (SHM).....	14
Gene conversion	15
Activation-induced cytidine deaminase (AID)	16
AID in SHM	17
AID in CSR.....	18
Phenotypes of AID deficient organisms.....	20
Other factors required for CSR and SHM.....	20
Supt6h – a potential candidate mediating CSR and SHM.....	21
TID as a candidate	22
The WEHI-231 cell line.....	23
2. Specific aims	24
3. Results	25
Differentiation of the WEHI-231 line	25
FS expresses AID	26
AID variant in WEHI-231 precursor lines.....	26
Quantification of AID in WEHI-231 lines.....	27
AID KO mouse	28
AID encoding transcripts	30
The FS line expresses nuclear UNG.....	33
FS expresses Ku70/Ku80.....	34
Canonical mutations at the H locus.....	35
The κ locus	37
An exogenous substrate is hypermutated at a much lower rate than 18-81	39

Hypermethylation in precursor and progeny WEHI-231 lines	41
Lack of class switching	43
CSR indicator plasmid	45
Germline transcripts	46
FS subclone HM.....	50
IgM allotypes in HM and FS.....	50
Decreased expression level of IgM in HM	55
Retroviral insertional mutagenesis	60
AKV	60
Moloney virus.....	61
Viral integration of clone 11	64
Supt6h - a potential AID interaction partner.....	67
Endogenous expression of Supt6h in B cell lines	67
Co-immunoprecipitation (Co-IP) of tagged AID and Supt6h.....	67
Immunoprecipitation with AID-Flag	69
Immunoprecipitation with Supt6h-Myc	70
Supt6h short hairpin RNA (shRNA).....	70
4. Discussion.....	74
AID – key to the secondary antibody repertoire.....	74
AID expression in WEHI-231	74
The 18-kD band	75
AID splice variants	76
Other factors required for CSR and SHM.....	76
CSR and SHM in WEHI-231	78
SHM in the exogenous locus	78
SHM at the endogenous locus.....	81
CSR endogenous locus.....	81
CSR exogenous locus.....	82
Allele switch	83
IgM in HM	85
Reduced IgM	85
IgM double band	87
Search for unknown factors	87
Supt6h	88
5. Materials and Methods.....	91
Nucleic acids.....	91
Extraction of nucleic acids	91

cDNA synthesis.....	91
PCR.....	91
Detection of nucleic acids.....	94
Subcloning in bacteria and sequencing.....	95
Quantitative PCR/Taqman.....	95
RNAi.....	96
Constructs and cloning.....	97
Protein.....	100
Western blot.....	100
ELISA.....	102
Co-immunoprecipitation.....	102
Deglycosylation of IgM.....	103
Cell Culture.....	104
Media.....	104
Immunofluorescence.....	104
Antibodies and control cells used for Ig class identification.....	104
Spleen cell preparation.....	105
Mutation indicator plasmid experiment.....	105
CSR indicator plasmid experiment.....	106
Production of lentivirus.....	106
18-81 infection with lentivirus.....	107
18-81 infection with Cre constructs.....	107
Transfection of 293 HEK cells.....	107
6. References.....	108
Acknowledgement.....	125
Publications.....	127
