

Fig 17. 5-LOX immunostaining in SZ95 sebocytes. Alkaline phosphatase anti-alkaline phosphatase technique was applied. SZ95 cells were treated for 1 hour with AA (100 μ M) and/or CaI (1 μ M). Control and treated cells were both stained positive. Figs. 17a. Control; 17b. Cells treated with AA (100 μ M) AA; 17c. Cells treated with CaI (1 μ M); 17d. Cells treated with AA (100 μ M) and CaI (1 μ M).
