

CONTENTS

1	INTRODUCTION.....	1
2	LITERATURE REVIEW.....	3
2.1	Epidemiology of African Trypanosomosis	3
2.2	Biology and ecology of tsetse	5
2.2.1	Classification.....	5
2.2.2	Distribution and habitat.....	6
2.2.3	Life cycle.	7
2.2.4	Host preferences.....	8
2.3	Bloodmeal identification methods.....	9
2.3.1	Precipitin test.....	10
2.3.2	Haemagglutination inhibition test.....	10
2.3.3	Complement fixation test (CFT).....	10
2.3.4	Enzyme-linked immunosorbent assay (ELISA).....	11
2.3.5	DNA based techniques.....	12
2.4	Molecular techniques, principal and application for species identification.....	13
2.4.1	DNA probe hybridization.....	13
2.4.2	Amplified fragment length polymorphism analysis (AFLP).....	14
2.4.3	Polymerase chain reaction (PCR).....	14
2.4.4	Random amplified polymorphic DNA-polymerase chain reaction (RAPD-PCR).....	17
2.4.5	Polymerase chain reaction-restriction fragment length polymorphism analysis (PCR-RFLP).....	18
2.4.5.1	Mitochondrial DNA.....	20
2.4.5.2	Cytochrome b gene.....	22
3	MATERIALS AND METHODS.....	23
3.1	Study animals.....	23
3.2	Collection of test samples.....	23
3.2.1	Collection of blood samples.....	23
3.2.2	Collection of hair and skin samples.....	23

Contents

3.3	Extraction of DNA from vertebrate hosts.....	23
3.3.1	DNA extraction from EDTA blood.....	23
3.3.2	DNA extraction from hair and skin of vertebrate hosts.....	24
3.4	Preparation of bloodmeals from tsetse flies.....	25
3.4.1	Maintenance of tsetse <i>in vitro</i>	25
3.4.2	Preparation of bloodmeal smears	28
3.4.3	DNA extraction from bloodmeal smears.....	28
3.5	DNA amplification	29
3.6	Gel electrophoresis.....	30
3.7	DNA sequences.....	30
3.8	RFLP analysis.....	31
4	RESULTS.....	39
4.1	Amplification of mtDNA from potential vertebrate hosts of tsetse flies.....	39
4.2	The detection limit and stability of host DNA in the gut of tsetse.....	40
4.3	Amplification of mtDNA from filter paper after treatment with antiseptic solution.....	47
4.4	Amplification of mtDNA from hair and skin of vertebrate hosts.....	48
4.5	DNA sequences of different species of the family Bovidae.....	48
4.6	Identification of vertebrate hosts of tsetse by PCR-RFLP analysis.....	50
4.7	Additional restriction enzymes used for species identification.....	51
5	DISCUSSION.....	61
5.1	Amplification of mtDNA from vertebrate hosts.....	61
5.2	Detection limit and stability of host DNA in tsetse.....	61
5.3	Amplification of mtDNA after treatment with antiseptic solution.....	62
5.4	Amplification of mtDNA from hair and skin of vertebrate species.....	63
5.5	DNA sequences of different species of the family Bovidae drawn from the data bank.....	63
5.6	Identification of host species of tsetse by PCR-RFLP analysis.....	64
5.7	PCR-RFLP analysis.....	65

Contents

6	CONCLUSIONS.....	68
7	SUMMARY.....	69
8	ZUSAMMENFASSUNG.....	71
9	REFERENCES.....	73
