ZUSAMMENFASSUNG	vii
SUMMARY	x
ABBREVIATIONS	xiii
LIST OF FIGURES	xv
LIST OF TABLES	xvi
1 INTRODUCTION	1
1.1 Diversity of microorganisms	1
1.2 Extremophilic microorganisms	2
1.3 Halophiles	3
1.3.1 General characteristics of moderate halophiles	3
1.3.2 Biochemical characterization of halophiles	5
1.3.2.1 Ion concentrations inside the cell	5
1.3.2.2 Organic osmotic solutes	7
1.3.2.3 Amino acid composition of halophilic proteins	8
1.3.2.4 Cell envelopes of moderate halophiles	8
1.4 Proteomics	9
1.4.1 Proteomics in studying microorganisms	10
1.4.2 Techniques used in bacterial proteome studies	11
1.4.2.1 Extraction and separation of protein	11
1.4.2.1.1 Extraction	11
1.4.2.1.2 Separation	13
1.4.2.2 Detection of proteins	14
1.4.2.3 Identification methods for 2-DE gel proteins	18
1.4.2.3.1 N-Terminal Edman degradation	18
1.4.2.3.2 Mass spectrometry	19
1.4.2.4 Identification of proteins by electrospray ionisation tandem mass spectrometry (ESI-MS/MS) and data analysis	20
1.4.2.4.1 Ionisation	20
1.4.2.4.1.1 Ionisation by electrospray	20
1.4.2.4.1.2 Ionisation by Matrix Assisted Laser Desorption	21
1.4.2.4.2 Quadrupole (Q) mass analyzer	22
1.4.2.4.3 Time-of-flight (TOF) mass analyzer	23

1.4.2.4.4 Nano-LC-ESI-Q TOF: A hybrid instrument	24
1.4.2.4.5 The detector	25
1.4.2.5 Data analysis	26
2 OBJECTIVES	28
3 MATERIALS	30
3.1 Chemicals	30
3.2 Solutions and buffers	31
3.3 Labware	34
3.4 Kits and bacterial type strain	35
3.5 Software, databases, bioinformatic tools	35
4 METHODS	36
4.1 Isolation of microorganisms from saltern areas	36
4.1.1 Collection of soil samples	36
4.1.2 Humidity percentage determination of the soil samples	36
4.1.3 Isolation of microorganisms and colony counting from soil samples	36
4.2 Culturing of microorganisms	37
4.2.1 Preparation of pre-cultures and inoculation	37
4.3 Sample preparation	38
4.4 Protein concentration determination using Bradford	38
4.5 High resolution two dimensional electrophoresis	39
4.5.1 NEPHGE technique (first dimension)	39
4.5.2 SDS-Polyacrylamide gel electrophoresis (second dimension)	40
4.6 Staining	41
4.6.1 Silver staining	41
4.6.2 Colloidal Coomassie G-250 staining	42
4.7 Gel drying	42
4.8 Semi dry blotting	42
4.8.1 Staining of blotted PVDF membranes	43
4.9 In-Gel digestion; tryptic digest of proteins	43
4.10 MALDI-TOF MS	44
4.11 Nano LC-ESI-QTOF MS/MS	44
4.12 N-Terminal sequencing	45
5 RESULTS	46
5.1 Culturing of isolate no 6 and <i>Halomonas salina</i>	46
5.2 2-DE patterns of isolate no 6 and <i>Halomonas salina</i>	47
5.3 Identification methods and parameters of selected protein spots	56
5.4 2-DE gel comparison and identification of group 1 proteins of isolate no 6 and <i>Halomonas salina</i>	61
5.4.1 Aconitate hydratase (Spot A2)	61
5.4.2 Periplasmic phosphate binding protein (Spot A6)	64
5.4.3 Dehydrogenase (Spot A3)	64
5.4.4 Acetyl-CoA C-Acetyltransferase (Spot A4)	66
5.4.5 Malate dehydrogenase (Spot A5)	67
5.5 Identified proteins of isolate no 6 from group 1 gel and 2-DE gel comparison	68
5.5.1 Major outer membrane protein precursor (Spot No A1)	68
5.5.2 Type I restriction-modification system, M subunit (Spot No 629)	69
5.5.3 Acetate-CoA ligase (Spot No 603)	70
5.5.4 Dihydrolipoamide dehydrogenase (Spot No 603)	71
5.5.5 Translation elongation Factor Tu (Spot No 624)	74

5.5.6 Aspartate semialdehyde dehydrogenase (Spot No 626)	75
5.5.7 Succinyl-CoA ligase [ADP-Forming] subunit alpha (Spot No 60021)	75
5.5.8 Superoxide dismutase (Spot No 60013)	76
5.5.9 Alkyl hydroperoxide reductase (Spot No 62)	77
5.5.10 L-ectoine syntase (fragment) (Spot No 60011)	78
5.5.11 UspA [Csal 2397] (Spot No 617)	78
5.6 2-DE gel comparison of 4 groups of <i>Halomonas salina</i>	79
5.6.1 Extracellular solute-binding protein, family 5 (Spot 292)	79
5.6.2 Putative-cobalt-precorrin-6A synthase (Spot 2816)	80
5.6.3 Acetoacetate synthase small subunit (Spot 285)	82
5.6.4 Single-strand binding protein (Spot 2819)	83
5.6.5 Hypothetical protein ECA3428 (Spot 2821)	84
5.6.6 Hypothetical protein SSO0826 (Spot 2822)	84
5.6.7 Nucleoside diphosphate kinase (Spot No 2823)	85
5.6.8 30S ribosomal protein S20 (Spot No 2839)	86
6 DISCUSSION	87
6.1 Strategy for proteomics study of moderately halophilic bacteria	87
6.2 Protein identification of <i>Halomonas</i> Species	93
