

**The Potential of a Juvenile Hormone Analogue
and a Chitin Synthesis Inhibitor to Control
Subterranean Termites**

Inaugural-Dissertation zur Erlangung des Doktorgrades

vorgelegt dem

**Fachbereich Biologie, Chemie, Pharmazie
der Freien Universität Berlin**

angefertigt an der

Bundesanstalt für Materialforschung und- Prüfung (Berlin)
Fachgruppe IV.II, "Biologie im Umwelt- und Materialschutz"

von

**Muna Abdelaziz Mohamed
B.Sc. (Honours), M.Sc.
Khartoum, Sudan**

Berlin 2002

1. Gutachter: PD Dr. Horst Hertel
 2. Gutachter: Prof. Dr. Monika Hilker
- Disputation: 16. Juli 2002

Berlin 2002

*Dedicated To my husband Dr. Zuheir
and my daughters. Sally, Sulafa, Shahd and Nora.*

Contents

1.	Introduction	1
1.1	General biology of Termites	1
1.2	Termites as pests	4
1.3	Insect growth regulators for termite control	5
2.	Materials and methods	8
2.1	Material	8
2.1.1	Chemical	8
2.1.2	Origin of termites	8
2.2.	Laboratory experiments	9
2.2.1	Treatments of <i>R. santonensis</i> with fenoxycarb	9
2.2.1.1	Oral treatment	9
2.2.1.2	Contact treatment	11
2.1.1.3	Topical treatment	11
2.2.1.4	Transferability of fenoxycarb by trophallaxis	12
2.2.2	Gas chromatographic (GC) analysis to determine uptake of fenoxycarb by the workers	13
2.2.2.1	Direct treatment	13
2.2.2.2	Indirect treatment	14
2.2.3	The effect of flufenoxuron on <i>R. santonensis</i>	14
2.2.3.1	Experimental procedures	14
2.2.4	The synergistic effects of fenoxycarb and flufenoxuron on <i>R. santonensis</i>	15
2.3	The effect of fenoxycarb on laboratory colonies	16
2.3.1	The effect of fenoxycarb on <i>Microtermes sp. nr. albopartitus</i>	16
2.3.1.1	Colony establishment	16
2.3.1.2	Treatments	16
2.3.2	The effect of fenoxycarb on <i>Macrotermes bellicosus</i>	17

2.4.	Acceptance of fenoxycarb and flufenoxuron in the field	17
2.4.1	Meteorology of the studied area	17
2.4.2	Treatment of the wooden baits	18
2.4.3	Experimental layout	18
2.4.4	Experimental observations	19
3	Results	20
3.1	The effect of fenoxycarb on <i>R. santonensis</i>	20
3.1.1	Oral treatment	20
3.1.1.1	Mortality	20
3.1.1.2	Presoldiers production	21
3.1.1.3	Deterrence test	23
3.1.2	Contact treatment	24
3.1.2.1	Mortality	24
3.1.2.2	Presoldiers production	26
3.1.3	Topical treatment	27
3.1.3.1	Mortality	27
3.1.3.2	Presoldiers production	29
3.1.4	Transferability of fenoxycarb among <i>R. santonensis</i>	30
3.1.4.1	Oral treatment	30
3.1.4.2	Topical application	34
3.2	Quantity of fenoxycarb in workers after different treatments	36
3.2.1	Direct treatments of workers	36
3.2.1.1	Fenoxycarb in <i>N. castaneus</i> workers	36
3.2.1.2	Fenoxycarb in <i>R. santonensis</i> workers	37
3.2.2	Indirect treatments of workers through transferability of fenoxycarb by trophallaxis	39
3.2.2.1	Fenoxycarb in <i>R. santonensis</i> workers after oral treatment	39
3.2.2.2	Fenoxycarb in <i>R. santonensis</i> workers after topical treatment	40

3.3	The effect of flufenoxuron on <i>R. santonensis</i>	42
3.3.1	Mortality	42
3.3.2	Deterrence test	43
3.4	Combined treatment using fenoxycarb and flufenoxuron	45
3.4.1	Effect of high doses of fenoxycarb and flufenoxuron	45
3.4.2	Combined treatment of fixed fenoxycarb concentration with varying higher concentrations of flufenoxuron	46
3.4.3.	Combined treatment of fixed fenoxycarb concentration and varying lower flufenoxuron concentrations	48
3.4.3.1	Mortality	48
3.4.3.2	Presoldiers production	50
3.5	The effect of fenoxycarb on laboratory colonies	53
3.5.1	The effect of fenoxycarb on <i>Microtermes</i> sp. nr. <i>albopartitus</i>	53
3.5.2	The effect of fenoxycarb on <i>Macrotermes bellicosus</i>	56
4.5	Acceptance of fenoxycarb and flufenoxuron by <i>Microtermes</i> species in the field	57
4.	Discussion	60
4.1	Chemical control of termites	60
4.1.1	Juvenile hormones in insects in general	60
4.1.2	Juvenile hormones in termites	61
4.1.3	Chitin synthesis inhibitors (CSI) in insects in general	62
4.1.4	Chitin synthesis inhibitors in termites	63
4.1.5	Outline of present work	63
4.2	The effect of fenoxycarb on <i>R. santonensis</i> workers	64
4.2.1	Mortality	64
4.2.2	Presoldiers and intercastes production	64
4.2.3	Transferability of fenoxycarb among <i>R. santonensis</i>	69

4.3	The effect of flufenoxuron on <i>R. santonensis</i> workers	71
4.3.1	Mortality	71
4.3.2	Feeding deterrence	72
4.4	The effect of combined fenoxycarb and flufenoxuron on <i>R. santonensis</i>	72
4.5	Acceptance of fenoxycarb and flufenoxuron to <i>Microtermes</i> species in the field	74
4.6	Proposed control method for termites using fenoxycarb and flufenoxuron	75
5.	Summary	79
6.	Zusammenfassung	82
7.	References	85
	Acknowledgements	

Acknowledgements

This study was supported by the government of Sudan, University of Khartoum. Their kind support is greatly acknowledged and appreciated.

I gratefully acknowledged the support from Federal Institute for Materials Research and Testing (BAM), Berlin. I extend my thanks to Janssen Pharmaceutica, Belgium for providing fenoxycarb and flufenoxuron.

I would like to express my gratitude and respect to Dr. Hertel from BAM for his enthusiastic supervision, kind and generous support during this study where he has been generous in offering a helping hand. His corporation and scientific interest made this study possible. Thanks and respect also to Prof. Dr. Hilker from FU Berlin for her valuable discussion and comments.

My gratitude appreciation and genuine acknowledgement is due to Dr. Steidle for the assistance with statistical evaluation and his scientific interest in my research work and for taking a lot of time supporting me.

During my enjoyable time at the Department of Biology, BAM, many people have been of great help to me. I would to thanks Dr. Rudolf, Dr. Plarre, and Dr. Schoknecht for their discussions and comments. Also I extend my thanks to Mr. Krüger for the assistance in the chemical analysis, Mrs. Teuber and Mrs. Lux for their support. My gratitude is due to all members of the Department of biology for their friendly acceptance, assistance and enthusiastic environment and the nice family atmosphere.

Special thanks to Dr. Wood, England for reading and correcting part of this manuscript and to Dr. Helaina Black for discussion and fruitful comments.

I am very grateful to Dr. Perchtold, Berlin for his support during my stay in Berlin and in my general social life.

My special and sincere thanks to my family and daughters for their encouragement and understanding.

I owe deep gratitude and respect to my husband, Dr. Zuheir, for his patience understanding and coping with a wife who is not only away, but also busy with termites management when she is in.
