

Appendix I

The table gives details on captive cheetah females held on farms and lodges that were investigated in Chapter 2 and 3. Group size refers to the number of animals held inside one enclosure. Group composition refers to the sex of the animals and is expressed as 'number of males, number of females' or, in case of Z025, as 'number of males, number of females, number of cheetahs of unknown sex. Contacts to humans are referred to as rare if animals were only exposed to the persons feeding them and/or cleaning the enclosure, while 'frequent' refers to enclosures frequently visited by people, namely tourists.

ID	Farm/Lodge	age class	Enclosure size (m ²)	Space per individual (m ²)	Group size	Group composition	Predators in adjacent enclosures	Contact to humans
Z002	A	7	10000	5000	2	1,1	no	rare
Z003	B	6	10000	3333	3	1,2	no	frequent
Z004	B	7	10000	3333	3	1,2	no	frequent
Z007	C	7	10000	2500	4	2,2	no	rare
Z014	D	7	20000	10000	2	1,1	leopard	frequent
Z025	E	6	100000	5263	19	4,1,14	no	rare
Z028	F	7	600	200	3	0,3	leopard, spotted hyena	frequent
Z029	F	7	600	200	3	0,3	leopard, spotted hyena	frequent
Z030	F	7	600	200	3	0,3	leopard, spotted hyena	frequent

Appendix II

The table gives detailed information on free-ranging and captive cheetah investigated in Chapter 4. For animals sampled repeatedly, the number in brackets indicate first (1), second (2) or third (3) sampling. Handling date is given as year-month-day (yyymmdd). Sociality indicates whether the animals lived solitary or were part of a group. The sampling method (sampl.meth.) refers to the way samples were obtained, i.e. during immobilisation (imm.) or during necropsy procedure (necr.). The column vaccinated shows animals previously vaccinated against FHV, FCV and FPV. Results are presented as positive (pos) or negative (neg.). If animals were not investigated in the respective test, this is indicated by '-'.
