

**INVESTIGATION OF THE EFFECTS OF SELENIUM
AND SELENOPROTEINS ON THE ACTIVATION
OF MICROGLIA AND ON THE PROTECTION
OF BRAIN CELLS IN OXIDATIVE STRESS**

DISSERTATION

zur Erlangung des akademischen Grades

Doctor rerum naturalium

(Dr. rer. nat.)

AM FACHBEREICH

BIOLOGIE, CHEMIE, PHARMAZIE

DER FREIEN UNIVERSITÄT BERLIN

vorgelegt von

LISA DALLA PUPPA

geboren in Venedig (Italien)

Berlin 2006

Tag der Disputation: 27.07.2006

1. Gutachter: Prof. Dr. Dietrich Behne
2. Gutachter: Prof. Dr. Petra Knaus

1	LIST OF ABBREVIATIONS	1
2	INTRODUCTION	3
2.1	Selenium and selenoproteins	3
2.1.1	Characteristics of selenocysteine _____	4
2.1.2	Synthesis of selenoproteins in eukaryotes. _____	6
2.1.3	Mammalian selenoproteins _____	8
2.1.4	Selenoproteins in the brain _____	11
2.1.4.1	Priority position of the brain in selenium retention and selenoprotein biosynthesis ____	11
2.1.5	The selenoenzyme glutathione peroxidase _____	12
2.2	Microglia: immunocompetent cells of the brain	15
2.2.1	Historical background _____	16
2.2.2	Activation of microglia and secondary cell death _____	16
2.2.3	Microglia and diseases _____	19
2.2.3.1	Microglia activation in Alzheimer’s disease (AD) _____	19
2.2.3.2	Microglia activation in Parkinson’s disease (PD) _____	20
2.3	Oxidative stress and neurodegenerative diseases	21
3	AIM OF THE STUDY	22
4	MATERIALS AND METHODS	23
4.1	Chemicals	23
4.2	Cell culture	23
4.2.1	Cell culture conditions and treatment _____	23
4.2.2	Primary microglial cells _____	24
4.3	Biological and biochemical methods	25
4.3.1	Test of cell viability (MTT test) (95) _____	25
4.3.2	Propidium iodide staining (measurement of cell death) _____	25
4.3.3	Measurement of intracellular ROS (Reactive Oxygen Species) (96) _____	26
4.3.4	Measurement of nitric oxide production (97) _____	26
4.3.5	Total protein preparation (99) _____	26
4.3.6	Preparation of cytoplasmic and nuclear extracts (100) _____	27
4.3.7	Protein quantification: BCA™ assay (101) _____	27
4.3.8	One-dimensional polyacrylamide gel electrophoresis (SDS-PAGE) _____	28

4.3.9	Western blot analysis	28
4.3.9.1	Blotting and staining of proteins on membranes	28
4.3.9.2	Blocking and antibody incubation	29
4.3.9.3	Detection	29
4.3.9.4	Stripping and β -actin immunoassay	29
4.3.10	2D PAGE (103)	30
4.3.11	Staining of protein gels	30
4.3.11.1	Staining with Coomassie Brilliant Blue R-250	30
4.3.11.2	Staining with silver nitrate (according to Rabilloud T.) (104)	31
4.3.12	Drying of gels in a vacuum	31
4.4	Molecular biological methods	32
4.4.1	Cloning of the Gpx1-EGFP-C1 vector	32
4.4.1.1	Overview	32
4.4.1.2	Database search and primer design	32
4.4.1.3	PCR (Polymerase Chain Reaction)	33
4.4.1.4	Agarose gel electrophoresis of DNA	33
4.4.1.5	DNA extraction from the agarose gel	34
4.4.1.6	TOPO [®] cloning reaction (105)	34
4.4.1.7	Transformation in competent <i>E. Coli</i> (One Shot [®] Chemical Transformation)	35
4.4.1.8	Colony screening	36
4.4.1.9	Plasmid DNA mini-purification	36
4.4.1.10	Restriction digestion	37
4.4.1.11	Maxi restriction digestion of vector and insert	37
4.4.1.12	DNA gel electrophoresis, gel elution and determination of the DNA concentration	38
4.4.1.13	Dephosphorylation of the vector prior to cloning	38
4.4.1.14	Ligation into pEGFP-C1 and transformation	39
4.4.1.15	Colony screening and plasmid purification	40
4.4.1.16	Determination of the concentration and purity of DNA	40
4.4.1.17	Sequencing and blast	41
4.4.2	Cloning of siRNA vectors	42
4.4.2.1	Overview	42
4.4.2.2	Oligo insert design	42
4.4.2.3	Annealing and phosphorylation of oligos	44
4.4.2.4	Ligation into the pSUPER-GFP vector	44
4.4.3	Transient transfection of cells	45
4.4.3.1	Amaya Nucleofector electroporation method	45
4.4.3.2	Calcium phosphate transfection	46
4.5	Radiolabelling with ⁷⁵Se	46
4.5.1	Detection of labelled selenoproteins	47

4.6	Fluorescence Activated Cell Sorting (FACS) analysis	47
4.6.1	Apoptosis (Annexin V staining).....	47
4.6.2	Adhesion molecules (CD11a).....	48
4.7	Determination of enzyme (Gpx1) activity	49
4.8	Immuno-histochemistry.....	49
4.9	Microscopy.....	50
4.10	Determination of the selenium content by atomic absorption spectrometry	50
5	RESULTS	52
5.1	Determination of the selenium content in the culture medium	52
5.2	Effect of selenite on BV2 cell viability	52
5.3	Hydrogen peroxide toxicity in BV2 cells	54
5.4	Selenium prevents H₂O₂-mediated cell death	54
5.5	Selenium treatment reduces stress-induced migration of microglia.....	55
5.6	Effect of selenium on adhesion molecule expression	57
5.7	Selenium prevents H₂O₂-induced cell death and inhibits ROS generation	58
5.8	Studies on the activation of NF-KB and iNOS.....	61
5.8.1	NF-KB	61
5.8.2	iNOS	62
5.9	Analysis of apoptosis.....	64
5.9.1	Selenium and CASPASE-3	64
5.9.2	Selenium and ANNEXIN V	65
5.10	Incorporation of ⁷⁵Se into BV2 cells	69
5.10.1	The selenoproteome of BV2 cells	69
5.10.2	Selenoprotein expression in BV2 in response to sodium selenite.....	73
5.11	Effect of selenite on the expression of selected selenoprotein	77
5.11.1	Western blot SelP and TrxR1	77
5.11.2	Effect of selenite on the cellular Gpx1 activity	78
5.12	Studies on BV2 cells treated with LPS - IFNγ	80

5.12.1	Cell viability of BV2 cells after LPS and IFN γ treatment _____	80
5.12.2	NO production in BV2 cells after LPS and IFN γ stimulation _____	82
5.13	Construction of plasmids for the regulation of Gpx1 expression.....	86
5.13.1	Cloning of the Gpx1-EGFP-C1 vector _____	86
5.13.2	Cloning of siRNA vectors _____	97
5.14	Transfection experiments	102
5.14.1	Establishment of transient transfection of COS-7 cells with Gpx1-EGFP-C1 DNA _____	102
5.14.2	Transfection of siRNA plasmids. _____	104
5.15	Effects of different Gpx1 levels on the microglial cells	109
5.15.1	Over-expression of Gpx1 _____	109
5.15.2	Under-expression of Gpx1 _____	111
5.15.3	Subcellular localization of Gpx1 _____	113
5.16	Studies on primary cell cultures	117
6	DISCUSSION	120
7	SUMMARY	128
8	ZUSAMMENFASSUNG	130
9	REFERENCES	132
	APPENDIX	141
	STATEMENT.....	141
	ARTICLES AND POSTERS.....	142
	AWARDS.....	144
