

Acknowledgements

There are many persons that I would like to thank for supporting me during the course of my work and for making this thesis possible. I had the privilege to share the time of my PhD. thesis with a very special person. From partners at work to friends, from late night measurements to relaxing with Pastis it was all there and it was beautiful. Thank you, Jan!

I want to express a special thank to Prof. Ludger Wöste for giving me the opportunity to carry out the work for my PhD. thesis within his group and to discover the fascinating field of clusters and femtosecond laser spectroscopy. His wealth of ideas and constructive advice, his unique way to always find the right words of encouragement as well as his constant good humor and optimism gave me enormous energy and motivation. Furthermore, the possibility to take part at numerous conferences opened new perspectives to me and I will never forget the trips to Paris, the Côte d'Azur and to Monaco.

I would like to thank Prof. Ulrich Heiz for bringing so much input to the experiments. I am grateful for his constructive ideas, the interesting scientific discussions and the suggestions to the structure of my thesis. I also want to express my gratitude to Prof. Thomas Leisner. He always had an answer to my questions, whether experimental or theoretical. I am thankful to Dr. Štefan Vajda for his active presence in the lab during our successful cooperation. His energy and commitment were highly contagious. I would like to thank Dr. Thorsten M. Bernhardt for supervising the scientific project and for the careful reading and improvement of this work.

I can not imagine our group without the presence of Frau Inge Siegel, who always had our well-being in mind. Our beautiful coffee and tee time have a special place in my memory and the multitude of new German words which I learned from her are unforgettable. To Frau Sigrid Apelt and Herr Peter Abt, I am thankful for their help in the administrative problems during all these years.

I want to express my gratitude to Marcel Krenz for his never ending technical

assistance at all hours of the day. I am thankful to Cosmin Lupulescu and Gabriele Santambrogio for sharing their experience in the laser lab. To Mathias Brümmer, I am very grateful for the help in finding solutions to problems with computers and electronics. An “amicalement merci beaucoup” to Jérôme Le Roux for bringing a wonderful piece of France in our group. I thank Michael Kregielski for his efforts to complete the many new mechanical constructions, that we always needed “yesterday”.

I would like to thank the entire Arbeitsgruppe Wöste for the warm and friendly atmosphere. I will never forget the discussions in the coffee room, the “Friday Sekt”, the parties and all the places we visited together. It was a beautiful time for me and I will miss everyone of you. Thank you!

On a very personal note, I would like to express my gratitude to my family and Torsten for their constant support and understanding.
