

# **The Developmental Role of the Serotonin System**

**Thesis to the acquisition of the academic degree of  
the doctor of the natural sciences  
(Dr. rer. nat )**

**submitted in the department of Biology, chemistry, pharmacy  
of the Free university of Berlin**

presented by

**Saleh Bashammakh**

Born in Aden-Yemen

**June 2007**

1. Gutachter: Prof. Dr. Michael Bader

2. Gutachter: Prof. Dr. Udo Heinemann

Disputation am 29.08.2007

- **ACKNOWLEDGEMENT**

At first and foremost I would like to thank my advisor Prof. Dr. Michael Bader, who has given me the opportunity to do my Ph.D. work in his lab and his great help providing me the financial support to reach my goal. I express my deep gratitude for his scientific supervision, kindness, forgiveness and patience during the whole years of my work in his group. I am very grateful for his critical reading of my thesis.

I thank all the members of Prof. Dr. Michael Bader's group very much for their kindness, friendly help, especially Adelheid Böttger for her excellent technical help concerning the molecular biology methods during my studies, as well as Monika Nitz, Marleen Klann, Larisa Vilianovich, and Cathrin Rudolph. I appreciate the support of all contributing members of our Serotonin project: Dr. Diego Walther, Dr. Jens-Uwe Peter, Dr. Martin Wuertele, Dr. Claudia Wilhelm, Dr. Natalia Alenina, Katja Tenner, and Katarina Kotnik and want to thank them for their friendly help very much.

My great thank goes to Dr. Salim Abdelilah-Seyfried, who has given me the opportunity to use his lab for zebrafish and also to the whole group, especially Stefan Rohr and Robby Fechner for their kind technical and material help.

I am very grateful to Dana Lafuente, the administrative assistant of Prof. Bader's group to her great help to resolve many of my problems in the lab and outside the lab.

My special thanks to my life partner, my wife Aziza Al-saadi, who always tried to provide me with the best atmosphere during the time for this work.
