

**HYDROPHOBIC AND HYDROPHILIC YOCTOWELLS
USED FOR MOLECULAR SORTING AND AS 3D-
LIGANDS**

A Thesis presented to Fachbereich Biologie, Chemie, Pharmazie
Freie Universität Berlin for the degree of
Dr. rer. Nat.

by

Sidhanath Vishwanath Bhosale

INDRAL - INDIA

2005

Supervisors

1. Prof. J.- H. Fuhrhop
2. Prof. Dr. Rainer Haag

Date of Defense: 19th December 2005

**To my Parents, uncle (Tanajirao Bhosale) ,
Prof. Mukund Joshi
and
the Memory of my Sister (Uma Bhosale)**

Poise, self-control, forbearance, discrimination, performance of one's duty, truthfulness, compassion, contentment, generosity, dispassion, faith and reverence, charity, besides delight in the contemplation of the divine self - these are the characteristics of Sattva.

Bhagavad Geeta

Table of Contents

Chapter 1 Introduction	1
Chapter 2 Constituents of Yoctowells	
2.1. Introduction	9
2.2. (OEG) ₂ - bolaamphiphile	17
2.3. Synthesis of [PEG-GGG-Cl]- bolaamphiphile	23
2.4. Synthesis of (9-Chlorocarbonyl –nonanoylamino)-acetic acid methyl ester - bolaamphiphile	25
2.5. Synthesis of [3-(9-Chlorocarbonyl-nonanoylamino)-propyl]-trimethyl ammonium bromide- bolaamphiphile	28
2.6. Synthesis of 15 °A- Bolaamphiphile	30
2.7. Synthesis of porphyrin	35
2.8. Synthesis of <i>meso</i> -5,10,15,20-tetrakis(3-carboxylatophenyl) porphyrin	38
2.9. Synthesis of fluorescein triglycine tag	39
2.10. Synthesis of ketone- bolaamphiphile	40
Chapter 3 Slow Motion of Water- and Chloroform- Soluble Porphyrins in Yoctowells	
3.1 Introduction	41
3.2 Construction of yoctowells on silica particles and confirmation of its stability	43
3.2.1 Preparation of silica particles	43
3.2.2 Construction of yoctowells	44
3.2.3 Confirmation of gaps	46
3.3 Slow motion of porphyrins in yoctowells	49
3.4 Calculations	55
3.5 Conclusion	64
4 Trapping and Sorting of Water- and Chloroform-Soluble Porphyrins in Yoctowells	
4.1 Introduction	66
4.2 Applied nanowells with cover porphyrin on silica particles for	

sorting process.	68
4.2.1 Sorting of three porphyrins within the yoctowells	68
4.2.2. Fluorescence measurements and quenching experiments	72
4.3 Electrochemical characterization of yoctowells with three layers	81
4.4 Proposed model of three components within the yoctowells	83
4.5 Conclusion	87

5. Functional Yoctowells as Receptors

5.1 Introduction	88
5.2 Use of bolaamphiphile to prepare yoctowells	89
5.3 Confirmation of (OEG) ₂ -yoctowells	91
5.4.1 Blocking effect of spermin	93
5.4.2 Blocking effect of tobramycin	94
5.4.3 Blocking effect of polylysine	96
5.4.4 Effect of sulfamic acid to the walls of yoctowells.	97
5.5 Triglycine Yoctowell	99
5.5.1 Size selectivity of triglycine yoctowells	99
5.5.2 Effect of 1,2- <i>trans</i> -cyclohexane diol with three different yoctowells	104
5.6 Ketone yoctowell and covalent-binding of <i>trans</i> -4,4'-diaminostilbene	107
5.7 Conclusion	112

Chapter 7 Experimental Part

7.1 Synthesis	113
7.2 Instruments	139
7.3 Detailed procedures for the preparation of aminated silica particles, yoctowells and with characterization	140
7.4 Abbreviations used	148

Summary :

1. English Summary	149
2. German Zusammenfassung	150

Chapter 9 References	151
