

CONTENT

1. THEORETICAL BACKGROUND	1
1.1 Human skin	1
1.1.1 Fundamentals of the cutaneous barrier	4
1.1.2 Penetration pathways through the skin	8
1.1.3 Epidermal response to exogenous skin barrier disturbance	9
1.2 Reconstructed human skin as an alternative test model in toxicity testing	11
1.2.1 Establishment of reconstructed human skin models	13
1.2.2 Reconstructed human skin models and their value in regulatory toxicology	16
2. OBJECTIVES OF THE THESIS	19
3. INTRODUCTION INTO THE EXPERIMENTAL PART	20
3.1 Characterisation of reconstructed human skin models	20
3.2 Skin corrosion testing	22
3.2.1 Skin corrosion test <i>in vivo</i>	22
3.2.2 Validation history of <i>in vitro</i> skin corrosion tests	23
3.3 Skin irritation testing	26
3.3.1 Skin irritation testing <i>in vivo</i>	26
3.3.2 Validation history of <i>in vitro</i> skin irritation tests	27
3.4 Phototoxicity feasibility study with reconstructed human skin model	30
4. MATERIALS AND METHODS	32
4.1. Material	32
4.1.1. Cell lines and reconstructed human skin models	32
4.1.1.1. Mouse fibroblast cell line Balb/c 3T3	32
4.1.1.2. Reconstructed human epidermal model EpiDerm	33
4.1.1.3. Reconstructed human epidermal model EPISKIN	34
4.1.1.4. Reconstructed human epidermal model SkinEthic	35
4.1.1.5. Reconstructed human epidermal model EST-1000	36
4.1.2. Test chemicals	37
4.1.2.1. Skin corrosion studies	37
4.1.2.2. Skin irritation studies	39
4.1.2.3. Phototoxicity studies	43
4.1.3. Reagents and solutions	45
4.1.4. Devices	47
4.2. Methods	50
4.2.1. Characterisation of reconstructed human skin models	50
4.2.1.1. Tissue morphology	50
4.2.1.2. Lipid analysis	51
4.2.1.3. Evaluation of the barrier function	53

4.2.2. Skin corrosion studies	55
4.2.2.1. Skin corrosion study using SkinEthic model	55
4.2.2.2. Skin corrosion study using EST-1000 model	58
4.2.3. Skin irritation studies	58
4.2.3.1. Skin irritation study using EpiDerm model	59
4.2.3.2. Skin irritation study using SkinEthic model	61
4.2.4. Phototoxicity studies	64
4.2.4.1. <i>In vitro</i> 3T3 NRU phototoxicity test	64
4.2.4.2. <i>In vitro</i> phototoxicity test using EpiDerm model	69
4.2.5. Statistical methods	74
4.2.5.1. Skin corrosion	74
4.2.5.2. Skin irritation	75
5. RESULTS AND DISCUSSIONS	76
5.1 Basic characterisation of the reconstructed skin models	76
5.1.1 Morphology of the reconstructed human skin models	76
5.1.2 Confocal laser scanning microscopy	78
5.1.3 Lipid analysis	80
5.1.4 Evaluation of the barrier function of the reconstructed human skin models	84
5.1.5 Discussion	87
5.2 Skin corrosion studies	90
5.2.1 Results obtained with the SkinEthic model	90
5.2.2 Discussion	95
5.2.3 Results obtained with EST-1000 model	99
5.2.4 Discussion	100
5.3 Skin irritation studies	101
5.3.1 Results obtained with EpiDerm model	101
5.3.2 Discussion	107
5.3.3 Results obtained with SkinEthic model	110
5.3.4 Discussion	118
5.4 Phototoxicity feasibility study	122
5.4.1 Results obtained with UV filters	122
5.4.2 Results obtained with essential plant oils	127
5.4.3 Discussion	133
6. GENERAL DISCUSSION	136
7. SUMMARY	143
8. LITERATURE	147
ANNEX	159
ABBREVIATIONS	165
CURRICULUM VITAE	167
