

**High Throughput Protein Purification
from *Escherichia Coli* for Functional
Proteomics**

Inaugural-Dissertation
zur Erlangung der Doktorwürde
des Fachbereichs Biologie, Chemie, Pharmazie
der Freien Universität Berlin

Eingereicht von
Pascal Braun

Berlin, 2003

This presented study was conducted at the Harvard Medical School under direct supervision of Prof. Ed Harlow.

1. Gutachter: Prof. E. Harlow

2. Gutachter: Prof. F. Hucho

Die Verteidigung fand am 6. Juni 2003 in Berlin-Dahlem statt.

Gesamtnote: sehr gut (magna cum laude)

Table of Contents

1. INTRODUCTION	5
1.1. High Throughput Experimentation	5
1.1.1. Foundations of Biological High Throughput Experimentation	5
1.1.2. The Potential of High Throughput Experimentation	10
1.1.3. Limitations of High Throughput Experimentation	16
1.1.4. Summary	19
1.2. Proteomics	21
1.2.1. Approaches in Proteomics	21
1.2.2. Functional Proteomics	23
1.2.3. Reagents for Functional Proteomics	30
1.2.4. Summary	33
1.3. High Throughput Protein Purification	34
1.3.1. Applications for HT Protein Purification Methods	34
1.3.2. Challenges of Parallel Protein Purification	39
1.3.3. Expression Systems	42
1.3.4. Summary	48
2. OBJECTIVES AND STRATEGY	49
3. METHODS	50
4. RESULTS	53
4.1. Parallel Protein Production Scheme	53
4.1.1. Standardization of Protein Expression	53
4.1.2. Parallel Protein Purification under Denaturing Conditions	56
4.2. Purification Chemistry for Functional Protein Production	59
4.2.1. Expression Constructs	59
4.2.2. Protein Expression	59
4.2.3. Evaluation of Protein Affinity Tags	62
4.2.4. Summary	71
4.3. High Throughput Protein Expression and Purification	73
4.3.1. Denaturing versus Non-denaturing Conditions	74

4.4. Parameters Influencing Protein Purification Success	76
4.4.1. Primary Structure	77
4.4.2. Structural Parameters	81
4.4.3. Parameters Related to Physiological Functions	83
4.4.4. Summary	87
5. DISCUSSION.....	88
5.1. Technical Development.....	88
5.1.1. Protein Expression	88
5.1.2. Protein Purification under Non-Denaturing Conditions	89
5.1.3. Purification under Non-denaturing Conditions.....	90
5.2. Heterologous Protein Expression in Bacteria.....	95
5.2.1. Functional Integrity of Bacterially Produced Proteins.....	95
5.2.2. Parameters Influencing Protein Purification Success in <i>E. coli</i>	96
5.3. Protein Production for Functional Proteomics	100
5.3.1. Coverage of Proteomes	101
5.3.2. Proteins for Focused Proteomics Approaches	102
6. REFERENCES	103
7. APPENDIX.....	117
Abstract	117
Zusammenfassung	118
Abbreviations	119
Publications	122
Curriculum Vitae	123
Acknowledgements	125
