

# Contents

<b>Introduction</b>	<b>1</b>
1.1 Scope and introduction . . . . .	1
1.2 Organization of the thesis . . . . .	3
<b>Analysis of classical diffusion in a potential well</b>	<b>5</b>
2.1 Introduction . . . . .	5
2.2 The discretization of the diffusion-convection equation	7
2.3 The discrete scheme and its relation to the Ehrenfest model . . . . .	9
2.4 The implicit scheme ( $\Theta$ – <i>Method</i> ) . . . . .	14
2.5 Convergence to the stationary solution of the model for time tending to infinity . . . . .	16
2.6 Random walk simulation . . . . .	18
2.7 The diffusion under the action of a general drift . . .	19
2.8 Numerical results . . . . .	22
<b>The discrete solution of the time-fractional diffusion with drift in a potential well</b>	<b>27</b>
3.1 Introduction . . . . .	27
3.2 The discrete solution of the time-fractional diffusion with drift . . . . .	29
3.3 The explicit solution of the diffusion equation with drift	32
3.4 The implicit scheme for solving the time-fractional diffusion equation with central linear drift( $\Theta$ -method)	33
3.5 Convergence to the stationary discrete solution for time tending to infinity . . . . .	35
3.6 Random walk simulation . . . . .	36
3.7 Numerical results . . . . .	38
<b>CTRW, fractional diffusion and the effect of the central linear drift</b>	<b>47</b>
4.1 Introduction . . . . .	47

4.2	The basic theory of CTRW and the compound renewal process . . . . .	49
4.3	The time-fractional integral equation of the CTRW and the memory function . . . . .	54
4.4	The relation between the integral equation of the CTRW and the fractional diffusion equation . . . . .	56
4.5	The space-fractional diffusion equation without and with central linear drift . . . . .	61
4.6	The simulation of the space-fractional diffusion equation without and with central linear drift . . . . .	68
4.7	Numerical results . . . . .	70
	<b>The convergence of the discrete solution of the space-time-FDE and the time-FDECLD for refinement of the grid</b>	<b>75</b>
5.1	Introduction . . . . .	75
5.2	Discretization of the time-FDE and conditions of convergence . . . . .	77
5.3	Discretization of the space-time-FDE and conditions of convergence . . . . .	81
5.4	The convergence of the time-FDECLD . . . . .	91
	<b>Appendix A: Important definitions</b>	<b>97</b>
	<b>Appendix B: Stable distributions and domain of attraction</b>	<b>103</b>
	<b>Appendix C: The Mittag-Leffler function</b>	<b>109</b>
	<b>Bibliography</b>	<b>113</b>
	<b>Summary</b>	<b>121</b>
	<b>Zusammenfassung</b>	<b>122</b>
	<b>Curriculum Vitae</b>	<b>123</b>
	<b>Acknowledgments</b>	<b>124</b>
	<b>Selbstständigkeitserklärung</b>	<b>125</b>
