

Acknowledgments

The work described in this thesis was performed at Max-Delbrück Center, Berlin.

I thankfully acknowledge Prof. Dr. Carmen Birchmeier, for giving me the opportunity to work in her research group, for the constructive advices and help in writing the thesis.

I'm grateful Dr Alistair Garratt for his valuable supervision, and for being a good example of enthusiastic and honest approach to science.

I would like to thank all my colleagues for help and collaboration, in particular Dr. Hagen Wende, for his patient help with the generation of the mutant mice, and Dr. Thomas Müller for good advice and discussion and for revising the thesis. I'm also grateful to Dr. Michael Stehle for help and advice with the bioinformatics analysis and to Carola Griffell, Petra Stallerow and Claudia Päser for excellent technical support. Thanks to Dr. Katja Reuter and Dr. Harish Babu for precious help in the lab and outside.

I will always remember them with a smile the friend who shared with me fun, frustration and success at the bench. Thanks!

Thanks to Fredrik for help with editing and more.
