

Table of Contents

1	Introduction	1
1.1	Breast Cancer and Estrogen	1
1.2	Estrogen Agonists and Antagonists	2
1.2.1	Agonists	2
1.2.2	Selective estrogen receptor modulators	2
1.2.3	Antagonists	4
1.3	Estrogen Receptor	4
1.3.1	Discovery of the estrogen receptor	4
1.3.2	Structure of the estrogen receptors	5
1.3.3	Estrogen receptor transcription	8
1.4	Estrogen and Antiestrogen Action through Estrogen Receptor	14
1.4.1	The X-ray crystal structure of ER LBD-ligand complexes	14
1.4.2	Comparison of estrogen and antiestrogen actions	20
2	Research Objectives	23
2.1	Stilbene Derivatives and Their Alkane Analogues	23
2.2	Research Objectives	24
3	Syntheses	27
3.1	Synthesis of Stilbene Derivatives	27
3.1.1	Synthesis of dimethoxystilbenes	27
3.1.1.1	Preparation of chloro-substituted 4-methoxybenzaldehydes	27
3.1.1.2	Synthesis of symmetric dimethoxystilbenes	29
3.1.1.3	Syntheses of asymmetric dimethoxystilbenes	32
3.1.1.3.1	Preparation of benzyl chlorides	32
3.1.1.3.2	Preparation of benzyltriphenylphosphonium chlorides.....	34
3.1.1.3.3	Condensation of benzyltriphenylphosphonium chlorides with benzaldehydes by Wittig reaction to dimethoxystilbenes	35

3.1.2	Synthesis of hydroxymethoxystilbenes	39
3.1.2.1	Preparation of chloro-substituted 4-hydroxybenzaldehydes	39
3.1.2.2	Crossed reductive coupling of hydroxybenzaldehydes with methoxy- benzaldehydes	41
3.1.3	Ether cleavage of dimethoxystilbenes to dihydroxystilbenes	44
3.2	Preparation of Tetrasubstituted Ethenes containing Two or More Aryl-substituents	47
3.2.1	Synthesis of 1,2-dialkyl-1,2-diarylethene	47
3.2.1.1	Preparation of 1,2-dicyclopropyl-1,2-bis(4-methoxyphenyl)ethene	47
3.2.1.2	Synthesis of 1,2-bis(3-bromopropyl)-1,2-bis(4-hydroxyphenyl)ethene	50
3.2.2	Synthesis of 2-alkyl-1,1,2-triarylethene	51
3.2.2.1	Preparation of deoxybenzoin	51
3.2.2.2	Alkylation of deoxybenzoin	52
3.2.2.3	Preparation of 2-alkyl-1,1,2-triarylethene by Grignard reaction	54
3.2.2.4	Preparation of 2-alkyl-1,1,2-triarylethenes by one-pot reductive coupling	57
3.2.2.5	Ether cleavage of 2-alkyl-1,1,2-triarylethenes 66, 68 and 69	58
3.3	Synthesis of Hydroxylated 1,2-Diaryl-1,2-diazidoethane	61
3.4	Synthesis of Tetrasubstituted 1,2-Diazidoethane	71
3.5	Synthesis of 1,2,3,5-Tetraarylcyclopentene	76
3.5.1	Preparation of 1,2,4,5-tetraaryl-1,5-pentandione	76
3.5.2	Stereospecific synthesis of 1,2,3,5-tetraarylcyclopentene	80
3.6	Synthesis of Triarylfuran Derivatives containing Diarylimidazole Unit ...	82
3.6.1	Cyclization of 1,2,4,5-tetraarylpentane-1,5-dione to 2,3,5-triarylfuran	82
3.6.2	Selective formylation of 2,3,5-tris(4-methoxyphenyl)furan	84
3.6.3	Synthesis of triarylfuran derivatives containing diarylimidazole unit	86
3.6.4	Ether cleavage of tris(4-methoxyphenyl)furan derivatives containing a diarylimidazole unit	89
4	Pharmacological Evaluation	91
4.1	Luciferase Assay System	91
4.1.1	MCF-7-2a cell line	91
4.1.2	Luciferase assay	92
4.2	Evaluation of Agonistic and Antagonistic Effects	93

4.2.1	Agonistic effect	93
4.2.2	Antagonistic effect	94
4.3	Results, Discussion and Conclusion	95
4.3.1	Halo-substituted 4,4'-dimethoxystilbenes	95
4.3.2	Halo-substituted 4-hydroxy-4' or 6'-methoxystilbenes	97
4.3.3	Substituted 4,4'(3')-dihydroxystilbenes	100
4.3.4	Comparison of estrogenic activities of halo-substituted dimethoxystilbenes and hydroxylated stilbenes	102
4.3.5	Tetrasubstituted ethenes containing at least two aryl-substituents	105
4.3.6	Substituted 1,2-diazido-1-(4-hydroxyphenyl)-2-(4 or 6-methoxyphenyl)- ethanes	108
4.3.7	Substituted 1,2-diazido-1,2-bis(4-hydroxyphenyl)ethanes	109
4.3.8	2-Alkyl-1,2-diazido-1,1,2-tris(4-methoxyphenyl)ethanes	114
4.3.9	1,2,3,5-Tetraarylcyclopent-1-enes	115
4.3.10	Triarylfurans containing a diarylimidazole unit	116
5	Summary	119
6	Experimental Section	122
6.1	Syntheses of the Target Compounds	122
6.1.1	General methods	122
6.1.2	Chloro-substituted benzaldehydes 3 - 5	123
6.1.3	Symmetric dimethoxystilbenes 8 - 11	124
6.1.4	2-Halo-4-methoxybenzyl alcohol 13 and 14	127
6.1.5	2-Halo-4-methoxybenzyl chloride 15 and 16	128
6.1.6	Substituted benzyltriphenylphosphonium chlorides 19 - 22	129
6.1.7	Asymmetrical dimethoxystilbenes 23 - 29E / Z	130
6.1.8	Chloro-substituted 4-hydroxybenzaldehyde 30 and 31	138
6.1.9	(<i>E</i>)-4-Hydroxy-4'(3')-methoxystilbenes 33 - 40	139
6.1.10	(<i>E</i>)-Dihydroxystilbenes 41 - 51	144
6.1.11	Cyclopropyl-(4-methoxyphenyl)methanone 53	150
6.1.12	1,2-Dialkyl-1,2-diarylethene 54 and 55	151
6.1.13	1,2-Diarylethanone 58 and 59	153

6.1.14	2-Alkyl-1,2-diarylethanones 63 - 65	154
6.1.15	2-Alkyl-1,1,2-triarylethenes 66 - 69	156
6.1.16	2-Alkyl-1,1,2-triarylethenes 75 - 77	159
6.1.17	Hydroxylated 2-alkyl-1,1,2-triarylethenes 78 - 80	161
6.1.18	Hydroxylated 1,2-diaryl-1,2-diazidoethanes 81 - 95	163
6.1.19	Tetrasubstituted 1,2-diazidoethane 96, 97 and 3-azido-2-(4-methoxy- phenyl)-1,1-diphenylprop-1-ene 99	173
6.1.20	1,2,4,5-Tetraarylpentane-1,5-diones 101 - 104	175
6.1.21	1,2,3,5-Tetraarylcyclopent-1-enes 106 - 108	177
6.1.22	2,3,5-Triarylfuran 109 and 110	179
6.1.23	2-Methoxy-5-[2,5-bis(4-methoxyphenyl)furan-3-yl]benzaldehyde 113	181
6.1.24	4,5-Diaryl-2-{5-[2,5-diarylfuran-3-yl]-2-aryl}-1H-imidazoles 117 - 119	182
6.1.25	4,5-Diaryl-2-{5-[2,5-diarylfuran-3-yl]-2-aryl}-1H-imidazole 120 and 121	183
6.2	Pharmacological Tests	185
6.2.1	Biochemicals, chemicals and materials	185
6.2.2	Cell lines and growth conditions	186
6.2.3	Transcriptional binding assay, luciferase assay	186
7	Abbreviation	192
8	References	194
