

**Expression and Regulation of the Neuronal Calcium Sensor Protein
VILIP-1 and Effect on the $\alpha 4\beta 2$ nAChR in Rat Hippocampal
Neurons and Cell lines: Implications for Synaptic Plasticity**

**Inaugural-Dissertation
to obtain the academic degree
Doctor rerum naturalium (Dr. rer. nat.)
submitted to the Department of Biology, Chemistry and Pharmacy
of Freie Universität Berlin**

by

**M.Sc. CongJian Zhao
from YunNan, P.R. China**

August, 2007

Referees:

- 1. PD. Dr. Karl-Heinz Braunewell**
- 2. Prof. Dr. Dietmar Kuhl**

Date of defence: 14-Feb-2008

Acknowledgements

PD. Dr. Karl-Heinz Braunewell
for this wonderful project and being a continuous source of ideas

PD. Dr. Tengis Gloveli and Prof. Dr. Uwe Heinemann
for patch clamp guidance in a physiological world

Prof. Dr. Alfred Maelicke
for kindly donating stable transfected alpha4 beta2 nAChR HEK293 cell line

Dr. Siegrun Gabriel
for introducing me to extracellular recording

Dr. Oliver Kann and Dr. Richard Kovacs
for introducing me to calcium imaging

Dr. Christine Gebhardt
for data analysis and a lot of fruitful discussions

Dr. Hans-Jürgen Gabriel and Dr. Herbert Siegmund
for sophisticated electronics including computers

Dr. Bernd Grünewald
for preparing Multi-barrel Micropipette and a lot of fruitful discussions

Dr. Christoph Behrens, Dr. Jakub Otáhal, Dr. Marian Brackmann
for a lot of fruitful discussions

My family and parents
for continuous support during all time

Abstract	1
I. Introduction	2
1. Neuronal Ca ²⁺ homeostasis and signaling.....	2
2. Calcium binding proteins	6
2.1 Neuronal calcium sensors: a conserved calcium-binding protein family	6
3. Effect of VILIP-1 on the $\alpha 4\beta 2$ nicotinic acetylcholine receptor (nAChR).....	11
3. 1 Brief introduction of acetylcholine receptors	11
3. 2 Effect of VILIP-1 on the $\alpha 4\beta 2$ nAChR	14
4. Potential role of NCS proteins in hippocampal synaptic plasticity in health and disease	15
II. Aim of this work	17
III. Materials and methods	18
1. Antibodies	18
2. <i>In vivo</i> application of drugs	18
3. Western blotting and immunodetection	19
4. Western blot analysis of rat hippocampi.....	19
5. Western blot data analysis	19
6. Immunofluorescence and fluorescence imaging	20
7. Cell culture, transient transfection and stable human $\alpha 4\beta 2$ nAChR transfected HEK293 cell	21
8. Primary hippocampal neurons culture and transient transfection.....	21
9. Immunocytochemistry for cultured hippocampal neurons.....	21
10. Electrophysiological measurements	22
10. 1 Measurement of $\alpha 4\beta 2$ nAChR currents in HEK293 cells and hippocampal neurons	22
10. 2 Measurement of inhibitory postsynaptic currents (IPSCs) in hippocampal neurons.....	23
10. 3 Measurement of intrinsic properties in hippocampal neurons.....	23
IV. Results	24
1. Western blot analysis of the expression of NCS proteins in peripheral tissues	24
2. Distribution of VILIP-1 in rat hippocampus	25
2.1. Overview of VILIP-1 expression in rat hippocampus.....	25
2.2. Co-localization of VILIP-1 with GABAergic neuronal marker GAD67.....	28

2.3. Co-localization of VILIP-1 with Parvalbumin (PV)	29
2.4. Co-localization of VILIP-1 with Calbindin-D28k.....	30
2.5. Co-localization of VILIP-1 with Calretinin (CR).....	31
2.6. Co-localization of VILIP-1 with mGluR1 α	32
2.7. Co-staining of VILIP-1 with PSA-NCAM.....	33
2.8. VILIP-1 and $\alpha 4\beta 2$ nAChR show partial co-localization in hippocampal neurons	34
3. Localization of endogenously expressed VILIP-1 in cultured hippocampal neurons and translocation to the plasma membrane after physiological stimulation	35
4. Effect of nicotine stimulation on VILIP-1 $\alpha 4\beta 2$ nAChR co-localization: comparison of translocation of VILIP-1 induced by the activation of nAChR and ionotropic glutamate receptor	38
5. VILIP-1 affects responsiveness of $\alpha 4\beta 2$ nAChR to ACh in transiently and stably transfected HEK cells .	40
6. VILIP-1 affects responsiveness of $\alpha 4\beta 2$ nAChR to ACh in transfected hippocampal neurons	41
7. Comparison of the effect of $\alpha 4\beta 2$ nAChR activation on inhibitory postsynaptic currents (IPSCs) recorded from GFP control and GFP-VILIP-1 transfected hippocampal neuronal cultures.	43
8. Time-dependent upregulation of VILIP-1 and NCS-1 expression following application of DHPG in the hippocampus <i>in vivo</i>	45
9. Intrinsic electrophysiological properties of VILIP-1 transfected hippocampal neurons	46
V. Discussion	49
1. The expression of NCS proteins in peripheral tissues.....	49
2. The distribution of VILIP-1 in rat hippocampus	49
3. Redistribution of endogenous VILIP-1 triggered via nAChR in hippocampal neurons.....	52
4. Neuronal Ca ²⁺ -sensor protein VILIP-1 is a physiological modulator for functional up-regulation of $\alpha 4\beta 2$ nAChR: possible link to synaptic plasticity	54
5. VILIP-1 enhances inhibitory GABAergic transmission to pyramidal neurons	55
6. Time-dependent upregulation of VILIP-1 and NCS-1 expression following application of DHPG in the hippocampus <i>in vivo</i>	57
7. Intrinsic electrophysiological properties of VILIP-1 transfected hippocampal neurons	58
8. Possible implications for synaptic plasticity and hippocampal network activity: a working hypothesis	59
VI. Conclusion and Prospects.....	62
VII. Zusammenfassung	64
VIII. Reference.....	66
Resume	83
Appendix	85
