13. Acknowledgements and Words of Thanks

First and foremost, I would like to express my gratitude to Prof. Jack Szostak for giving me the opportunity to perform the research for my doctoral thesis in his laboratory.

I would also like to thank Prof. Volker Erdmann for his support as my German supervisor.

Thank you for the privilege of being your student.

I am also very much indebted to the members of the Szostak laboratory. Special thanks go to Pepita, James, Jonathan, Tony, Burckhard, Glen, Andrej, John, Irene and Sasha for many stimulating discussions on K_d measurements and statistics.

I would not have been able to achieve all this without the help of my parents. To my family I owe more than to anyone else. They have been pillars of support I could rely on at all times. They have guided me, encouraged me, and sustained me. Most of all, they have always believed in me. All of this means more to me than I am able to express here in words.
