

Table of Contents

1	INTRODUCTION	1
1.1	Indolizidines as Natural Products	1
1.1.1	Pumiliotoxins	2
1.1.2	Polyhydroxylated Indolizidines	10
1.2	Azoninones as Key Intermediates in Natural Product Synthesis	13
1.2.1	Synthesis of Azoninones	13
1.2.2	Construction of Indolizidinone Framework by Ring Contraction of Azoninones	16
1.3	Objectives	20
2	RESULTS AND DISCUSSION	22
2.1	Syntheses of Azoninones - Unsaturated Nine-Membered Ring Lactams	22
2.1.1	Syntheses of Vinyl pyrrolidines	22
2.1.2	Aza-Claisen Rearrangement of Vinyl pyrrolidines	24
2.1.3	Mechanistic Conclusions	28
2.2	The Planar Chirality of Azoninones	36
2.2.1	Planar Chirality in Medium-Sized Rings	38
2.2.2	Kinetic Studies of the <i>pS-pR</i> Isomerisation in Azoninones	43
2.2.3	Conformational Analysis of Azoninones via NOE Spectroscopy	49
2.2.4	Comparison of Experimental and Theoretical Structural Models of Azoninones	53
2.2.5	Conclusions	57
2.3	Transannular Reactions of Optically Active Azoninones	58
2.3.1	Cyclisation Reactions of Kinetically Formed <i>pS</i> Lactams	59
2.3.2	Cyclisation Reactions of Thermodynamically Formed <i>pR</i> Lactams	61
2.3.3	Mechanistic Conclusions	62
2.3.4	Synthesis of Hydroxy Indolizidines from Transannular Cyclisation Products by Nucleophilic Substitution	64
2.4	Cycloaddition Reactions of Optically Active Azoninones	67
2.4.1	Epoxidation Reactions	67
2.4.2	Aziridination Reactions	70
2.4.3	Cyclopropanation Reactions	71
2.4.4	Dihydroxylation Reactions	73
2.4.5	Conclusions	75

2.5	Synthesis of Hydroxy Indolizidinones by Ring Opening Reactions of Epoxy Azonanones	76
2.5.1	Lewis Acid Promoted Epoxide Opening	77
2.6	Total Syntheses of Pumiliotoxins (Part I) - Preparation of the Bicyclic Core	83
2.6.1	Synthesis of Hydroxy Indolizidinones via Hydrogenation of Epoxy Azonanones.....	83
2.6.2	Introduction of the Tertiary Stereogenic Centre	84
2.7	Total Syntheses of Pumiliotoxins (Part II) - Synthesis of the Side Chain subunit.....	86
2.8	Total Syntheses of Pumiliotoxins (Part III) - Aldol approach.....	88
2.8.1	Attachment of the Side Chain by Aldol Addition.....	90
2.9	Total Syntheses of Pumiliotoxins (Part IV) - Horner Approach.....	95
2.9.1	Introduction of the Side Chain via Horner-Wittig Reaction	97
2.9.2	Attempts for the Introduction of the C-5 Methyl Group.....	101
2.9.3	Total Synthesis of <i>epi</i> -Pumiliotoxin 209F and Pumiliotoxin 209F-amide [85].....	102
2.9.4	Total Synthesis of (+)-Pumiliotoxin 251D	105
2.10	Summary and Outlook.....	108
3	EXPERIMENTAL PART	112
3.1	Materials and Methods	112
3.1.1	General	112
3.1.2	NMR-Spectroscopy	112
3.1.3	IR-Spectroscopy	112
3.1.4	MS-Spectroscopy	113
3.1.5	Polarimetry	113
3.1.6	Chromatography	113
3.2	Syntheses of Vinyl pyrrolidines	114
3.3	Preparation of Acid Fluorides	125
3.4	Aza-Claisen Rearrangements.....	127
3.5	Transannular Ring Contractions	144
3.6	Preparation of Hydroxy Indolizidinones by Substitution Reactions	178
3.7	Cycloaddition Reactions.....	182
3.8	Synthesis of Hydroxy Indolizidinones by Ring Opening Reactions of Epoxy Azonanones	213
3.9	Total Syntheses of Pumiliotoxins (Part I) - Preparation of the Bicyclic Core	225

3.10	Total Syntheses of Pumiliotoxins (Part II) - Preparation of the Side Chain	234
3.11	Total Syntheses of Pumiliotoxins (Part III) - Aldol approach	242
3.12	Total Syntheses of Pumiliotoxins (Part IV) - Horner Approach	248
4	APPENDIX	272
4.1	X-ray Data	272
4.1.1	Crystallographic Data of <i>pS</i> -Azoninone [12a].....	273
4.1.2	Crystallographic Data of <i>pS</i> -Azoninone [12b]	274
4.1.3	Crystallographic Data of Nitroindolizidinone [52].....	275
4.1.4	Crystallographic Data of Epoxy Azonanone [35a].....	275
4.1.5	Crystallographic Data of Epoxy Azonanone [35b].....	276
4.1.6	Crystallographic Data of Epoxy Azonanone [38a].....	277
4.1.7	Crystallographic Data of Epoxy Azonanone [39a].....	278
4.1.8	Crystallographic Data of Epoxy Azonanone [37b].....	279
4.1.9	Crystallographic Data of Methano Azonanone [42a]	280
4.1.10	Crystallographic Data of Hydroxy Indolizidinone [54].....	281
4.1.11	Crystallographic Data of (+)-Pumiliotoxin 251D-hydrochloride [92].....	282
4.2	List of Compounds	283
4.2.1	Pyrrolidines	283
4.2.2	Azoninones	284
4.2.3	Indolizidinones	284
4.2.4	Azonanones	285
4.2.5	Compounds described in the part Total Synthesis of Pumiliotoxins	286
