

LIST OF FIGURES

Figure 1:	Structure of the nucleosome.....	9
Figure 2:	Links between DNA methylation, histone acetylation and transcriptional repression.....	11
Figure 3:	Regulation of signalling through Rho-GTPases.....	13
Figure 4:	Rho-GTPase signalling and genes with established involvement in cognitive function.....	14
Figure 5:	Patient 1 molecular cytogenetic studies.....	37
Figure 6:	Patient 1 X chromosome breakpoint localisation.....	38
Figure 7:	<i>NXT2</i> Northern blot hybridisations.....	39
Figure 8:	Patient 2 molecular cytogenetic studies.....	40
Figure 9:	Analysis of <i>ABCB7</i> transcripts in Patient 2.....	41
Figure 10:	Patient 3 molecular cytogenetic studies.....	43
Figure 11:	Patient 3 X chromosome breakpoint region and cosmid library screening results.....	44
Figure 12:	Analysis of <i>ZNF41</i> transcripts in Patient 3.....	45
Figure 13:	Patient 3 X chromosome breakpoint localisation.....	46
Figure 14:	Patient 3 breakpoint cloning and chromosome 7 breakpoint confirmation by FISH.....	47
Figure 15:	Further RT-PCR analysis of <i>ZNF41</i> transcripts in Patient 3.....	48
Figure 16:	<i>ZNF41</i> northern blot hybridisations.....	49
Figure 17:	MRX family P13 with P111L mutation.....	51
Figure 18:	MRX family P42 with intronic splice-site mutation.....	52
Figure 19:	Analysis of <i>ZNF41.3</i> transcripts in family P42 index patient.....	53
Figure 20:	Analysis of <i>ZNF41.9</i> transcripts in family P42 index patient.....	55
Figure 21:	Analysis of transcripts affected by splice-site mutation in MRX family P42..	56
Figure 22:	Patient 4 molecular cytogenetic studies.....	58
Figure 23:	Patient 4 chromosome 14 breakpoint localisation.....	59
Figure 24:	Summary of disrupted transcripts in Patient 4.....	60
Figure 25:	Patient 5 molecular cytogenetic studies.....	62
Figure 26:	<i>JNK3</i> coding sequence with respect to FISH mapped genomic clones.....	64
Figure 27:	Patient 5 chromosome 4 breakpoint localisation.....	65
Figure 28:	Analysis of truncated <i>JNK3</i> protein present in Patient 5.....	67
Figure 29:	Over-expression of <i>JNK3</i> -EGFP fusion proteins in mammalian cells.....	68
Figure 30:	Over-expression of FLAG-tagged <i>JNK3</i> proteins in mammalian cells.....	69
Figure 31:	Signalling cascades that link the Rho-GTPases with the <i>JNK</i> proteins.....	85
Figure 32:	<i>JNK3</i> binding partners and scaffolding proteins.....	86
