

Basin Scale Sedimentary and Water Quality Responses to External Forcing in Lake Abaya, Southern Ethiopian Rift Valley

PhD Thesis

Submitted by

Bogale Gebremariam

Disputationsdatum: 02.07. 2007

Chairman of the Examination Board:

Univ. Prof. Dr. Brigitta Schütt

Freie Universität Berlin

Supervisors:

Univ. Prof. Dr. Brigitta Schütt

Freie Universität Berlin

Univ. Prof. Dr.-Ing Gerd Förch

Universität Siegen

Table of Contents

Abstract	i
Acknowledgment	ii
1. Introduction	1
2. The Study Site	2
2.1. Climate	4
2.2. Hydrology	12
2.3. Lake water quality	15
2.4. Geology	16
2.5. Present day morphodynamics	18
2.6. Land use and land cover	19
3. Water circulation and sediment dynamics of large shallow lakes	21
3.1. Dynamics of winds in the coastal regions	22
3.2. Response of lakes to wind stress forcing	25
3.3. Large scale motion in lakes	26
3.3.1. Effect of friction	28
3.3.2. Effect of water depth	28
3.3.3. Effect of surface waves	29
3.4. Sediment dynamics	30
3.5. Study Objectives	33
4. Methods	34
4.1. Meteorology	34
4.2. Sedimentology	36
4.3. Water quality	38
5. Results	42
5.1. Meteorology	42
5.1.1. The wind field	42
5.1.1.1. Diurnal variation of the wind	43
5.1.1.2. Monthly variability of wind field	48
5.1.1.3. Periodicity analysis	50
5.1.2. Temperature	52
5.1.2.1. Diurnal variability of temperature	56
5.1.2.2. Interdiurnal variability of temperature	56
5.1.3. Atmospheric pressure oscillation	60
5.1.3.1. Daily variation of mean atmospheric pressure	62
5.2. Sedimentology	63

5.2.1.	Sediment distribution	63
5.2.2.	Sediment composition	65
5.2.2.1.	quartz	65
5.2.2.2.	Feldspar	67
5.2.2.3.	Clay	68
5.2.2.4.	Calcite	69
5.2.2.5.	Organic carbon	70
5.2.2.6.	Carbonate carbon	71
5.2.2.7.	Trace minerals	71
5.2.3.	Interrelationships between variables	73
5.2.4.	Cluster Analysis	76
5.3.	Water Quality	77
5.3.1.	Water temperature	77
5.3.2.	pH	79
5.3.3.	Conductivity	79
5.3.4.	Dissolved oxygen	80
5.3.5.	Suspended solids	81
5.3.6.	Dissolved solids	83
5.3.7.	Secchi depth distributions	84
5.3.8.	Interrelationship between quality parameters	85
6.	Discussions	88
6.1.	Meteorology	88
6.1.1.	The wind Field	88
6.1.2.	Temperature	89
6.1.3.	Atmospheric pressure	90
6.2.	Sedimentology	90
6.2.1.	Texture	90
6.2.2.	Mineral composition	92
6.3.	Water quality	95
7.	Conclusions and recommendations	98
Appendix A.	Mineralogical composition of surficial sediments in Lake Abaya (vol. %)	107
Appendix B.	Contour plots of water quality parameters showing depth profiles at fixed monitoring stations vs. Julian days of sampling.	124
Appendix C.	Variations in water quality parameters at fixed monitoring stations during sampling period.	136
