Basin Scale Sedimentary and Water Quality Responses to External Forcing in Lake Abaya, Southern Ethiopian Rift Valley

PhD Thesis

Submitted by
Bogale Gebremariam
Disputationsdatum: 02.07. 2007

Chairman of the Examination Board:
Univ. Prof. Dr. Brigitta Schütt Freie Universität Berlin

Supervisors:
Univ. Prof. Dr. Brigitta Schütt Freie Universität Berlin
Univ. Prof. Dr.-Ing Gerd Förch Universität Siegen
Table of Contents

Abstract i
Acknowledgment ii

1. Introduction 1

2. The Study Site 2
   2.1. Climate 4
   2.2. Hydrology 12
   2.3. Lake water quality 15
   2.4. Geology 16
   2.5. Present day morphodynamics 18
   2.6. Land use and land cover 19

3. Water circulation and sediment dynamics of large shallow lakes 21
   3.1. Dynamics of winds in the coastal regions 22
   3.2. Response of lakes to wind stress forcing 25
   3.3. Large scale motion in lakes 26
      3.3.1. Effect of friction 28
      3.3.2. Effect of water depth 28
      3.3.3. Effect of surface waves 29
   3.4. Sediment dynamics 30
   3.5. Study Objectives 33

4. Methods 34
   4.1. Meteorology 34
   4.2. Sedimentology 36
   4.3. Water quality 38

5. Results 42
   5.1. Meteorology 42
      5.1.1. The wind field 42
         5.1.1.1. Diurnal variation of the wind 43
         5.1.1.2. Monthly variability of wind field 48
         5.1.1.3. Periodicity analysis 50
      5.1.2. Temperature 52
         5.1.2.1. Diurnal variability of temperature 56
         5.1.2.2. Interdiurnal variability of temperature 56
      5.1.3. Atmospheric pressure oscillation 60
         5.1.3.1. Daily variation of mean atmospheric pressure 62
   5.2. Sedimentology 63
5.2.1. Sediment distribution
5.2.2. Sediment composition
5.2.2.1. Quartz
5.2.2.2. Feldspar
5.2.2.3. Clay
5.2.2.4. Calcite
5.2.2.5. Organic carbon
5.2.2.6. Carbonate carbon
5.2.2.7. Trace minerals
5.2.3. Interrelationships between variables
5.2.4. Cluster Analysis
5.3. Water Quality
5.3.1. Water temperature
5.3.2. pH
5.3.3. Conductivity
5.3.4. Dissolved oxygen
5.3.5. Suspended solids
5.3.6. Dissolved solids
5.3.7. Secchi depth distributions
5.3.8. Interrelationship between quality parameters
6. Discussions
6.1. Meteorology
6.1.1. The wind field
6.1.2. Temperature
6.1.3. Atmospheric pressure
6.2. Sedimentology
6.2.1. Texture
6.2.2. Mineral composition
6.3. Water quality
7. Conclusions and recommendations
Appendix A. Mineralogical composition of surficial sediments in Lake Abaya (vol. %)
Appendix B. Contour plots of water quality parameters showing depth profiles at fixed monitoring stations vs. Julian days of sampling.
Appendix C. Variations in water quality parameters at fixed monitoring stations during sampling period.
