
Publikationen

Daniel PT, Pun KT, **Ritschel S**, Sturm I, Holler J, Dörken B, Brown R: Expression of the death gene Bik/Nbk promotes sensitivity to drug-induced apoptosis in corticosteroid-resistant T-cell lymphoma and prevents tumor growth in severe combined immunodeficient mice. *Blood* 1999, 94:1100-1107

Daniel PT, Sturm I, **Ritschel S**, Friedrich K, Dörken B, Bendzko P, Hillebrand T: Detection of genomic DNA fragmentation during apoptosis (DNA ladder) and the simultaneous isolation of RNA from low cell numbers. *Anal Biochem* 1999, 266:110-115

Friedrich K, Wieder T, Von Haefen C, **Radetzki S**, Janicke R, Schulze-Osthoff K, Dörken B, Daniel PT: Overexpression of caspase-3 restores sensitivity for drug-induced apoptosis in breast cancer cell lines with acquired drug resistance. *Oncogene* 2001, 20:2749-2760

Sturm I, Petrowsky H, Volz R, Lorenz M, **Radetzki S**, Hillebrand T, Wolff G, Hauptmann S, Dörken B, Daniel PT: Analysis of p53/BAX/p16(ink4a/CDKN2) in esophageal squamous cell carcinoma: high BAX and p16(ink4a/CDKN2) identifies patients with good prognosis. *J Clin Oncol* 2001, 19:2272-2281

Radetzki S, Köhne C, Von Haefen C, Gillissen B, Sturm I, Dörken B, Daniel PT: The apoptosis promoting Bcl-2 homologues Bak and Nbk/Bik overcome drug resistance in Mdr-1-negative and Mdr-1-overexpressing breast cancer cell lines. *Oncogene* 2002, 21:227-238

Poster

Daniel PT, **Ritschel S**, Koehne CH, Dörken B: The apoptosis promoting Bcl-2 family member Bik/Nbk-1 is a chemosensitizer for cytostatic drug-induced apoptosis of mature T leukemia cells. 4th International Symposium on Cytostatic Drug Resistance, Berlin 1997

Ritschel S, Friedrich K, Brown R, Köhne CH, Dörken B, Daniel PT: Bik/Nbk-1, an apoptosis promoting novel member of the Bcl-2 family, increases drug-sensitivity of mature T leukemia cells. Cold Spring Harbor Laboratory Conference, NY 1997, 17.-21. September:225

Daniel PT, **Ritschel S**, Holler J, Brown R, Mapara M, Köhne CH, Dörken B: Bik/Nbk-1, an apoptosis promoting novel member of the Bcl-2 family, increases drug-sensitivity of mature T leukemia cells. Deutsche Gesellschaft für Hämatologie und Onkologie, Linz 1997, 12.-15. Oktober, Sonderheft zu Band 20:46

Daniel PT, **Ritschel S**, Koehne CH, Dörken B: Role of the CD95 (Fas/Apo-1) ligand in cytostatic drug-induced apoptosis. Molecular Biology of Hematopoiesis, Hamburg 1997, 2.-6. Juli, 10th Symposium:85

Daniel PT, **Ritschel S**, Koehne CH, Dörken B: Role of the CD95 (Fas/APO-1) ligand in cytostatic drug-induced apoptosis. Congress of Molecular Medicine , Berlin 1997, 3.-5. Mai, 75 No 5:B105

Daniel PT, **Ritschel S**, Brown R, Pezzutto A, Köhne CH, Dörken B: Bik/Nbk-1, an apoptosis promoting novel member of the Bcl-2 family, increases drug-sensitivity of mature T leukemia cells. American Society for Hematology, San Diego, California 1997, 5. - 9. December

Daniel PT, **Ritschel S**, Sturm I, Köhne CH, Dörken B: Reversal of classical, P-glycoprotein-mediated and atypical drug resistance by overexpression of the apoptosis promoters Bak and Bik/Nbk-1. Deutsche Gesellschaft für Hämatologie und Onkologie, Frankfurt (Annals of Hematology) 1998, 25.-28. Oktober, Supplement II to Volume 77:S 38

Daniel PT, **Ritschel S**, Sturm I, Brown R, Köhne CH, Dörken B: Reversal of classical, P-glycoprotein-mediated drug resistance by overexpression of the apoptosis promoters bak and bik/nbk-1. American Association for Cancer Research, New Orleans, LA 1998, 28. März - 1. April, 39:599

Daniel PT, Pun T, **Ritschel S**, Sturm I, Köhne CH, Brown R, Dörken B: Bik/Nbk-1, a death-promoting Bcl-2 family member, induces sensitivity for drug-induced apoptosis in corticosteroid-resistant T lymphoma cells and prevents tumor growth in scid mice. American Association for Cancer Research, Philadelphia 1999, 10.-14. April

Daniel PT, Pun T, **Ritschel S**, Sturm I, Köhne CH, Brown R, Dörken B: Bik/Nbk-1, a death-promoting Bcl-2 family member, induces sensitivity for drug-induced apoptosis in corticosteroid-resistant T lymphoma cells and prevents tumor growth in scid mice. VII International Conference on Malignant Lymphoma, Lugano (Annals of Oncology) 1999, 2.-5. Juni, 10 Supplement 3:51

Ritschel S, Von Haefen C, Jordan A, Wust P, Felix R, Dörken B, Daniel PT: Reversal of thermoresistance by overexpression of the apoptosis promoter bak in gastric cancer cells 18th Annual Meeting of the ESHO, Rotterdam, Netherlands 1999
