

# List of Tables

3.1	Important experimental parameters for the Helium scattering apparatus . . . . .	43
4.1	Overview of different quasicrystalline phases of Al-Ni-Co with their structural characteristics . . . . .	58
5.1	Desorption temperatures of the Sb and Bi mono- and multilayers . . . . .	102
5.2	Observed diffraction peaks of the Sb and Bi monolayer on the fivefold surface of i-Al-Pd-Mn . . . . .	106
5.3	Observed diffraction peaks of the clean Al-Ni-Co(00001) surface and the Sb and Bi monolayers . . . . .	109
6.1	Observed and theoretical real space lattice parameters of AIAs and the periodic average structure of d-Al-Ni-Co . . . . .	132
