

Acknowledgments

I would like to thank Prof. Dr. Dr. h.c. G. Kaindl for the opportunity to work in his group. I am very grateful for his continuous support and encouragement during this work. I am thankful to Prof. V. K. Adamchuk for recommending me to Prof. Kaindl and her willingness to co-assess this work.

I would like to thank my supervisor Dr. K. Starke. I am deeply appreciating his great help during the work and in preparing this thesis.

Special thanks go to Dr. S. Gorovikov and Dr. G. Bihlmayer for the intense and fruitful cooperation. Without their contributions this work would have been hardly feasible. I am grateful to Prof. S. Bluegel for the fruitful discussions and clear answers to the questions concerning the presented work. I am very grateful for the experience that physical problems can be efficiently treated in teamwork.

I thank the members of the working team Dr. J. E. Prieto, Dr. F. Heigl, and K. Doebrich for the discussions and help during the many beamtimes and in the laboratory.

Furthermore, I would like to thank Prof. F. G. Garcia de Abajo for introducing me to the field of photoelectron diffraction and providing the EDAC computer code.

I would like to thank Prof. M. Wolf and the members of his group, Dr. A. Melnikov and Dr. U. Bowensiepen, for the experience that I acquired during the time of our collaboration.

I thank all members of the group of Prof. Kaindl for providing the friendly atmosphere and for numerous fruitful discussions during the time when I was working on this project.

I owe deep gratefulness to my wife Olga for her love and support in these years, and to my parents for their help and patience.
