

Identification and Characterization of
***Legionella pneumophila* Phospholipases A and their**
Role in Virulence

Inaugural-Dissertation
zur Erlangung des akademischen Grades Dr. rer. nat.
am Fachbereich Biologie, Chemie, Pharmazie
der Freien Universität Berlin

vorgelegt von
Sangeeta Banerji
am Institut für Chemie und Biochemie
Berlin 2006

Die vorliegende Arbeit wurde im Zeitraum von September 2002 bis Mai 2006 in der Arbeitsgruppe von Frau Dr. Antje Flieger (NG 5, „Pathogenese der *Legionellen*infektion“) am Robert Koch-Institut angefertigt.

1. Gutachter: PD Dr. Bernhard Hube, FG16, Robert Koch-Institut
2. Gutachter: Prof. Dr. Gerd Multhaupt, FB Biochemie, Freie Universität Berlin

Eingereicht am: 3. Mai 2006, Berlin

Disputation am: 18. August 2006, Berlin

Selbständigkeitserklärung

Hiermit erkläre ich, dass ich die vorliegende Arbeit selbst angefertigt und keine anderen als die angegebenen Hilfsmittel verwendet habe. Ich versichere, dass ich diese Arbeit weder in dieser noch in einer anderen Form bei einer anderen Prüfungsbehörde eingereicht habe.

Berlin, den 03.05.2006

Sangeeta Banerji

To my parents and my brother

Table of contents

1. Summary	1
1.1 Summary (English).....	1
1.2 Summary (German).....	3
2. Introduction	6
2.1 Importance of <i>Legionella</i>	6
2.2 Intracellular life cycle of <i>Legionella pneumophila</i>	7
2.3 Virulence factors of <i>L. pneumophila</i>	8
2.3.1 Type IV secretion systems of <i>L. pneumophila</i>	9
2.3.2 Type II secretion system.....	11
2.3.3 Other virulence factors.....	13
2.4 <i>L. pneumophila</i> lipids and pathways of lipid biosynthesis	14
2.4.1 Membrane phospholipids of <i>L. pneumophila</i>	14
2.4.2 Pathways of bacterial lipid biosynthesis	15
2.5 Bacterial lipolytic enzymes and their role in virulence	17
2.5.1 Characteristic features of lipases.....	17
2.5.2 Classification of bacterial lipases	19
2.5.3 <i>L. pneumophila</i> lipases.....	20
2.5.4 Role of phospholipases in bacterial virulence.....	21
2.6 Aim of the study	23
3. Materials and methods	24
3.1 Materials	24
3.1.1 Equipment	24
3.1.2 Special materials	26
3.1.3 Chemicals and lipids	27
3.1.4 Kits	30
3.1.5 Buffers and solutions	31
3.1.6 Culture media	33
3.1.7 Antibiotics.....	35
3.1.8 Enzymes.....	36
3.1.8.1 Restriction endonucleases	36
3.1.8.2 Polymerases.....	37
3.1.8.3 Further enzymes	37
3.1.9 Primers.....	38
3.1.10 Plasmids	44
3.1.11 Strains.....	47
3.1.12 DNA standards	52
3.1.13 Software.....	53
3.2 Methods.....	54
3.2.1 Growth conditions of bacterial and eukaryotic strains.....	54
3.2.1.1 Bacterial strains and growth conditions.....	54
3.2.1.2 Eucaryotic cells and growth conditions	55
3.2.2 DNA techniques	55
3.2.2.1 PCR.....	55
3.2.2.2 Nucleic acid isolation.....	60
3.2.2.3 Gene cloning	61
3.2.2.4 Electroporation.....	62

3.2.2.5 Southern hybridization	62
3.2.2.6 Construction of <i>L. pneumophila</i> mutants and complemented clones	63
3.2.3 Preparations of culture supernatants and cell lysates.....	65
3.2.4 Assays and detection methods.....	66
3.2.4.1 Enzymatic assay for lipolytic activities.....	66
3.2.4.2 Lipid extraction and thin layer chromatography	68
3.2.4.3 Detection of esterase and phosphatase activities.....	68
3.2.5 Intracellular infection of U937 cells and <i>A. castellanii</i> amoebae.....	68
3.2.6 Biochemical protein purification	69
4. Results	71
4.1 Screening the <i>L. pneumophila</i> genome for paralogs of PlaA	72
4.1.1 Identification of two new <i>Legionella</i> genes that code for putative lipolytic enzymes.....	72
4.1.2 Expression kinetics of <i>L. pneumophila</i> 130b <i>plaC</i> and <i>plaD</i>	73
4.1.3 Characterization of the <i>L. pneumophila</i> GDSL enzyme PlaC	74
4.1.3.1 Genetic locus of <i>plaC</i> in <i>L. pneumophila</i> Philadelphia-1	74
4.1.3.2 Isolation of <i>L. pneumophila</i> 130b <i>plaC</i> mutants	75
4.1.3.3 Lipolytic activities of <i>L. pneumophila</i> <i>plaC</i> mutants	75
4.1.3.4 Lipolytic activities of <i>trans</i> complemented <i>L. pneumophila</i> <i>plaC</i> mutants.....	77
4.1.3.5 Secretion and activation of PlaC by <i>L. pneumophila</i>	79
4.1.3.6 Enzymatic activities of <i>E. coli</i> clones harbouring the <i>plaC</i> gene	80
4.1.3.7 The role of <i>plaC</i> during intracellular infection of amoebae and macrophages.....	82
4.1.3.8 Modification of host cell membrane sterols by <i>L. pneumophila</i> during infection	84
4.1.4 Characterization of the <i>L. pneumophila</i> GDSL protein PlaD.....	87
4.1.4.1 Genetic locus of <i>plaD</i> in <i>L. pneumophila</i> Philadelphia-1	87
4.1.4.2 Expression kinetics of <i>plaD</i> in <i>L. pneumophila</i> strain Corby	88
4.1.4.3 Isolation of <i>L. pneumophila</i> Corby <i>plaD</i> mutants.....	89
4.1.4.4 Lipolytic activities of <i>L. pneumophila</i> Corby <i>plaD</i> mutants.....	90
4.1.4.5 Enzymatic activities of <i>E. coli</i> clones harbouring the Corby <i>plaD</i> gene.....	91
4.1.4.6 The role of <i>L. pneumophila</i> Corby PlaD during intracellular infection.....	92
4.2. Screening an <i>L. pneumophila</i> genomic library in <i>E. coli</i> for hemolytic activities.....	95
4.2.1 The genetic locus of <i>plaB</i> in <i>L. pneumophila</i> strain Philadelphia-1	95
4.2.2 Isolation of <i>L. pneumophila</i> Corby <i>plaB</i> mutants.....	97
4.2.3 Lipolytic activities of <i>L. pneumophila</i> Corby <i>plaB</i> mutants.....	97
4.2.4 Enzymatic activities of <i>E. coli</i> harbouring <i>L. pneumophila</i> Corby <i>plaB</i>	100
4.3. Screening the <i>L. pneumophila</i> genome for patatin-like protein genes.....	102
4.3.1 Screening the genomes of completely sequenced bacteria for patatin-like protein genes ..	102
4.3.2 Correlation of the number of patatin-like proteins with bacterial pathogenicity.....	103
4.3.3 Characteristic features of bacterial patatin-like proteins	105
4.3.4 Classification of <i>L. pneumophila</i> Philadelphia-1 patatin-like proteins.....	106
4.3.5 Identification of an <i>Legionella pneumophila</i> PLP possessing protein homology to ExoU.....	109
4.3.6 Lipolytic activities of PatA expressed in <i>E. coli</i> DH5 α	110
4.3.7 Lipolytic Activities of PatA expressed in <i>L. pneumophila</i>	113
4.3.8 Characterization of <i>L. pneumophila</i> <i>patA</i> mutants.....	116
4.3.8.1 Intracellular replication of <i>L. pneumophila</i> 130b <i>patA</i> mutants	116
4.4. Identification of novel <i>L. pneumophila</i> phospholipases A by biochemical protein purification	118
4.4.1 Biochemical purification of secreted <i>L. pneumophila</i> PLA activity.....	118
4.4.2 Identification of <i>L. pneumophila</i> PLA candidates by N-terminal protein sequencing.....	138
4.4.3 Characterization of Unk1	140
4.4.3.1 Genetic locus of <i>L. pneumophila</i> <i>unk1</i>	140
4.4.3.2 Isolation of <i>L. pneumophila</i> 130b <i>unk1</i> mutants	142
4.4.3.3 Lipolytic activities of <i>L. pneumophila</i> 130b <i>unk1</i> mutants	143
4.4.3.4 Enzymatic activities of <i>E. coli</i> clones expressing <i>L. pneumophila</i> 130b <i>unk1</i>	145
4.4.3.5 The role of Unk1 during intracellular infection	147
4.4.4 Characterization of LvrE.....	149

4.4.4.1 Genetic locus of <i>L. pneumophila lvrE</i> in strain Philadelphia-1	149
4.4.4.2 Isolation of <i>L. pneumophila</i> Philadelphia-1 and 130b <i>lvrE</i> mutants	150
4.4.4.3 Enzymatic activities of <i>L. pneumophila</i> Philadelphia-1 and 130b <i>lvrE</i> mutants.....	151
4.4.4.4 Enzymatic activities of <i>E. coli</i> clones expressing <i>L. pneumophila lvrE</i>	156
4.4.4.5 The role of LvrE during intracellular infection	158
4.4.5 Characterization of Aas	164
4.4.5.1 Genetic locus of <i>L. pneumophila aas</i> in strain Philadelphia-1.....	164
4.4.5.2 Isolation of <i>L. pneumophila</i> 130b <i>aas</i> mutants	165
4.4.5.3 Lipolytic activities of <i>L. pneumophila</i> 130b <i>aas</i> mutants.....	166
4.4.5.4 Membrane lipid composition of <i>L. pneumophila</i> 130b <i>aas</i> mutants	170
4.4.5.5 Cytolytic effects of MPLPC on <i>L. pneumophila aas</i> mutants.....	172
4.4.5.6 The role of Aas during intracellular infection	174
5. Discussion.....	177
5.1 Identification of <i>L. pneumophila</i> PLA candidate proteins	177
5.2 The <i>L. pneumophila</i> GDSL enzymes PlaC and PlaD	179
5.2.1 Regulation of gene expression.....	179
5.2.2 Mode of secretion of PlaC and PlaD by <i>L. pneumophila</i>	180
5.2.3 Enzymatic activities of <i>L. pneumophila</i> PlaC and PlaD	180
5.2.4 Identification of putative active site residues.....	181
5.2.5 Role of PlaC and PlaD in intracellular infection	183
5.3 The <i>L. pneumophila</i> lipolytic enzyme PlaB	184
5.3.1 Classification of <i>L. pneumophila</i> PlaB.....	185
5.3.2. Enzymatic activities of PlaB	185
5.3.3 Localization of PlaB.....	186
5.4 The <i>L. pneumophila</i> Patatin-like proteins.....	187
5.4.1 Correlation of the number of patatin-like proteins with bacterial pathogenicity	187
5.4.2 Are <i>L. pneumophila</i> patatin-like proteins candidates for type IVB export?	188
5.4.3 Comparison of <i>L. pneumophila</i> PatA with <i>P. aeruginosa</i> ExoU.....	189
5.5 Proteins identified by N-terminal sequencing of chromatographic fractions containing PLA... 190	
5.5.1 <i>L. pneumophila</i> Unk1.....	191
5.5.2 <i>L. pneumophila</i> LvrE.....	192
5.5.3 <i>L. pneumophila</i> Aas	194
5.5.3.1 Localization of Aas.....	194
5.5.3.2 Function of Aas	195
5.5.3.3 Role of Aas in intracellular infection.....	197
5.6 Conclusion.....	198
References.....	199
6. Appendix.....	212
Southern blot analysis of <i>L. pneumophila</i> mutants	212
6.1 <i>L. pneumophila</i> 130b <i>plaC</i> mutants.....	212
6.2 <i>L. pneumophila</i> Corby <i>plaD</i> mutants	213
6.3 <i>L. pneumophila</i> 130b <i>patA</i> mutant.....	213
6.4 <i>L. pneumophila</i> 130b <i>unk1</i> mutants.....	214
6.5 <i>L. pneumophila</i> 130b and Philadelphia-1 <i>lvrE</i> mutants.....	214
6.6 <i>L. pneumophila</i> 130b <i>aas</i> mutants	215
