

## 8 Literaturverzeichnis

Adams DJ, Barakeh J, Laskey R, Van Breemen C:

Ion channels and regulation of intracellular calcium in vascular endothelial cells.

FASEB J.3 (12), 2389-400, 1989

Ankarcrona M, Dypbukt JM, Brune B:

Interleukin-I beta- induced nitric oxide production activates apoptosis in pancreatic RINm5F cells.

Exp. Cell Res. 213, 172-177, 1994

Amezcuca JL, Dusting GJ, Palmer RMJ, Moncada S:

Acetylcholine induces vasodilation in the rabbit isolated heart through the release of nitric oxide, the endogeneous nitrovasodilator.

Br. J. Pharmacol. 95, 830-834, 1988

Archer S:

Measurement of nitric oxide in biological models.

FASEB J. 7, 349-360, 1993

Arnal JF, Dinh-Xuan AT, Puueyo M, Darblade B, Rami J:

Endothelium-derived nitric oxide and vascular physiology and pathology

Cell. Mol. Life Sci. 55 (8-9), 1078-1087, 1999

Atlas D, Adler M:

Alpha-adrenergic antagonists as possible calcium channel inhibitors.

Proc. Natl. Acad. Sci. USA 79, 1237-1241, 1981

Ayajiki K, Kindermann M, Hecker M, Fleming I, Busse R:

Intracellular pH and tyrosine phosphorylation but not calcium determine shear stress-induced nitric oxide production in native endothelial cells.

Circ. Res. 78 (5), 745-6, 1996

Bartels H, Kirmizigül I, Mayer M, Purol-Schnabel S, Rösen R.:

The antioxidative effect of the dihydropyridine-  $\text{Ca}^{2+}$ - antagonists may be enhanced in the presence of a multilamellar membrane preparation.

Naunyn-Schmiedeberg's Arch. Pharmacol. 359 (Suppl.3): R 71, 1999

Berkels R, Klaus W, Boller M, Rösen R:

The calcium modulator nifedipine exerts its antiaggregatory property via a nitric oxide mediated process.

Thromb. Haem. 72, 309-312, 1994

Berkels R, Bertsch A, Breitenbach T, Klaus W, Rösen R:

The calcium antagonist nifedipine stimulates endothelial NO release in therapeutical concentrations.

Pharm. Pharmacol. Lett. 6: 75-78, 1996

Berkels R, Bertsch A, Zuther T, Dhein S, Stockklauser K, Rösen P, Rösen R:

Evidence for a NO Synthase in porcine platelets which is stimulated during activation/aggregation.

Eur. J. Haematol. 58, 307-313, 1997

Berkels R, Hass U, Dachs C, Klaus W:

The calcium modulator nifedipine inhibits the endothelial uptake of modified LDL fundamental.

Clin. Pharmacol. 13, 121, 1999

Berkels R, Rösen R, Dhein S, Fricke U, Klaus W:

Dihydropyridine calcium antagonist-induced modulation of endothelial function: a Review.

Cardiovasc. Drug Rev. 17 (2), 179-186, 1999

Berkels R, Müller A, Rösen R, Klaus W:

Nifedipine and Bay K 8644 induce an increase of  $[\text{Ca}^{2+}]_i$  and NO in endothelial cells.

J. Cardiovasc. Pharmacol. Therapeut. 4 (3), 175-181, 1999

Berkels R, Hass U, Klaus W:

The calcium antagonist nifedipine inhibits the uptake of acetylated LDL into endothelial cells.

Naunyn-Schmiedeberg's Arch. Pharmacol. 362, 91-95, 2000

Berkels R, Klaus W:

Kalziumantagonisten näher betrachtet

Dtsch. Med. Wschr. 125, 531-533, 2000

Berkels R, Egink G, Marsen TA, Bartels H, Rösen R, Klaus W:

Nifedipine increases endothelial nitric oxide bioavailability by antioxidative mechanisms.

Hypertension 37, 240-245, 2001

Bertsch A:

Stimulation endothelialer Stickstoffmonoxid (NO)- Bildung durch Calciumantagonisten im Vergleich zu Bradykinin.

Dissertation, Universität zu Köln, 1996

Bredt DS, Snyder SH:

Isolation of nitric oxide synthase, a calmodulin-requiring enzyme.

Proc. Natl. Acad. Sci. USA 87, 682-685, 1990

Bredt DS:

Endogenous nitric oxide synthesis: biological functions and pathophysiology.

Free Radic. Res. 31 (6), 577-596, 1999

Brien JF, McLaughlin BE, Nakatsu K, Marks GS:

Quantitation of nitric oxide formation from nitrovasodilator drugs by chemiluminescence analysis of headspace gas.

J. Pharmacol. Meth. 25, 19-27, 1991

Brovkovych V, Stolarczyk E, Oman J, Tomboulian P, Malinski T:

Direct electrochemical measurement of nitric oxide in vascular endothelium.

J. Pharm. Biomed. Anal. 19, 135-143, 1999

Brovkovych V, Kalinowski L, Müller-Peddinghaus R, Malinski T:

Synergistic antihypertensive effects of nifedipine on endothelium.

Hypertension 37, 34-39, 2001

Brown AS, Martin JF:

The megakaryocyte platelet system and vascular disease.

Eur. J. Clin. Invest. 24 (Suppl.1), 9-15, 1994

Buga GM, Gold ME, Fukuto JM, Ignarro LJ:

Shear stress-induced release of nitric oxide from endothelial cells grown on beads.

Hypertension 17 (2), 187-193, 1991

Buga GM, Griscavage JM, Rogers NE, Ignarro LJ:

Negative feedback regulation of endothelial cell function by nitric oxide.

Circ. Res. 73, 808-812, 1993

Carr A, Frei B:

The role of natural antioxidants in preserving the biological activity of endothelium-derived nitric oxide.

Free Rad. Biol. Med. 28, 1806-1814, 2000

Chakravarthy U, Hayes RG, Stitt AW, McAuley E, Archer DB:

Constitutive nitric oxide synthase expression in retinal vascular endothelial cells is suppressed by high glucose and advanced glycation end products.

Diabetes 47, 945-952, 1998

Cocks TM, Angus JA, Campell JH, Campell GR:

Release and properties of endothelium-derived relaxing factor (EDRF) from endothelial cells in culture.

J. Cell. Physiol. 123, 310-320, 1985

Colden-Stanfield M, Schilling WP, Ritchie AK, Eskin SG, Navarro LT, Kunze DL:

Bradykinin-induced increases in cytosolic calcium and ionic currents in cultured bovine aortic endothelial cells.

Circ. Res. 61 (5), 632-640, 1987

Corson MA, James NL, Latta SE, Nerem RM, Berk BC, Harrison DG:

Phosphorylation of endothelial nitric oxide synthase in response to fluid shear stress.

Circ. Res. 79 (5), 984-991, 1996

Crow JP, Beckmann JS:

Reactions between nitric oxide, superoxide, and peroxynitrite: footprints of peroxynitrite in vivo.

Adv. Pharmacol. 14, 17-43, 1995

Dhein S, Salameh A, Berkels R, Klaus W:

Dual mode of action of dihydropyridine calcium antagonists.

Drugs 58 (3), 397-404, 1999

Ding Y, Vaziri ND:

Nifedipine and diltiazem but not verapamil up-regulate endothelial nitric-oxide synthase expression.

J. Pharmacol. Exp. Ther. 292 (2), 606-609, 2000

Doyle VM, Ruegg UT:

Lack of evidence for voltage dependent calcium channels on platelets.

Biochem. Biophys. Res. Commun. 127, 161-167, 1985

Fehsel K, Kroncke KD, Meyer KL et al.:

Nitric oxide induces apoptosis in mouse thymocytes.

J. Immunol. 155, 2858-2865, 1995

Figuroa XF, Martinez AD, Gonzalez DR, Jara PI, Ayala S, Boric MP:

In vivo assessment of microvascular nitric oxide production and its relation with blood flow.

Am. J. Physiol. Heart Circ. Physiol. 280, H1222-H1231, 2001

Fleckenstein-Grun G, Thimm F, Czifuzs A, Matyas S, Frey M:

Experimental vasoprotection by calcium antagonists against calcium-mediated arteriosclerotic alterations.

J. Cardiovasc. Pharmacol. 24 (Suppl. 2), S75-84, 1994

Förstermann U, Pollock JS, Schmidt HH, Heller M, Murad F:

Calmodulin-dependent endothelium-derived relaxing factor/nitric oxide synthase activity is present in the particulate and cytosolic fractions of bovine aortic endothelial cells.

Proc. Nat. Acad. Sci. USA 88, 1788-1792, 1991

Furchgott RF:

Role of endothelium in responses of vascular smooth muscle.

Circ. Res. 53(5), 557-573, 1983

Garvey EP, Oplinger JA et al.:

1400 W is a slow, tight binding, and highly selective inhibitor of inducible nitric-oxide synthase in vitro and in vivo.

J. Biol. Chem. 272 (8), 4959-4963, 1997

Gaul JP, Heinecke JW:

Mechanisms for oxidizing low-density lipoprotein. Insights from patterns of oxidation products in the artery wall and from mouse models of atherosclerosis.

Trends Cardiovasc. Med. 11 (3-4), 103-112, 2001

Gilliam MB, Sherman MP, Griscavage JM, Ignarro LJ:

A spectrophotometric assay for nitrate using NADPH oxidation by *Aspergillus* nitrate reductase.

Anal. Biochem. 212 (2), 359-365, 1993

Graier WF, Schmidt K, Kukovetz WK:

Effect of sodium fluoride on cytosolic free  $Ca^{2+}$ -concentrations and cGNP-levels in endothelial cells.

Cell Signal. 2 (4), 369-375, 1990

Griffith TM, Edwards DH, Lewis MJ, Newby AC, Henderson AH:

The nature of endothelium-derived vascular relaxant factor.

Nature 308, 645-647, 1984

Gryglewski RJ, Moncada S, Palmer RM:

Bioassay of prostacyclin and endothelium-derived relaxing factor (EDRF) from porcine aortic endothelial cells.

Br. J. Pharmacol. 87, 685-694, 1986

Günther J, Dhein S, Klaus W, Rösen R, Fricke U:

Influence of endothelium on the vascular activity of 1,4-dihydropyridines.

Naunyn Schmiedeberg's Arch. Pharmacol. 344, R77, 1991

Günther J, Dhein S, Rösen R, Klaus W, Fricke U:

Nitric oxide (EDRF) enhances the vasorelaxing effect of nitrendipine in various isolated arteries.

Basic Res. Cardiol. 87, 452-460, 1992

Guo JP, Murohara T, Buerke M, Scalia R, Lefer AM:

Direct measurement of nitric oxide release from vascular endothelial cells.

J. Appl. Physiol. 81, 774-779, 1996

Gustafsson LE, Leone AM, Persson MG, Wiklund NP, Moncada S:

Endogenous nitric oxide is present in the exhaled air of rabbits, guinea pigs and humans.

Biochem. Biophys. Res. Commun. 181, 852-857, 1991

Henry Y, Ducrocq C, Drapier JC, Servent D, Pellat C, Guissani A:

Nitric oxide, a biological effector. Electron paramagnetic resonance detection of nitrosyl-iron-protein complexes in whole cells.
