

## Acknowledgments

Special thanks to **Prof. Dr. Jürgen Schmitt** for critical reading of the manuscripts, for good advices, patience and a lot of help with my thesis. Thanks to **Dr. Dirk Hinch** for good and useful suggestions during the work on thesis and for critically reading of the manuscript.

Thanks to **Dr. Carsten Köhn** for constructive criticism and helping with my thesis and endless patience, many useful discussions and helpful advices during the laboratory work. My thanks to **Dr. Silke Schilling** for helping me selflessly at the beginning of my work on this thesis.

Thanks to **Mrs. Felicitas Wronski** and **Mrs. Hildegard Köth** on selfless help during the experimental work.

Thanks to dear and vigorous **Dr. Libia Treho** on her friendly advices and great enthusiasm that she shared with all of us working in the lab.

Thanks to all past and present personnel at the Institute for Plant Physiology and Microbiology on the Free University-Berlin for creating a warm and friendly atmosphere.

Thanks to **DAAD** for making this work on my PhD thesis possible in Germany by giving their great help by sponsoring my whole work.

And last but not least, thanks to my family for supporting me during those years of work on my thesis.

Financial support for this thesis was provided by the DAAD (Deutscher Akademischer Austausch Dienst). [www.daad.de](http://www.daad.de)
