

**Homogeneity and Stability  
of  
Transgene Expression In Mammalian Cells**

**Dissertation zur Erlangung des akademischen Grades  
des Doktors der Naturwissenschaften (Dr. Rer. Nat.)**

**eingereicht im Fachbereich Biologie, Chemie, Pharmazie  
der Freien Universität Berlin**

**vorgelegt von**

**Weimin Liu**

**aus China**

**September, 2005**

**The work included in this thesis was performed  
in Dr. Manfred Gossen's lab  
at the Max-Delbrück-Center for Molecular Medicine  
Berlin, Germany**

- 1. Gutachter: Prof. Dr. Udo Heinemann**
- 2. Gutachter: Prof. Dr. Carsten Niemitz**

**Disputation am: 30. 11. 2005**

*To my beloved parents!*

**TABLE OF CONTENTS**

<b>1. INTRODUCTION</b>	<b>4</b>
<b>1.1. DNA methylation and chromatin modification</b>	<b>4</b>
1.1.1 DNA methylation and gene silencing	4
1.1.2 Chromatin modification and gene silencing	7
1.1.3 DNA methylation and chromatin modification	9
<b>1.2 Position effect variegation</b>	<b>9</b>
1.2.1 Position effect variegation in transgenic animals	9
1.2.2 Position effect in transgenic cell lines	10
<b>1.3 Repeat-induced gene silencing</b>	<b>11</b>
<b>1.4 Host defense mechanism</b>	<b>13</b>
1.4.1 Restriction-modification system in prokaryotes	13
1.4.2 Host defense in eukaryotes	14
1.4.3 Possible DNA feature defined as foreign in host	14
<b>1.5 The property of the promoter on gene expression</b>	<b>15</b>
1.5.1 Promoter and gene expression	15
1.5.2 Different promoter types in eukaryotes	16
1.5.3 Promoter choices in transgenic technology	16
<b>1.6 Gene regulation modes: the on/off vs. the rheostat model</b>	<b>17</b>
<b>1.7 Aim of the study</b>	<b>20</b>
<b>2. MATERIALS AND METHODS</b>	<b>22</b>
<b>2.1 Materials</b>	<b>22</b>
2.1.1 Chemicals	22
2.1.2 Solutions and media	24
2.1.3 Enzymes	27
2.1.4 Kits	28
2.1.5 Vectors	28
2.1.6 DNA markers	28

2.1.7	Bacterial material-----	29
2.1.8	Mammalian cell lines-----	29
2.1.9	Antibiotics-----	29
<b>2.2</b>	<b>Methods -----</b>	<b>29</b>
2.2.1	DNA isolation -----	29
2.2.2	Recombinant DNA techniques-----	30
2.2.3	Cell culture -----	31
2.2.4	Transfection-----	32
2.2.5	Southern Blotting -----	33
2.2.6	Subcloning by limited dilution -----	34
2.2.7	Flow cytometry-----	34
2.2.8	X-gal staining of cell monolayers -----	36
2.2.9	Flp-In system -----	37
2.2.10	Stable clone construction by the “Sorting-Subcloning” approach-----	40
<b>3.</b>	<b>RESULTS-----</b>	<b>42</b>
<b>3.1</b>	<b>The construction of stable clones in Flp-In system -----</b>	<b>42</b>
3.1.1	The presence of the FRT site in the host cell line genome -----	42
3.1.2	Acquisition of positive stable clones with Flp-In system -----	43
<b>3.2</b>	<b>The time course of transgene expression in the Flp-In system -----</b>	<b>46</b>
3.2.1	Transgene expression under antibiotic selection over time-----	46
3.2.2	Unstable transgene expression under nonselective conditions over time - -----	48
3.2.3	The transcriptional instability of the FRT locus in the host cell line genome -----	50
3.2.4	The irreversible expression pattern of subpopulations after FACSorting -- -----	51
3.2.5	The variance of the transgenic expression characteristics between clones -----	53
3.2.6	Unstable, but higher transgene expression level with multiple copies --	54
<b>3.3</b>	<b>Construction of stable clones by the “Sorting-Subcloning” approach- -----</b>	<b>57</b>
3.3.1	Stable clone construction by the “Sorting-Subcloning” approach-----	57

3.3.2	Stable expression of clones constructed with transcription cassettes by the “Sorting-Subcloning” approach -----	60
3.3.3	Bypassing antibiotic selection to obtain stable clones is critical for long term stable transgene expression-----	62
<b>4.</b>	<b>DISCUSSION-----</b>	<b>66</b>
<b>4.1</b>	<b>Transgenic expression in the Flp-In system-----</b>	<b>66</b>
4.1.1	Single copy integration is not the prerequisite for stable transgene expression-----	67
4.1.2	The CpG content of the coding region and transgene expression-----	69
4.1.3	The promoter effect on transgene expression-----	72
4.1.4	The on/off vs. rheostat model-----	74
4.1.5	The irreversible expression pattern of subpopulations was caused by an undetectable oscillation-----	77
<b>4.2</b>	<b>Stable transgene expression in clones achieved by bypassing antibiotic selection -----</b>	<b>80</b>
<b>5.</b>	<b>OUTLOOK-----</b>	<b>87</b>
<b>6.</b>	<b>SUMMARY-----</b>	<b>89</b>
<b>7.</b>	<b>ZUSSAMENFASSUNG-----</b>	<b>91</b>
<b>8.</b>	<b>REFERENCE LIST-----</b>	<b>93</b>
<b>9.</b>	<b>ACKNOWLEDGEMENTS-----</b>	<b>110</b>
<b>10.</b>	<b>APPENDIX-----</b>	<b>112</b>
<b>11.</b>	<b>CURRICULUM VITAE AND PUBLICATIONS-----</b>	<b>119</b>
